VOC	Volatile Organic Compound

Executive Summary

On behalf of UniFirst Corporation (UniFirst) of Wilmington, Massachusetts, GEI Consultants, Inc. (GEI) prepared this Phase V Status Report No. 29 and Remedial Monitoring Report (RMR) No. 44 for the site located at 50 Tufts Street in Somerville, Massachusetts (the Site). The Site is identified by Massachusetts Department of Environmental Protection (MassDEP) Release Tracking Number (RTN) 3-23246. The Site includes the 50 Tufts Street property (the Property), other properties in the neighborhoods east and immediately north, south, and west of the Property, and the Michael E. Capuano Early Childhood Center (Capuano Center) located at 150 Glen Street in Somerville, Massachusetts. The Site has been in Phase V since 2011. This Phase V Status Report No. 29 covers the period from June 16, 2025, to December 15, 2025.

E.S.1. Background

From approximately 1955 to 2002, the Property was used for storage and distribution of industrial chemicals, laundry supplies, and dry-cleaning supplies. Chemicals stored at, and transported to and from the Property, included chlorinated volatile organic compounds (VOCs). In 2002, a release of these chlorinated VOCs – particularly tetrachloroethylene (also called perchloroethylene [PCE]), trichloroethylene (TCE), and 1,1,1-trichloroethane (TCA) – have been detected in soil, soil vapor, indoor air, and groundwater at the Property was reported to the MassDEP and assigned RTN 3-23246. Three other RTNs were subsequently issued for the Site: 3-24358, 3-24376, and 3-26114. For tracking and reporting purposes, these RTNs have been consolidated under RTN 3-23246.

The detection of chlorinated VOCs in indoor air at some buildings required the implementation of an Immediate Response Action (IRA). The Site was classified as Tier IC (Permit No. W085813). The “Phase II Comprehensive Site Assessment (CSA), Method 3 Risk Characterization, and Phase III Remedial Action Plan (RAP)” (Phase II/III) for the Site was submitted to MassDEP on July 14, 2008. The “Phase IV Remedy Implementation Plan” (Phase IV RIP) was submitted to MassDEP on August 10, 2009. The “Immediate Response Action Completion Report and Remedial Monitoring Report No. 11” (IRAC Report) was submitted to MassDEP on November 13, 2009, and the “Immediate Response Action Completion Report Amendment” (IRAC Report Amendment) was submitted to MassDEP on April 1, 2011. The “Phase IV Final Inspection Report, Remedial Monitoring Report No. 15, and Phase V Remedy Operation Status Report” (Phase IV FIR/Phase V ROS) was submitted to MassDEP on August 4, 2011. The Site was reclassified as Tier II on August 1, 2014, and a Tier Classification Extension was submitted on May 9, 2025.

The remedial action alternative (RAA) selected by the Phase III evaluation included soil vapor extraction (SVE) at the Property, Site wide Exposure Pathway Mitigation Measures (EPMMs), and Monitored Natural Attenuation (MNA). The Phase IV FIR/Phase V ROS documented that construction and implementation of the Comprehensive Response Action (CRA) have been completed, and additional activities, such as operation and monitoring of active remedial systems, will be conducted under Phase V.

On December 12, 2024, MassDEP issued to UniFirst a Notice of Audit Finding, Notice of Noncompliance (NOAF/NON) and Termination of ROS. The Site had been in ROS since August 2014; however, MassDEP

stated in the NOAF/NON that the requirements of 310 CMR 40.0893(2) were not being met and thus terminated ROS through the NOAF/NON. After clarification of the current regulatory status of the Site through subsequent meetings and discussions with MassDEP, UniFirst is continuing Phase V activities during the pendency of the NOAF/NON.

In accordance with the MCP, particularly 310 CMR 40.0892, this Phase V Status Report No. 29 and RMR No. 44 includes the following information regarding the remedial actions being conducted at the Site:

- A description of the type and frequency of operation, maintenance, and/or monitoring (OMM) activities.
- A description of any significant modifications made to the OMM activities since the last reporting period.
- An evaluation of the performance of the remedial action during the reporting period, including whether the remedial action is achieving remedial goals specified in the Phase IV RIP as described in 310 CMR 40.0874(3), and a description of any conditions or problems identified through OMM activities during the reporting period that are, or may be, affecting the performance of the remedial action.
- A description of the measures taken to address any conditions or problems identified through OMM activities during the reporting period.
- The name, license number, signature, and seal of the LSP.

Following is a summary of OMM activities conducted at the Site to date:

E.S.2. Capuano Center

A Sub-Slab Depressurization System (SSDS) was installed in the east wing of the Capuano Center, along with sealing of specific slab/wall joints to address potential vapor migration. Since its installation in February 2007, 24 rounds of indoor air sampling have confirmed elimination of the Critical Exposure Pathway (CEP) to indoor air, achieving a No Significant Risk (NSR) condition for occupants. The system, which includes three radon fans and remote telemetry, was validated in May 2015 with no VOCs detected above reporting limits. GEI concludes the system meets design standards and remedial objectives, and ongoing inspection, maintenance, and monitoring will continue.

E.S.3. Residential and Commercial Properties

During the Immediate Response Action (IRA), GEI promptly assessed and implemented measures to eliminate or reduce CEPs, considering property suitability and owner cooperation. Initial mitigation was conducted under IRA activities, with further assessments and actions incorporated into subsequent remedial plans. Following the submittal of the IRAC Report and IRAC Report Amendment, ongoing response actions addressing CEPs were integrated into the Phase IV RIP. Construction and implementation of the CRAs have been completed, and Operation, Maintenance, and Monitoring (OMM) activities—including operation of active remedial systems and EPMMs—are ongoing under Phase V or as Partial Permanent Solutions Statements. GEI continues to assess and implement new or modified EPMMs as needed during site redevelopment, in line with the established remedial plans.

EPMMs are relied upon to meet the remedial objectives at 20 residential and commercial properties, not including the EPMMs installed at 50 Tufts Street, 60 Tufts Street, and the Capuano Center. GEI conducted eight EPMM inspections during this reporting period in December 2025. GEI was unable to access several of the residential properties for the 2025 annual inspections but will continue its attempts to obtain access for EPMM inspections at these properties during the next reporting period.

Filing of a Partial Permanent Solution Statement (PSS) for an individual property documents the achievement of regulatory closure under the MCP for that property. This reporting period, GEI submitted a Partial PSS with No Conditions for 103 Washington Streett in June 2025.

A Partial PSS with Conditions Statement will be submitted for each property with an active or passive EPMM, where the EPMM has achieved the remedial objectives, an AUL has been recorded for the property, and sufficient post-EPMM indoor air sampling has been conducted. The filing of a Partial PSS with Conditions for an individual property documents the achievement of regulatory closure under the MCP for that property. Therefore, the Phase V provisions will not apply to properties for which a Partial PSS with Conditions has been submitted.

E.S.4. 60 Tufts Street

A SSDS was installed at the 17-unit condominium building at 60 Tufts Street, providing effective vapor mitigation and achieving a condition of NSR for occupants. Remote telemetry was added in July 2015. Due to blower noise complaints and operational issues in mid-2025, GEI temporarily shut down the system for repairs, with the blower replaced by December 24, 2025, and the system restarted on January 8, 2026, after indoor air and soil vapor sampling. GEI conducts quarterly monitoring and plans to continue operation and maintenance of the SSDS. Pre-EPMM indoor air testing and updated toxicological data suggest the active EPMM may not be required, and GEI has coordinated with owners and occupants for closure testing, with sampling rounds conducted in October 2025 and January 2026.

E.S.5. 50 Tufts Street Property

A combined SSDS and SVE system is installed at 50 Tufts Street. Monitoring data confirms that the SSDS provides effective coverage, resulting in a condition of NSR condition for building occupants. Remote telemetry, installed in April 2015, enables wireless monitoring of system parameters, with quarterly reviews of sub-slab conditions and monthly checks of off-gas treatment efficiency. Through December 15, 2025, the system has removed approximately 9,522 lbs of VOCs from the vadose zone. GEI will continue to operate and monitor the combined SSDS/SVE system to maintain indoor air quality and source removal.

E.S.6. Telemetry

The MCP requires remote telemetry systems to notify building owners/operators and MassDEP if the system fails. All properties with active EPMMs, except 9 Knowlton Street (whose owner has refused installation), have telemetry installed. GEI reviewed the current telemetry setup to align with the 2024 MCP amendments, which require continuous vacuum monitoring. However, properties with existing registered telemetry systems are exempt from this new requirement (310 CMR 40.1026[3][d][6]) and do not need to continuously report system vacuum.

E.S.7. Tufts Street Reconstruction Project

The City of Somerville is undertaking the Tufts Street Reconstruction project that includes sidewalk reconstruction, catch basin replacement, street realignment, re-paving, and planting trees and greenery. GEI has been working cooperatively with the City of Somerville and their LSP (Atlas Technical Consultants LLC [Atlas]) regarding the impact of the 50 Tufts Street contamination on the project.

On behalf of the City, Atlas submitted a Utility-Related Abatement Measure (URAM) and a Contained-In Determination (CID) in May 2025 to MassDEP. The CID identified low levels of PCE detected in one soil sample and requested soil in that area be reclassified as a non-hazardous waste for in-state landfill disposal. The URAM described the integration of soil and groundwater management into project design, soil management procedures and health and safety requirements for contractors. Construction began in September 2025 and is ongoing.

E.S.8. GLX Project

The MBTA Green Line Extension (GLX) Project expanded Green Line service through Somerville to Medford, including major infrastructure upgrades such as a new pump station, bridge reconstruction, new tracks, a train station, and utility improvements within and near the site. Between 2019 and 2024, approximately 25,400 cubic yards of soil were excavated, managed, and disposed of off-site during construction. More than 8 million gallons of groundwater dewatering effluent with elevated PCE levels was managed and treated before being discharged to the Millers River. Although construction is complete, GEI notes that the GLX Project may have permanently altered groundwater conditions at the site.

E.S.9. Monitored Natural Attenuation

MNA was incorporated into the remedial strategy to achieve a Permanent Solution for the Site, as documented in the Phase III Report submitted to MassDEP in 2008. GEI is conducting a groundwater monitoring program and a comprehensive update of the MNA evaluation to verify on-going natural attenuation at the Site. The MNA update will be included in the “Phase II CSA Addendum” report and updated Conceptual Site Model (CSM).

E.S.10. Response to Notice of Audit Finding/Notice of Non-Compliance

In connection with efforts to satisfy requirements in the December 12, 2024, NOAF/NON for a Phase II CSA Addendum and CSM update, GEI installed eight new groundwater monitoring wells across the site between September and December 2025. These wells targeted the 50 Tufts Street source area, the downgradient neighborhood and south of Washington Street, and included deep and shallow bedrock and overburden wells. Following installation, comprehensive groundwater sampling was conducted in fall 2025, with a second round planned for February 2026. In total, samples from 41 wells were analyzed for VOCs and, in selected locations, for MNA parameters.

As requested by the NOAF/NON, GEI attempted to conduct two rounds of indoor air testing at eight residences (91 and 93 Franklin Street; 166-168 Glen Street, 17, 32 and 34 Knowlton Street; 4, 11, and

19-19A Morton Street)[1] with passive EPMMs. The first round of testing was completed at seven out of eight properties between February and April 2025; one property owner (4 Morton Street) was unresponsive. A second round of testing was conducted in December 2025 at five of the eight properties, but access was not obtained at 17 Knowlton Street or 166-168 Glen Street. Recent discussions with the property owner of 4 Morton Street suggest that sampling will likely occur in the winter of 2026. GEI will continue efforts to access the remaining properties for a second round of testing.

As also requested by the NOAF/NON, GEI is working to gain access to seven properties whose owners previously refused UniFirst's offer to install vapor mitigation systems (99 Franklin Street, 162-164 Glen Street, and 9, 11-13, 17, 19, and 25 Tufts Street). Attempts were made via certified mail and in-person visits in December 2025. Contact was established with owners of three properties (162-164 Glen Street, 11-13 Tufts Street, and 19 Tufts Street), and indoor air sampling is being scheduled. Efforts to access the remaining properties will continue, and if successful, UniFirst will conduct further indoor air sampling to evaluate current conditions.

E.S.11. Remedial Monitoring Report No. 44

Remedial Monitoring Report No. 44, documenting OMM activities of active remedial systems at the Site, is presented in the BWSC-108A and 108B Transmittal Forms in Appendix A.

[1] 91 and 93 Franklin is a single building.

1. Introduction

On behalf of UniFirst Corporation (UniFirst) of Wilmington, Massachusetts, GEI Consultants, Inc. (GEI) prepared this Phase V Status Report No. 29 and Remedial Monitoring Report (RMR) No. 44 for the site located at 50 Tufts Street in Somerville, Massachusetts (the Site; Fig. 1-1). The Site is identified by Massachusetts Department of Environmental Protection (MassDEP) Release Tracking Number (RTN) 3-23246. The Site includes the 50 Tufts Street property (the Property), other properties in the neighborhoods east and immediately north, south, and west of the Property, and the Michael E. Capuano Early Childhood Center (Capuano Center) located at 150 Glen Street in Somerville, Massachusetts (Fig. 1-2). The Site has been in Phase V since 2011. This Phase V Status Report No. 29 covers the period from June 16, 2025, to December 15, 2025.

On December 12, 2024, MassDEP issued a Notice of Audit Finding, Notice of Noncompliance (NOAF/NON) and Termination of Remedy Operation Status (ROS). The Site had been in ROS since August 2014; however, MassDEP stated in the NOAF/NON that the requirements of 310 CMR 40.0893(2) were not being met and thus terminated ROS. UniFirst is continuing Phase V activities, consistent with discussions with MassDEP following its issuance of the NOAF/NON.

The NOAF/NON also required revisions to the Massachusetts Contingency Plan (MCP; 310 CMR 40.0000) milestone reports in accordance with the following schedule:

- By February 12, 2025, submit a Tier Classification Extension in accordance with 310 CMR 40.0560(7).
- By April 14, 2026, submit an addendum to the Phase II Comprehensive Site Assessment (CSA) Report in accordance with the requirements 310 CMR 40.0835 including an updated Conceptual Site Model, site boundary based on the nature and extent of contamination.
- By June 12, 2026, submit an addendum to the Phase III Remedial Action Plan in accordance with the 310 CMR 40.0850 considering technological advances made in the treatment of chlorinated volatile organic compounds (VOCs).
- By August 12, 2026, submit an addendum to the Phase IV Remedy Implementation Plan in accordance 310 CMR 40.0874.
- By December 14, 2026, in accordance with the provisions of 310 CMR 40.40.0893(6)(e), achieve a Permanent or Temporary Solution for the Site.

During a meeting among MassDEP, UniFirst, GEI, and their respective counsel on April 25, 2025, MassDEP clarified that the submissions called for in the section of the NOAF/NON titled “Actions to be Taken and Deadline for Taking Such Actions,” including the “revised” Phase II, Phase III, and Phase IV reports should take the form of supplements or addendums to the existing reports, rather than comprehensive revisions. Also at the April 25, 2025, meeting, MassDEP extended the time for submission of the Tier Classification Extension form to May 9, 2025. UniFirst submitted the Tier Extension form within the extended time period provided by MassDEP.

1.2. Background

In 2002, a release of chlorinated VOCs (particularly tetrachloroethylene [also known as perchloroethylene (PCE)], trichloroethylene [TCE], and 1,1,1-trichloroethane [TCA]) to soil and groundwater at the Property was reported to the MassDEP and assigned RTN 3-23246. Three other RTNs were subsequently issued for the Site: 3-24358, 3-24376, and 3-26114. For tracking and reporting purposes, these RTNs have been consolidated under RTN 3-23246.

The detection of chlorinated VOCs in indoor air at some buildings within the Site required the implementation of an Immediate Response Action (IRA). The "Phase II Comprehensive Site Assessment (CSA), Method 3 Risk Characterization, and Phase III Remedial Action Plan (RAP)" (Phase II/III) for the Site was submitted to MassDEP on July 14, 2008. The "Phase IV Remedy Implementation Plan" (Phase IV RIP) was submitted to MassDEP on August 10, 2009. The "Immediate Response Action Completion Report and Remedial Monitoring Report No. 11" (IRAC Report) was submitted to MassDEP on November 13, 2009, and the "Immediate Response Action Completion Report Amendment" (IRAC Report Amendment) was submitted to MassDEP on April 1, 2011. The "Phase IV Final Inspection Report, Remedial Monitoring Report No. 15, and Phase V Remedy Operation Status Report," (Phase IV FIR/Phase V ROS) was submitted to MassDEP on August 4, 2011. The Site was reclassified as Tier II on August 1, 2014, and a Tier Classification Extension was submitted on May 9, 2025, as required by the December 2024 NOAF/NON and a subsequent extension of the required submission date provided by MassDEP.

The remedial action alternative (RAA) selected by the Phase III evaluation included:

1. Installing Exposure Pathway Mitigation Measures (EPMMs) to the extent feasible (e.g. vapor barrier and venting system, or sub-slab depressurization systems [SSDSs]), and recording Activity and Use Limitations (AULs) as appropriate, for residences where the soil vapor migration pathway to indoor air has been confirmed, and installing EPMMs in occupied commercial buildings to reduce chlorinated VOC concentrations in indoor air to that which constitutes a condition of No Significant Risk (NSR).

2. Continuing to operate the soil vapor extraction (SVE) system at the Property to remove compounds of potential concern (COPCs) from the vadose zone.
3. Conducting a Site-wide Monitored Natural Attenuation (MNA) program to evaluate overburden and bedrock groundwater plume concentrations over time to assess the rate of natural attenuation processes, and to confirm that groundwater concentrations of chlorinated VOCs are generally stable or decreasing.

As part of the IRA, GEI promptly assessed and implemented measures to eliminate or mitigate Critical Exposure Pathways (CEPs) based on site conditions and property access. These actions, initially part of the IRA, were evaluated further in the Phase II/III assessment and included in the recommended Comprehensive Response Action (CRA). Once the Phase IV Remedy Implementation Plan (RIP) was submitted, ongoing CEP mitigation became part of the Phase IV plan, as reflected in the IRAC Report and its Amendment. All subsequent response actions have continued under Phase IV and V.

Construction and implementation of the CRA identified in the Phase IV RIP have been completed; additional activities, such as operation and monitoring of active remedial systems, or installation of new EPMMs, are being conducted under Phase V during the pendency of the NOAF/NON, as agreed to through meetings and discussions with MassDEP in the Spring of 2025. When appropriate, portions of the Site may be closed under Partial Permanent Solution Statements (PSS), with or without Conditions. Operating the SSDS and SVE systems, together with MNA, will ultimately achieve a Permanent Solution for the Site.

GEI will continue to conduct annual operation, maintenance, and/or monitoring (OMM) activities for installed EPMMs where sufficient indoor air sampling has been conducted, and not repeat indoor air testing, to confirm continued system effectiveness. GEI also conducts groundwater sampling and analysis as part of the MNA program.

1.3. Purpose and Scope

The Site entered Phase V on August 4, 2011. In accordance with the MCP (310 CMR 40.0892), this Phase V Status Report No. 29 and RMR No. 44 includes the following information regarding the remedial actions being conducted at the Site:

- A description of the type and frequency of OMM activities.
- A description of any significant modifications made to the OMM activities since the last reporting period.
- An evaluation of the performance of the remedial action during the reporting period, including whether the remedial action is achieving remedial goals specified in the Phase IV RIP as described in 310 CMR 40.0874(3), and a description of any conditions or problems noted during the reporting period that are or may be affecting the performance of the remedial action.
- A description of the measures taken to correct any conditions or problems that may have been encountered during the reporting period.
- The name, license number, signature, and seal of the LSP.

This report covers the period from June 16, 2025, through December 15, 2025. Details of the engineering concepts, design criteria, construction plans, and specifications were previously provided to MassDEP as part of the Phase IV RIP, IRA Status Reports, RMRs, and IRA Plan Modifications and are not revisited in this report.

1.4. Public Involvement (310 CMR 40.1400)

UniFirst and GEI conducted a series of community meetings to inform property owners, residents, and City of Somerville (the City) officials about the Site. GEI provides copies of this Phase V Status Report No. 29 and RMR No. 44 to the local public document repository that was established for the Site at the Somerville Central Public Library. The Somerville Public Library has made documents available on the Internet Archive: (https://archive.org/details/somervillepubliclibrary?tab=collection&query=GEI+Consultants&sort=-date) .

This report was submitted through eDEP (Transaction No. 1975672). A draft copy of the eDEP Transmittal Form (BWSC-108) is provided in Appendix A.

Copies of property owner notification letters, including notice of sampling letters, chemical testing results letters, and other miscellaneous correspondence sent during the reporting period, are in Appendix B. A table summarizing in-person communication with residences is also in Appendix B.

2. GLX Project

2.1. Background

The Massachusetts Bay Transit Authority (MBTA), through its contractor GLX Constructors (GLXC), has completed the extension of MBTA Green Line service to Union Square in Somerville and beyond to College Avenue in Medford. The GLX Project included significant infrastructure improvements near and through the Site, including a new pump station, reconstruction of the bridge passing over Washington Street, new train tracks within the MBTA right-of-way (ROW), a new train station, and utility improvements. The MBTA, GLXC, and their contractors initiated three RTNs (3-35528, 3-34742, and 3-30620) related to construction activities undertaken at the Site.

2.2. Soil Management

The MBTA and GLXC constructed the GLX Project with a combination of a Utility-related Abatement Measure (URAM) and Release Abatement Measures (RAMs) between 2019 and 2024. Approximately 1,950 cubic yards were initially excavated and managed under a URAM for RTN 3-35528. Additional soil excavation and management was conducted under a RAM Plan for RTN 3-34742 submitted in July 2019.

TRC Environmental of Lowell, Massachusetts, on behalf of GLXC, filed nine RAM Status Reports between November 2019 and November 2023 and a RAM Completion Report in May 2024. Approximately 18,000 cubic yards of soil was disposed of off-site.

In addition to the soil managed under RTNs 3-35528 and 3-34742, approximately 5,440 cubic yards of soil were excavated from within the Site boundary as part of GLX Project activities conducted under the Special Projects Designation (SPD) for RTN 3-30620.

2.3. Construction Dewatering

Construction dewatering, groundwater treatment and discharge activities were conducted as part of the RAM. Construction dewatering, generally in Washington Street, and groundwater treatment including with granular activated carbon management was conducted between April 2019 and September 2020. More than 8 million gallons of groundwater were pumped and the PCE concentration in the dewatering influent ranged 410 to 1,660 ug/L. The dewatering effluent was treated then discharged to the Millers River through a storm drain.

3. Current Conceptual Site Model and Disposal Site Boundary

As defined in the MCP, the Conceptual Site Model (CSM) is a "dynamic framework for assessing site characteristics and risk, identifying and addressing data gaps and managing uncertainty, eliminating or controlling contaminant sources, developing and conducting response action strategies, and evaluating whether those strategies have been effective in achieving desired endpoints." (310 CMR 40.0006). GEI has developed and continued to update the CSM for the Site as appropriate based upon the investigation data documented in previous reports, including the Phase II CSA, IRA Plan and Status Reports, the Phase IV RIP, and prior Phase V ROS Status Reports. In 2014, in Phase V Status Report No. 6, GEI updated the CSM and Disposal Site Boundary to include groundwater data collected by the MBTA. In Phase V Status Report No. 17, GEI updated the CSM and Disposal Site Boundary to include a portion of the MBTA ROW near Cross Street where de minimis PCE concentrations were detected in soil samples collected for construction purposes. The current Site Boundary is shown on Fig. 3-1.

As required by the MassDEP NOAF/NON, the Phase II CSA Addendum will update the CSM, and site boundary based on the nature and extent of contamination. Site CSM will be updated.

4. Subsurface Investigation

As required by the MassDEP NOAF/NON, GEI conducted additional subsurface investigations to assess the shallow and deep bedrock conditions at the disposal site.

4.1. Boring and Monitoring Well Installation

4.1.1. Borings – September to October, December 2025

Between September 29, 2025, and October 24, 2025, GEI observed Northern Drill Services, Inc. (NDS) of Northborough, Massachusetts advance seven borings (B401D/S, B402 through B406). On December 29, 2025, GEI observed NDS advance one boring (B407), which originally could not be completed due to access issues. All the borings were vacuum excavated to a depth of approximately 5 feet. Following vacuum excavation, NDS advanced borings using drive and wash drilling techniques or using a Geoprobe and direct push methods. Borings B401D/S, and B402 through B404 were installed using drive and wash drilling techniques, and borings B405 through B407 were installed using direct push techniques. Borings were advanced to depths ranging from 14 to 90 feet below ground surface. Boring B406 encountered refusal at 14 feet. Boring B407 encountered refusal at 18 feet, and the casing encountered refusal at 14.6 feet. Boring information is summarized in Table 4-1. The locations of the borings are on Fig. 4-1.

Soil samples were continuously logged (lithology and physical observations) in accordance with the USCS guidelines. Field screening for VOCs in the jar headspace for soil samples was performed with a PID equipped with a 10.6 eV lamp. PID field screening results are summarized on the boring logs in Appendix C. Jar headspace screening results ranged from 0.0 ppm to 106.8ppm. All drill cuttings and drill water were contained in 55-gallon drums and stored on-site at 50 Tufts Street.

4.1.2. Soil Sampling

In borings B403 and B404, GEI performed oil-in-soil tests in the field to evaluate the presence of DNAPL; none of the tests indicated DNAPL in the overburden. Additionally, for B403 and B404, GEI collected three samples for laboratory analysis from the fill, water table, and overburden-bedrock interface intervals. Laboratory samples were submitted to Pace Analytical Services LLC, of Westborough, MA (Pace) for analysis of VOCs, and the results are summarized in Table 4-2. The associated lab reports are in Appendix D. Results for PCE by depth are in Fig. 4.2; the results are being evaluated as part of a larger MNA evaluation and will be discussed further in the Phase II CSA Addendum.

4.1.3. Borehole Geophysics Testing

Prior to well installation, in B403 and MW404, GEI observed Hager Richter Geoscience (HRGS) perform borehole geophysics testing which included Fluid Temperature and Fluid Conductivity/Resistivity, Optical Televiewer (OTV), Acoustic Televiewer (ATV), Caliper, Heat Pulse Flow Meter (HPFM) under ambient conditions and under pumping conditions. Draft geophysics logs were reviewed during boring and well installation to determine the well screen intervals for the deep bedrock monitoring wells. The results of the geophysics testing indicated that productive fractures were uncommon in the deep bedrock. The final geophysics logs are pending and will be included in the next Status Report.

4.1.4. Monitoring Well Installation

The eight soil borings (B401D/S, B402 through B407) were completed as 2-inch diameter polyvinyl chloride (PVC) monitoring wells (MW401D/S, MW402 through MW407). The monitoring well locations are shown on Fig. 4-1, and the well installation logs are in Appendix C. The monitoring well screen interval for each well is in Table 4-1. The wells were finished with a steel road box mounted flush with the ground surface and surrounded by a concrete pad.

Between October 24, 2025, and October 29, 2025, GEI developed monitoring wells MW401D/S and MW402 through MW406 by purging 10 well volumes of groundwater from each location. On December 30, 2025, GEI developed monitoring well MW407 by purging the well. During development, the monitoring well went dry. The well was allowed to recharge, and purged again, until sediment-free water was observed. Water purged from the monitoring wells was contained in 55-gallon steel drums and stored at 50 Tufts Street pending offsite disposal.

4.2. Groundwater Sampling

GEI conducted site wide gauging and collected groundwater samples from 41 monitoring wells in November 2025. GEI measured groundwater levels at monitoring wells shown in Table 4-3. This included the 34 monitoring wells sampled in March and April 2025 (described in Phase V Status Report No. 28 and RMR No. 43), and the seven monitoring wells installed in October 2025 (MW401S, MW401D, MW402 through MW406). Monitoring well locations and the monitoring wells sampled by GEI during this reporting period are shown in Fig. 4-1.

On January 7, 2026, GEI collected a groundwater sample from monitoring well MW407. An additional groundwater sample was also collected from MW122 at this time to supplement the investigation at this location because for the first time in more than a decade this location was sampled using EPA low-flow sampling methods. Historically, a grab sample was collected because the monitoring well drawdown exceeded the low-flow sampling guidance threshold. However, for the past two sampling events, drawdown within the monitoring well was minimal and a representative sample was able to be collected. Utility upgrades conducted in Franklin Street during September 2025 may have improved hydraulic conductivity and flow pathways of the overburden groundwater in the vicinity of MW122.

The groundwater samples were submitted to Pace for analysis of VOCs. Select groundwater samples were also submitted for chemical testing of MNA parameters. A summary of all GEI groundwater sampling activities at the Site, including dates of sampling during this reporting period, is in Table 4-4. The groundwater testing results are summarized in Table 4-5, along with groundwater data from previous investigations. The laboratory data reports associated with the November 2025 and January 2026 groundwater testing are in Appendix D.

Groundwater sampling conducted on behalf of the MBTA between 2012 and 2014 by Kleinfelder, and in 2020 by TRC, as part of the GLX Project is summarized in Table 4-6. Results from the groundwater sampling event are being evaluated as part of a larger MNA evaluation and will be discussed further in the Phase II CSA Addendum.

4.3. Drum Sampling

On November 6, 2025, GEI sampled the drummed drill cuttings and drill water/development water stored at 50 Tufts Street. Three soil samples were collected from the drummed drill cuttings and submitted to Pace for analysis of VOCs, flashpoint, and corrosivity. Four samples were collected from the drummed drill water/development water and submitted to Pace for analysis of VOCs and flashpoint. The laboratory data reports associated with the drum sampling are in Appendix D.

A total of 6 drill cutting drums and 14 drill water/development water drums remain stored at 50 Tufts Street pending offsite disposal.

4.4. Management of Waste Materials

On July 2, 2025, a total of 8 55-gallon drums were shipped off site for disposal under a uniform hazardous waste manifest to Cycle Chem, Inc. of Lewisberry, Pennsylvania. The drums contained investigation-derived waste (soil and groundwater) from previous subsurface investigations. The disposal documentation is in Appendix E.

4.5. Hydraulic Flow Data Loggers

GEI installed vented Level TROLL 500 Data Loggers in MW104R on December 27, 2023, and MW203R and SH-MW2R on April 12, 2024. GEI installed well MW104R in May 2022. The data loggers were installed to evaluate long term groundwater flow trends in this portion of the Site, which was heavily influenced by the GLX construction. GEI has downloaded the data approximately every four weeks and will continue to monitor groundwater elevations monthly. Between April 21 and May 7, 2024, the transducer in MW203R was above the height of the groundwater table; when GEI collected data on May 7, the transducer was lowered in the well. Between August 1 and 4, 2024, the transducer in MW203R was above the height of the groundwater table; however, it could not be lowered further into the well. Hydrographs for the three monitoring wells are included in Appendix F.

4.6. Further Phase V Activities

4.6.1. Groundwater Sampling

GEI is planning to conduct additional site wide groundwater sampling in the winter/spring of 2026. We will collect groundwater samples from 42 monitoring wells (from the 41 monitoring wells sampled in November 2025, and from the newly installed MW407) and each will be sampled for VOCs. Groundwater and QA/QC samples will be submitted to Pace chemical testing of VOCs.

5. Indoor Air and Soil Vapor Sampling

5.1. Soil Vapor Sampling

From January 2006 through December 15, 2025, GEI collected soil vapor samples at 59 residences and commercial buildings. Fig. 5-1 shows buildings where GEI conducted soil vapor sampling. The procedure for collecting soil vapor samples was in IRA Status Report No. 3. Samples typically were collected from below the basement slab.

During this reporting period, GEI collected sub-slab samples from the properties below:

Property	Date Sampled	Table	Purpose
11 Morton Street	July 16, 2025 August 21, 2025 August 29, 2025 December 19, 2025	5-1	EPMM Effectiveness
60 Tufts Street (Unit #1)	October 1, 2025	5-2	Closure without EPMM
60 Tufts Street (Unit #4)	October 1, 2025	5-3	Closure without EPMM
60 Tufts Street (Common Spaces)	October 1, 2025	5-4	Closure without EPMM
121 Washington Street	December 12, 2025	5-5	RAM Objective
34 Knowlton Street	December 19, 2025	5-6	EPMM Effectiveness

The sub-slab soil vapor samples were submitted to Pace for laboratory analysis by EPA Method TO-15 with the following modified list of analytes:

- 1,1-Dichloroethane
- 1,1-Dichloroethylene (1,1-DCE)
- trans-1,2-Dichloroethylene (trans-1,2-DCE)
- cis-1,2-Dichloroethylene (cis-1,2-DCE)
- 1,1,1-Trichloroethane (TCA)
- 1,1,2,2-Tetrachloroethane
- 1,1,2-Trichloroethane
- Tetrachloroethylene (PCE)
- Trichloroethylene (TCE)
- Vinyl Chloride

The soil vapor sampling results are summarized on Table 5-1 through 5-6 and the laboratory data reports are in Appendix D.

5.1.1. Soil Vapor Sampling – Checklists and Methods

Sub-slab soil vapor samples were collected to evaluate the concentrations of chlorinated VOCs in soil vapor beneath the buildings. GEI collected soil vapor samples using SUMMA® canisters and regulators provided by Pace. Each canister was certified clean by the laboratory. Copies of the certifications are in Appendix D. The soil vapor samples were collected over a 1-hour period.

Flow regulators were attached to the SUMMA® canisters at the location of the testing. The laboratory-set flow regulator was then turned on, and the starting pressure and time recorded. The regulator was turned off before reaching ambient pressure, and the final pressure and time were recorded.

Sub-Slab Monitoring Point Installation Logs, Pre-Sampling Checklists, and Sub-Slab Sampling Checklists completed for the sub-slab soil vapor samples collected during this reporting period are in Appendix G.

5.1.2. 11 Morton Street

On July 16, 2025, GEI installed two sub slab soil gas monitoring points (SV1 and SV2) using Mini Vapor Pin® sampling devices in the concrete slab in the unfinished portion of the basement. Two sub-slab soil gas samples were then collected from the newly installed monitoring points. GEI collected two soil vapor samples from beneath the building slab on July 16, 2025, August 21, 2025, August 29, 2025, and December 19, 2025, from these points.

Concentrations of PCE, TCE, and TCA were detected above laboratory reporting limits but below the applicable residential sub slab soil gas Screening Values (SSGSV) in all samples. Concentrations of vinyl chloride were also detected above laboratory reporting limits but below the applicable residential SSGSV in the July 2025 samples.

5.1.3. 60 Tufts Street

On October 1, 2025, six soil vapor samples from previously installed sub-slab monitoring points were collected from beneath the building slab. One sample was collected within Unit #1, one sample from Unit #4, and four samples from common space areas. At least one week prior to collecting the soil vapor samples the venting system fan was turned off and the vent was closed to simulate conditions in the absence of active or passive venting.

Concentrations of 1,1-Dichloroethane (1,1-DCA), 1,1-DCE, trans-1,2-DCE, and TCE were detected above laboratory reporting limits but below applicable residential SSGSV in Unit #1, while PCE and TCA were detected above the applicable residential SSGSV in Unit #1.

Concentrations of PCE, TCE, and TCA were detected above laboratory reporting limits but below applicable residential SSGSV in Unit #4.

Concentrations of 1,1-DCA and cis-1,2-DCE were detected above laboratory reporting limits but below applicable residential SSGSV in at least one sample from the common spaces, while 1,1-DCE, PCE, TCA, and TCE were detected above the applicable residential SSGSV in at least one sample from the common spaces.

An additional round of soil vapor sampling from the same six monitoring points was conducted on January 8, 2026, with the system fan not operating and the vents closed. The results of the sampling are pending and will be included in a future submittal.

5.1.4. 121 Washington Street

On December 12, 2025, GEI installed two sub-slab monitoring points using Vapor Pin® sampling devices on the first floor (slab-on-grade). Two sub-slab soil gas samples were then collected from the newly installed monitoring points. Concentrations of PCE, TCE, and TCA were detected above laboratory reporting limits but below applicable residential SSGSV in at least one sample.

5.1.5. 34 Knowlton Street

On December 19, 2025, one soil vapor sample was collected from the sample port installed on the riser pipe of the sub-slab passive venting system. A sample was collected from the riser pipe and not from a sub-slab monitoring point because the homeowner did not agree to have a sub-slab monitoring point installed. Concentrations of PCE and trans-1,2-DCE were detected above laboratory reporting limits but below applicable residential SSGSV in the sample.

5.2. Indoor Air Sampling

From January 2006 through December 15, 2025, GEI collected indoor air samples at 76 residences and commercial buildings. Fig. 5-1 shows buildings where GEI conducted indoor air sampling. The procedure for collecting indoor air samples was included in IRA Status Report No. 3. Samples are typically collected from the basement and first floor of each building.

In the NOAF/NON, MassDEP required 2 rounds of indoor air sampling at 9 properties where passive EPMMs have been installed (91 and 93 Franklin Street; 166-168 Glen Street, 17, 32, and 34 Knowlton Street; 4, 11, and 19-19A Morton Street).[2] During the previous reporting period, we obtained access to 7 of the 8 properties to conduct the first round of sampling; however, we could not obtain access to 4 Morton Street. During the current reporting period, we obtained access to 5 of the 8 properties for a second round of sampling. We could not obtain access to 17 Knowlton Street, 166-168 Glen Street, or 4 Morton Street; we will continue to attempt to gain access to these properties during the 2026 heating season.

The NOAF/NON also required indoor air testing at seven properties within the Site boundaries for which owners historically refused mitigation systems, The seven properties identified: 99 Franklin Street, 162-164 Glenn Street, 9 Tufts Street, 11-13 Tufts Street, 17 Tufts Street, 19 Tufts Street, and 25 Tufts Street. We have reached out to the properties owners to arrange access for indoor air testing. To date we have obtained access at 19 Tufts Street, 11-13 Tufts Street and 162-164 Glen Street and will be conducting indoor air testing in January 2026. We are continuing to attempt to obtain access at the other properties.

During this reporting period, GEI collected indoor air samples from the properties listed in the table below:

Property	Date(s) Sampled	Table	EPMM	Purpose	Requested by MassDEP	Condition of NSR
11 Morton Street	July 16, 2025 August 21, 2025 August 29, 2025 December 19, 2025	5-7	Passive	Investigation Investigation Investigation EPMM Effectiveness	yes	Yes
60 Tufts Street Unit #1	October 1, 2025	5-8	Active	Closure without EPMM	--	Yes
60 Tufts Street Unit #4	October 1, 2025	5-9	Active	Closure without EPMM	--	Yes
60 Tufts Street Common Spaces	October 1, 2025	5-10	Active	Closure without EPMM	--	Yes

[2] This should have been identified as 8 buildings, not 9, because 91 and 93 Franklin Street are a single building.

Property	Date(s) Sampled	Table	EPMM	Purpose	Requested by MassDEP	Condition of NSR
19-19A Morton Street	December 19, 2025	5-11	Passive	EPMM Effectiveness	yes	Yes
91-93 Franklin Street	December 19, 2025	5-12	Passive	EPMM Effectiveness	yes	Yes
32 Knowlton Street	December 19, 2025	5-13	Passive	EPMM Effectiveness	yes	Yes
34 Knowlton Street	December 19, 2025	5-14	Passive	EPMM Effectiveness	yes	Yes

The indoor air samples were submitted to Pace for laboratory analysis by EPA Method TO-15 with the following modified list of analytes:

- 1,1-Dichloroethane
- 1,1-Dichloroethylene (1,1-DCE)
- trans-1,2-Dichloroethylene (trans-1,2-DCE)
- cis-1,2-Dichloroethylene (cis-1,2-DCE)
- 1,1,1-Trichloroethane (TCA)
- 1,1,2,2-Tetrachloroethane
- 1,1,2-Trichloroethane
- Tetrachloroethylene (PCE)
- Trichloroethylene (TCE)
- Vinyl Chloride

The indoor air sampling results are summarized in Table 5-7 through 5-14 and the laboratory data reports are in Appendix D.

5.2.1. Indoor Air Sampling – Checklists and Methods

The indoor air samples were collected to evaluate if there was likely a complete vapor intrusion pathway in the buildings' occupied space. The samples were collected using SUMMA® canisters and regulators provided by Pace. Each canister was certified clean by the laboratory. Copies of the certifications are in Appendix D. The indoor air samples were collected over an approximately 24-hour period.

Flow regulators were attached to the SUMMA® canisters at the location of the testing. The SUMMA® canisters were placed so that the air inlet was approximately 3 to 5 feet above the floor. The laboratory-set flow regulator was then turned on, and the starting pressure and time were recorded. The regulator was turned off before reaching ambient pressure, and the final pressure and time were recorded. Pre-Sampling Checklists and Indoor Air Sampling Checklists completed for each indoor air sample collected during this reporting period are in Appendix G.

5.2.2. 11 Morton Street

5.2.2.1. Potential Imminent Hazard Notification

GEI conducted indoor air sampling at 11 Morton Street in April, May, and July 2025, as well as sub-slab soil gas sampling in July 2025, in response to the NOAF/NON. TCE was detected in the indoor air on the first floor during each sampling event (April [1.05 µg/m³], May [2.77 µg/m³] and July [8.65 µg/m³]. The July result exceeded the Imminent Hazard (IH) threshold. Although it was believed that the TCE was not associated with the 50 Tufts Street disposal site, GEI reported the potential IH to MassDEP on July 28, 2025; MassDEP assigned RTN 3-52237 to the release. GEI installed air purifying units as a precaution while investigating possible sources. The APUs were installed on the first floor and in the finished portion of the basement on July 29, 2025, and August 6, 2025, respectively. A copy of the original Release Notification Form is in Appendix H.

GEI identified various art supplies and cleaning products, including spray fixatives known to potentially contain TCE, during a chemical inventory at 11 Morton Street. To minimize confounding sources of TCE in indoor air testing, on July 31, 2025, these materials were temporarily removed from the residence and stored outdoors in sealed containers before further sampling.

5.2.2.2. Indoor Air Testing – August 2025

On August 21, 2025, after removal of the suspect painting products and supplies, while the APUs were running, one indoor air sample was collected on the first floor, and two indoor air samples were collected in the basement (one in the finished portion and one in the unfinished portion). TCE was detected in indoor air at a concentration of 0.989 µg/m^3 on the first floor, 0.215 µg/m^3 in the basement's finished side and 0.124 µg/m^3 on the unfinished side. No other chlorinated VOCs were detected above laboratory reporting limits.

On August 29, 2025, after the APUs had been shut off for at least one week, one indoor air sample was collected on the first floor, and two from the basement (one each from the finished and unfinished areas). TCE was detected at a concentration of 6.56 µg/m^3 on the first floor, 4.11 µg/m^3 in the basement's finished side and 1.21 µg/m^3 on the unfinished side. PCE was not detected above laboratory limits in any samples. Trans-1,2-DCE was detected above laboratory reporting limits on the basement's finished side.

5.2.2.3. Notification Retraction –September 2025

GEI retracted the retract the IH notification made by the UniFirst Corporation regarding 11 Morton Street in a submittal on September 24, 2025. The retraction was submitted because additional information was obtained that substantiates that a Site-related release, as defined by the MCP, did not actually occur. The additional information included indoor air and sub-slab soil vapor testing (Section 5.1.2.1), confounding sources linked to the art supplies in the residence and Draeger-Tube® testing of the supplies, a vapor mitigation system, TCE concentration gradients and historical TCE concentrations at the property. A copy of the Notification Retraction letter for RTN 3-52237 is in Appendix H.

5.2.2.4. Indoor Air Sampling – December 2025

In accordance with the NOAF/NON sampling requirements, indoor air samples were collected during the heating season on December 19, 2025. The APUs were not running. One indoor air sample was collected on the first floor, and two from the basement (one each from the finished and unfinished areas). Concentrations of TCE were detected above laboratory reporting limits on limits on both the first floor and the finished side of the basement; however, since professional art supplies remain stored in the home, these TCE detections are attributed to other sources and are not associated with the disposal site. PCE was also detected above laboratory reporting limits in the basement's finished side, but at a concentration that poses a condition of NSR. No chlorinated VOCs were detected above laboratory reporting limits in the basement's unfinished side.

5.2.3. 60 Tufts Street

On October 1, 2025, seven indoor air samples were collected from the 60 Tufts Street building. One sample was collected from Unit #1 (which is located on the lowest floor), two samples from Unit #4 (one from the upper portion of the Unit, and one from the basement), and four samples from the lowest floor/basement common spaces. At least one week prior to collecting the soil vapor samples the venting system fan was turned off and the vent was closed to simulate conditions in the absence of active or passive venting.

- Concentrations of PCE, TCA, and TCE were detected above laboratory reporting limits in Unit #1.
- Concentrations of PCE were detected above laboratory reporting limits in both samples Unit #4. Concentrations of TCA were detected above laboratory reporting limits in the upper floor of Unit #4.
- Concentrations of PCE, TCA, and TCE were detected above laboratory reporting limits in two of the four samples collected in the common spaces.

The concentrations of the chlorinated VOCs in Unit #1, Unit #4, and in the common spaces pose a condition of NSR.

An additional round of indoor air sampling from the same seven locations was conducted on January 8, 2026, with the system fan not operating and the vents closed. The results of the sampling are pending and will be included in a future submittal.

5.2.4. 91-93 Franklin Street

In accordance with the NOAF/NON sampling requirements, a second round of indoor air sampling was conducted during the heating season on December 19, 2025. One indoor air sample was collected in the basement, and two samples on the first floor, one in each of the units (91 Franklin Street and 93 Franklin Street). Concentrations of PCE were detected above the laboratory reporting limits in all three samples, but at a concentration that poses a condition of NSR. No other chlorinated VOCs were detected above laboratory reporting limits.

5.2.5. 32 Knowlton Street

In accordance with the NOAF/NON sampling requirements, a second round of indoor air sampling was conducted during the heating season on December 19, 2025. One indoor air sample was collected from the basement and the first floor. PCE was detected at the reporting limit in the basement sample. No other chlorinated VOCs were detected above laboratory reporting limits. Therefore, the concentrations of chlorinated VOCs pose a condition of NSR.

5.2.6. 34 Knowlton Street

In accordance with the NOAF/NON sampling requirements, a second round of indoor air sampling was conducted during the heating season on December 19, 2025. One indoor air sample was collected from the basement and the first floor. Concentrations of trans-1,2-DCE were detected above the reporting

limit in both samples, but at concentrations that pose a condition of NSR. No other chlorinated VOCs were detected above laboratory reporting limits.

5.2.7. 19-19A Morton Street

In accordance with the NOAF/NON sampling requirements, a second round of indoor air sampling was conducted during the heating season on December 19, 2025. One indoor air sample was collected from the basement and the first floor. Chlorinated VOCs were not detected above laboratory reporting limits in either sample. Therefore, the concentrations of chlorinated VOCs pose a condition of NSR.

5.3. Meteorological Conditions

Measurements were taken with a portable barometer and thermometer during soil vapor sampling at and were recorded on the Indoor Air and Sub-Slab Sampling Checklists (Appendix G). Meteorological conditions recorded during indoor air sampling events for this reporting period are summarized in Table 5-15.

6. Capuano Center

6.1. Background

The mitigation system at the Capuano Center is an SSDS with 18 sub-slab extraction points in six classrooms of the east wing. The interior slab/exterior wall joints of the six classrooms were sealed with a flexible epoxy sealant and extraction points were installed horizontally through the exterior wall. GEI began operating the SSDS on February 1, 2007.

The system sub-slab vapor extraction points are attached to three collection headers in exterior underground trenches, which are connected to three dedicated discharge pipes with radon fans for each collection header above the roofline of the Capuano Center. Remote telemetry on the system consists of two radio nodes and three pressure switches connected to the three radon fans to send notification of a system shut down remotely to the wireless remote monitoring hub located at the Property.

The system does not include off-gas treatment. Based upon the measured flow rate and VOC concentrations, the annual discharge rate of VOCs from the system has been significantly less than 100 lbs per year; therefore, off-gas treatment is not required per MassDEP Policy No. WSC-25-150: "Off-gas Treatment of Point-Source Remedial Air Emissions," revised July 28, 2025.

6.2. Remedial Objectives

The design objectives of the Capuano Center mitigation system were to:

- Eliminate or mitigate, to the extent feasible, the potential soil vapor migration pathway to indoor air.
- Achieve a condition of NSR for occupants of the Capuano Center.

The SSDS monitoring data show that the sub-slab vacuum field generated by the SSDS influences the southern portion of the east wing. In conjunction with the physical sealing of the slab/wall joint, this indicates the soil vapor migration pathway to indoor air is controlled by the system.

6.3. Inspection and Monitoring

The system has been monitored in accordance with the requirements and schedule in the Phase IV RIP, and in accordance with the requirements and schedule presented in subsequent Phase IV Status Reports, and the Phase IV FIR/Phase V ROS.

Monitoring of the system was historically performed monthly; however, once telemetry was installed on the system, GEI began performing quarterly monitoring in July 2015. Monitoring of system parameters at the headers (flow rate, vacuum, and photoionization detector [PID] readings) and PID readings at outdoor monitoring points are conducted quarterly. Inspection and monitoring at the Capuano Center were performed twice from June 2025 to December 2025. A summary of monitoring activities conducted during this reporting period is in Table 6-1 and the Field Monitoring Forms are in Appendix I.

6.4. System Modifications

No system modifications were made during the reporting period.

6.5. Performance Efficiency and Effectiveness

GEI has completed 24 rounds of indoor air sampling in the Capuano Center. The results of each round of sampling show that the system is meeting remedial design objectives (Table 6-2). Based on the indoor air testing results, and regularly collected system performance data, the soil vapor migration pathway to indoor air has been eliminated and a condition of NSR has been achieved for occupants of the Capuano Center. GEI has discontinued indoor air sampling and relies on monitoring of operating parameters for the system to confirm continued effectiveness.

6.6. Management of Waste Materials

No waste materials were managed at the Capuano Center during this reporting period.

6.7. Future Phase V Activities

Based on indoor air testing results, a condition of NSR has been achieved for occupants of the Capuano Center and the system is achieving the remedial design objectives. Since remote telemetry is now installed on the system, GEI will continue to monitor operational parameters and sub-slab conditions for the system (e.g., flow rate, vacuum), and collect readings from all outdoor monitoring points quarterly, to confirm ongoing system performance. GEI discontinued monitoring at interior monitoring points in April 2016 and instead relies on vacuum monitoring at exterior monitoring points to evaluate system effectiveness. During monitoring events, GEI will also perform maintenance tasks, which may include draining accumulated water from the collection headers and correcting any issues observed during routine inspection of system components.

6.7.1. Longest Allowable Duration of AEPMM Shutdown

An operating regime and OMM plan for the Capuano Center AEPMM were included in the Phase IV FIR/Phase V ROS submitted on August 4, 2011. In accordance with the MCP (310 CMR 40.1026[3][e]), and as presented in Status Report No. 7 and RMR No. 22, the longest duration of a shutdown that would be consistent with a level of exposure that does not pose an IH and that poses NSR is 6 years for the Capuano Center system.

6.7.2. Regulatory Closure

A Permanent Solution with Conditions can be achieved for properties where an AEPMM has achieved the remedial objectives, an AUL has been recorded for the property, and telemetry is installed. A Partial Permanent Solution with Conditions Statement may be submitted to achieve regulatory closure for the Capuano Center if the owner of the property, the City of Somerville, executes an AUL.

7. Residential and Commercial Properties

7.1. 103 and 105 Washington Street

The properties at 103 and 105 Washington Street have been redeveloped into mixed-use commercial and residential buildings by the same entity without the installation of an EPMM and GEI has been evaluating the likelihood of a complete vapor intrusion pathway.

7.1.1. 103 Washington Street

The building at 103 Washington Street, formerly an automobile repair shop, was demolished around March 2019. The former AEPMM was deactivated in May 2017 when the building was vacated. 103 Washington Street has been redeveloped as a mixed-use development with commercial space and open-air parking on the first floor and residential units above. GEI reached out numerous times to the developer regarding installing a vapor mitigation system at 103 Washington Street. The developer did not agree to installation of a system, although they did consent to soil gas and indoor air testing. As of February 2024, construction was complete, and the building occupied. GEI has conducted indoor air and sub-slab soil vapor sampling in May 2023, July 2023, March 2024, December 2024, and February 2025. Based on the results of the sampling and a Method 3 Risk Characterization, GEI prepared and submitted to MassDEP a Partial Permanent Solution with No Conditions Statement in June 2025.

7.1.2. 105 Washington Street

The building at 105 Washington Street, formerly a multi-family house, was demolished between March and June 2019 and construction on the development began in July 2019. As of June 2022, construction was completed, and the building is occupied. 105 Washington Street is a mixed-use development with commercial space and open-air parking on the first floor and residential units above. GEI has conducted indoor air and sub-slab soil vapor sampling in August 2021, March 2022, February 2023, May 2023, December 2024, and February 2025. Based on the results of the sampling, GEI will prepare a Partial Permanent Solution Statement for the Property.

7.2. EPMM Status

Through December 15, 2025, EPMMs have been installed at 24 residential and commercial properties. Currently EPMMs are relied upon to meet the remedial objectives at 20 properties and are not being relied on at the following:

- The EPMM at 103 Washington Street, as discussed in Section 7.1.1, was abandoned when the building was vacated and then demolished as part of redevelopment. The redevelopment of the mixed-use building at 103 Washington Street did not include an EPMM because the new owner declined offers to include one.
- An EPMM was installed at 163 Glen Street when the former American Legion Post building was redeveloped as multi-family housing. It was later demonstrated that the EPMM was not required based on sub-slab soil gas sampling results that were below residential SSGSV.

- The EPMM at 10 Morton Street was temporarily removed during building renovation activities. A new EPMM has since been installed, as discussed in Section 7.5.1.1.
- An EPMM has been installed at 121 Washington Street, a new mixed-use building with retail space on the ground floor and residences above, although interior building construction is still ongoing, as discussed in Section 7.5.1.3.

Fig. 7-1 shows the buildings with EPMMs installed. Table 7-1 presents the as-built design information for each installed EPMM. EPMMs were also installed at 50 Tufts Street, 60 Tufts Street, and the Capuano Center. The EPMMs at 50 Tufts Street, 60 Tufts Street, and the Capuano Center are discussed separately in this report.

The EPMM designs are categorized as Option 1, Option 2, Option 3, or Option 4, as conceptually defined below:

- Option 1 – SSDS: This option includes the installation of one or more sub-slab vapor extraction points and a collection piping network connected to an electric fan located outside the building envelope. The fan is equipped with a condensate bypass drain and the fan exhaust is discharged above the eave line of the roof. To date, no SSDSs (except for the system at the Property) require off-gas treatment. This option is installed in buildings with adequate sub-slab air flow and a competent concrete slab, or those properties where vapor barrier and venting systems are infeasible.
- Option 2 – Vapor Trench: The vapor trench option is a sub-slab venting system installed in a shallow trench around the interior basement perimeter, cement stucco applied to the walls, and an epoxy vapor barrier applied to the slab and stucco walls. The trench is backfilled with crushed stone and finished with approximately three inches of new concrete to meet the existing slab surface. This option is installed in buildings with poor sub-slab air flow, a competent concrete slab, and a fieldstone and/or brick foundation. Sub-slab vapors are vented through a piping network that exits the building envelope at the sill elevation and terminates above the eave line of the roof.
- Option 3 – New Slab: The new slab installation option is a new concrete slab, a sub-slab vapor barrier, and a floor venting system; applying cement stucco to the walls; and applying an epoxy vapor barrier to the new slab and stucco walls. This option is installed in buildings with poor sub-slab air flow, an incompetent concrete slab, and a fieldstone and/or brick foundation. As with Option 2, sub-slab vapors are vented through a piping network that exits the building envelope at the sill elevation and terminates above the eave line of the roof.
- Option 4 – Passive Vapor Mitigation in New Construction: This option has been installed in new construction of buildings. A sub-slab venting system installed in gravel with riser pipes through the roof, a sub-slab vapor barrier, and new concrete floor. This option can be converted to an active system.

The decision-making process for selecting a conceptual design based on Site-specific conditions is illustrated in Fig. 7-2. Table 7-1 identifies the design option for each EPMM currently installed and the primary engineering components of each.

7.2.1. Remedial Objectives

The design objectives of the EPMMs were to:

- Eliminate or mitigate, to the extent feasible, the potential soil vapor migration pathway to indoor air in residential buildings.
- Achieve a condition of NSR for occupants of the residence or commercial building.

7.3. Option 1 EPMMs (SSDS)

Option 1 EPMMs consist of active sub-slab depressurization achieved by the installation of a radon fan and associated network of piping. Several of the Option 1 EPMMs were originally installed as Option 2 or Option 3 EPMMs; however, the concentrations of PCE measured in the post-installation indoor air did not constitute a condition of NSR, and a fan was installed. Option 1 EPMMs are installed at the following 9 properties:

- 35-37 Knowlton Street
- 31-33 Knowlton Street
- 13 Morton Street
- 18 Morton Street
- 23 Tufts Street
- 95 Franklin Street
- 9 Knowlton Street
- 13 Knowlton Street
- 27 Tufts Street

Prior to the MCP amendments effective June 20, 2014, these properties could not achieve a Permanent Solution because of the operation of an active system. These properties can now achieve regulatory closure with a Partial PSS with Conditions, provided that the property owner executes an AUL. The condition associated with the PSS would be operation and maintenance of the AEPMM in accordance with the AUL.

7.3.1. Operation and Monitoring

To confirm the performance of an EPMM, indoor air samples are collected shortly after installation is complete. As identified in the Phase IV FIR/Phase V ROS for Option 1 EPMMs, following the initial post-installation indoor air sampling, indoor air samples were collected one time per winter for two consecutive years. In accordance with MassDEP guidance, "WSC No. 16-435: Vapor Intrusion Guidance: Site Assessment, Mitigation and Closure," dated October 14, 2016 (2016 VI Guidance), GEI modified the post-installation indoor air sampling for newly installed Option 1 EPMMs to demonstrate effectiveness. Once a pressure differential has been established, one round of indoor air sampling is performed during the heating season. The samples are analyzed for Site-specific chlorinated VOCs. Following one round of indoor air sampling, differential pressure across the slab will be used to demonstrate system effectiveness.

Inspection and monitoring also includes measuring VOCs at sub-slab sampling points with a PID, collecting pressure measurements using a manometer, and inspecting system components. If needed, repairs or modifications will be scheduled.

A summary of OMM activities performed for Option 1 EPMMs during this reporting period is in Table 7-2. During this reporting period GEI conducted EPMM inspections at 13 Morton Street and 18 Morton Street. GEI was unable to coordinate access for the other properties with Option 1 EPMMs during the reporting period. GEI will continue its attempts to obtain access for EPMM inspections at these properties during the next reporting period. The EPMM Inspection Forms are in Appendix J.

7.3.2. EPMM Shutdown

At the request of the property owners at 9 Knowlton Street and 13 Knowlton Street, GEI is evaluating if the operation of the Option 1 EPMMs are required to maintain a condition of NSR.

7.3.2.1. AEPMM Closure Testing at 9 Knowlton Street

On May 11, 2022, a shutdown valve was installed on the SSDS riser pipe at 9 Knowlton Street. To simulate conditions without operation of the AEPMM, the SSDS fan was turned off and the shutdown valve was closed, for six weeks, prior to collecting soil vapor and indoor air samples in June 2022. The SSDS fan was turned off and the shutdown valve was closed, for one week, prior to collecting additional rounds of soil vapor and indoor air samples in January and March 2023.

After the indoor air and soil vapor sampling was completed, the shutdown valve was opened, and GEI requested that the owner reactivate the fan. Based on the results of the Option 1 EPMM closure sampling, GEI will evaluate the need for an AEPMM to achieve a condition of NSR at 9 Knowlton Street based on a Method 3 Risk Characterization.

7.3.2.2. AEPMM Closure Testing at 13 Knowlton Street

On November 1, 2016, a shutdown valve was installed on the SSDS riser pipe at 13 Knowlton Street. To simulate conditions without operation of the AEPMM, the SSDS fan was turned off and the shutdown valve was closed, for one week, prior to collecting soil vapor and indoor air samples in December 2016, February 2018, March and November 2019, and January 2023.

After the indoor air and soil vapor sampling was completed, the shutdown valve was opened, and the fan was reactivated. Based on the results of the Option 1 EPMM closure sampling, GEI will evaluate the need for an AEPMM to achieve a condition of NSR at 13 Knowlton Street based on a Method 3 Risk Characterization.

7.3.3. Longest Allowable Duration of AEPMM Shutdown

An operating regime for residential AEPMMs was included in the Phase IV FIR/Phase V ROS submitted on August 4, 2011, which included an OMM plan for the systems. In accordance with the MCP (310 CMR 40.1026[3][f]), and as presented in Status Report No. 7 and RMR No. 22, the following exposure durations were calculated for Option 1 EPMMs where pre-EPMM indoor air data were available:

- 13 Knowlton Street: 54 years
- 23 Tufts Street: 11 years
- 27 Tufts Street: 25 years
- 31-33 Knowlton Street: 31 years
- 35-37 Knowlton Street: 4 years

Several Option 1 EPMMs were installed based on sub-slab soil vapor results, and pre-EPMM indoor air data are not available (including 13 Morton Street, 18 Morton Street, 95 Franklin Street, and 9 Knowlton Street). However, based on the proximity of the AEPMMs throughout the Site, the shutdown exposure durations calculated for the properties with pre-AEPMM indoor air data are likely representative of the AEPMM properties with no pre-AEPMM indoor air data. Therefore, the longest duration of shutdown that would be consistent with a level of exposure that does not pose an IH and that poses NSR at these properties is likely between 4 and 54 years.

7.3.4. Efficiency and Effectiveness

The remedial objectives of the EPEMs were defined in the Phase IV:

- Eliminate or mitigate, to the extent feasible, the potential soil vapor exposure pathway to indoor air.
- Achieve a condition of NSR for occupants of the residence or commercial building.

Through December 15, 2025, the results of post-EPMM installation indoor air sampling and monitoring indicate that each of the Option 1 EPMMs installed or activated at residential and commercial properties has achieved the remedial objectives.

7.3.5. System Maintenance and Modifications

In October 2025, the radio node was replaced at 35-37 Knowlton Street after building exterior renovations were complete.

GEI has been evaluating the current telemetry system in consideration of the 2024 MCP amendments. The 2024 amendments include continual monitoring of system vacuum. However, GEI understands that properties where telemetry systems are already registered with MassDEP will be grandfathered in (310 CMR 40.1026[3][d][6], effective March 1, 2024), are not required to report system vacuum.

If a property is to be closed with a Partial Permanent Solution with Conditions requiring an AUL, hardware changes at residences will be necessary, including replacing the radio node on the exterior of the house and replacing vacuum pressure switches with vacuum pressure transducers in the basement of each residence. These modifications will require GEI to access the interior of residences. Should this option be selected for closure in the future, GEI will coordinate with property owners at that time to perform the required system modifications.

7.3.6. Management of Waste Materials

No waste materials associated with Option 1 EPMMs were generated during the reporting period.

7.4. Option 2 and 3 EPMMs (Vapor Trench and/or New Slab)

Option 2 and 3 EPMMs consist of passive vapor mitigation and do not require mechanical operation or maintenance. Option 2 or 3 EPMMs have been installed at the following 9 properties:

- 95R Franklin Street (Option 2)
- 12 Morton Street (Option 3)
- 11 Morton Street (Option 2)
- 4 Morton Street (Option 3)
- 91-93 Franklin Street (Option 3)
- 17 Knowlton Street (Option 3)
- 32 Knowlton Street (Option 3)
- 19-19A Morton Street (Option 3)
- 166-168 Glen Street (Option 3)

In accordance with the MCP (310 CMR 40.1000) prior to the June 20, 2014, MCP amendments, regulatory closure was achieved with a Class A-3 Response Action Outcome Partial (RAO-P) Statement for several properties with an Option 2 or 3 EPMM. The properties that have achieved a Class A-3 RAO-P are presented in Fig. 7-3. In the amended MCP, the term "Response Action Outcome" has been replaced with "Permanent or Temporary Solution." Subsequent regulatory closure for individual properties with Option 2 or 3 EPMMs will be achieved with Partial PSSs with Conditions. The condition associated with the PSSs with Conditions will be maintenance of the passive EPMM in accordance with an AUL.

7.4.1. Operation and Monitoring

To confirm the performance of an EPMM, indoor air samples were collected shortly after installation was completed. As identified in the Phase IV FIR/Phase V ROS for Option 2 and 3 EPMMs, following the initial post-installation indoor air sampling, indoor air samples were collected two times per year (including one winter sample) for two consecutive years. Samples were analyzed for Site-specific chlorinated VOCs.

Following the completion of post-installation indoor air sampling, annual inspection is conducted including inspecting system components. If needed, repairs or modifications are scheduled.

A summary of OMM activities performed for Option 2 and 3 EPMMs during this reporting period is in Table 7-2. During this reporting period GEI conducted EPMM inspections at 91-93 Franklin Street, 32 Knowlton Street, 11 Morton Street, 12 Morton Street, and 19-19A Morton Street. GEI was unable to access 17 Knowlton Street, 166-168 Glen Street, 4 Morton Street, and 95R Franklin Street during the reporting period. GEI will continue its attempts to obtain access for EPMM inspections at these properties during the next reporting period. The EPMM Inspection Forms are in Appendix J.

Additionally, GEI collected indoor air samples from Option 2 and Option 3 residences during this reporting period including: 91-93 Franklin Street, 32 Knowlton Street, 11 Morton Street, and 19-19A Morton Street as described in Section 5.2.

7.4.2. Efficiency and Effectiveness

The remedial objectives of the EPEMs were defined the Phase IV:

- Eliminate or mitigate, to the extent feasible, the potential soil vapor exposure pathway to indoor air.
- Achieve a condition of NSR for occupants of the residence or commercial building.

Through December 15, 2025, the results of post-EPMM installation indoor air sampling indicate that the Option 2 or 3 EPMMs currently installed at residential properties have achieved the remedial objectives.

7.4.3. System Maintenance and Modifications

No modifications were made to systems during the reporting period.

7.4.4. Management of Waste Materials

No waste materials associated with Option 2 or 3 EPMMs were generated during the reporting period.

7.5. Option 4 EPMMs (Passive Vapor Mitigation in New Construction)

Option 4 EPMMs consist of passive vapor mitigation installed in renovation or new construction and do not require mechanical operation or maintenance. Option 4 EPMMs have been installed at the following properties:

- 10 Morton Street (previously Option 3)
- 163 Glen Street (demonstrated to be not required)
- 34 Knowlton Street (previously listed under Option 3)
- 31 Tufts Street
- 121 Washington Street

An EPMM was installed at 163 Glen Street when the former American Legion Post building was redeveloped as multifamily housing. It was demonstrated that the EPMM was not required based on sub slab soil gas sampling results that were below residential SSGSV. A PPPS without Conditions was prepared for 163 Glen Street in January 2021.

Regulatory closure for individual properties with Option 4 EPMMs will be achieved with Partial PSS with Conditions. The condition associated with the PSSs with Conditions will be maintenance of the passive EPMM in accordance with an AUL.

7.5.1. Operation and Monitoring

To confirm the performance of an EPMM, indoor air samples are collected shortly after installation is complete. Option 4 EPMMs have been conducted as RAMs, and post-installation indoor air sampling for newly installed Option 4 EPMMs to demonstrate effectiveness has been conducted in accordance with MassDEP 2016 VI Guidance:

- If groundwater concentrations are less than two times the Method 1 GW-2 standard, and sub-slab soil gas concentrations are less than two times soil gas screening values, and indoor air concentrations are less than two times threshold values (TVs), GEI performs 2 rounds of indoor air sampling, with one round occurring during the heating season.
- If groundwater concentrations are greater than two times the Method 1 GW-2 standard, and/or sub-slab soil gas concentrations are greater than two times soil gas screening values, and/or indoor air concentrations are greater than two times TVs, GEI performs quarterly indoor air sampling, with two rounds occurring during the heating season.

Additional indoor air sampling beyond the first year may be performed based on property-specific conditions. Samples will be analyzed for Site-specific chlorinated VOCs. During indoor air sampling, the condition of the EPMM will be inspected and, if needed, repairs or modifications will be scheduled.

Following the completion of post-installation indoor air sampling, annual inspection includes inspecting system components. If needed, repairs or modifications will be scheduled.

A summary of OMM activities performed for Option 4 EPMMs during this reporting period is presented in Table 7-2. During this reporting period GEI conducted EPMM inspections at 34 Knowlton Street. The EPMM Inspections at 10 Morton Street, 31 Tufts Street, and 121 Washington Street will be conducted during the next reporting period. The EPMM Inspection Forms are in Appendix J.

Additionally, GEI conducted indoor air testing at 34 Knowlton Street during this reporting period as described in Section 5.2.

7.5.1.1. 10 Morton Street Renovation

In early 2023, GEI learned that 10 Morton Street had been sold and the new owners planned to renovate the basement. To determine if the existing EPMM beneath the slab was still needed, four soil vapor points were installed and sampled in March and April 2023. GEI submitted a RAM Plan in June 2023 to address the proposed property changes and later modified the plan in November 2023 to include installation of a sub-slab venting system and a vapor barrier as part of the renovations. Post-installation testing is planned to assess the ongoing need for the EPMM and an AUL to maintain a condition of NSR. The RAM Status Reports document details of system installation, testing, and sampling activities.

7.5.1.2. 31 Tufts Street

The property at 31 Tufts Street, formerly a paved parking lot, has been redeveloped as multi-family housing. 31 Tufts Street LLC and Tufts Glen Pocket Park LLC are currently joint owners of the property. MassDEP assigned RTN 3-37468 to the 31 Tufts Street property based on concentrations of polycyclic aromatic hydrocarbons (PAHs) and metals exceeding the applicable MassDEP reportable concentrations in soil (RCS-1) standards. These conditions are not attributable to the 50 Tufts Street Site. GEI submitted a RAM Plan on behalf of the owner for response actions in connection with construction, including soil management and installation of a vapor barrier and a sub-slab ventilation piping network beneath the building. In December 2023, GEI submitted a RAM Completion Report and Permanent Solution Statement for RTN 3-37468.

To date, GEI has conducted four rounds of sub-slab soil vapor and indoor air sampling. We are continuing to conduct sub-slab soil vapor and indoor air testing to evaluate if the EPMM is required.

7.5.1.3. 121 Washington Street

The property at 121 Washington Street is being redeveloped into a mixed used building with commercial space on the first floor and residential apartment units above. The small commercial building on the site was demolished in October 2020. GEI submitted a RAM Plan on behalf of the owner (Wooden Teeth, LLC) in March 2024 which included installing a vapor barrier and sub-slab ventilation system. The EPMM was completed by December 2024 with the system riser piping extending through the roof of the building. As of June 2025, the building envelope is complete and interior work continues. The RAM Status Reports document details of system installation, testing, and sampling activities.

7.5.2. Efficiency and Effectiveness

The remedial objectives of the EPEMs were defined the Phase IV:

- Eliminate or mitigate, to the extent feasible, the potential soil vapor exposure pathway to indoor air.
- Achieve a condition of NSR for occupants of the residence or commercial building.

Through December 15, 2025, the results of post-EPMM installation indoor air sampling indicate that the Option 4 EPMMs currently installed at residential properties have achieved the remedial objectives.

7.5.3. System Maintenance and Modifications

No modifications were made to the systems during the reporting period.

7.5.4. Management of Waste Materials

No waste materials associated with Option 4 EPMMs were generated during the reporting period.

7.6. Activity and Use Limitations

It is anticipated that AULs may be warranted for each property where an EPMM is installed, and where it is determined that the EPMM is necessary long-term. No AULs were recorded during this reporting period.

7.7. Permanent Solution Statements

A condition of NSR has been demonstrated at individual properties based on adequate data collected to reflect temporal variability of contaminant levels in indoor air, sub-slab soil gas and groundwater. These individual properties are eligible for a Partial PSS in accordance with the MCP (310 CMR 40.1000). The filing of a Partial PSS for an individual property documents the achievement of regulatory closure under the MCP for that property. Therefore, the Phase V provisions do not apply to properties for which an RAO-P or Partial PSS has been submitted.

The properties that have achieved a Partial PSS are shown on Fig. 7-3.

7.7.1. Permanent Solution without Conditions

GEI will prepare a Partial PSS without Conditions for residences where multiple lines of evidence have demonstrated the absence of a soil vapor migration pathway to indoor air and an EPMM is not required. GEI will also prepare Partial PSSs for residences where a Method 3 Risk Characterization, based on multiple rounds of sampling, indicated that concentrations of chlorinated VOCs in indoor air constitute NSR under current conditions and sub-slab soil vapor constitute NSR under future conditions. In addition, GEI will prepare a Partial PSS without Conditions for the portion of the Site occupied by public rights-of-way. The properties that have achieved a Partial PSS without Conditions are shown in Fig. 7-3.

7.7.2. Permanent Solution with Conditions

Active operation and maintenance is required for Option 1 EPMMs. Based on the MCP amendments effective June 20, 2014, a PSS with Conditions can be achieved for properties with an Option 1 EPMM. The condition associated with the PSSs with Conditions would be maintenance of the EPMM in accordance with an AUL.

GEI will attempt to record an AUL at each property with an EPMM to maintain the integrity of the EPMM. No new AULs were recorded during the reporting period. After an AUL is recorded, GEI will prepare a Partial PSS with Conditions for residential properties with Option 1, 2 or Option 3 EPMMs where 2 years of post-installation indoor air samples have demonstrated that the EPMM is effective. Following the post-installation indoor air sampling, GEI will continue annual inspections of EPMMs as provided for in the Phase IV RIP. The properties that have achieved a Partial PSS with Conditions are shown in Fig. 7-3. If a property owner does not execute an AUL, inspections will continue as Phase V activities.

7.8. Future Phase V Activities

7.8.1. EPMM Operation and Monitoring

The results of post-EPMM installation indoor air sampling indicate that the Option 1, 2, 3 and 4 EPMMs installed at the Site have achieved the remedial objectives. GEI will continue to conduct annual OMM activities for installed EPMMs where sufficient indoor air sampling has been conducted, but not repeat indoor air testing, unless requested.

GEI has been communicating with property developers for 31 Tufts Street and 121 Washington Street. An EPMM has been installed at 31 Tufts Street and at 121 Washington Street. GEI will plan with the property owners to continue the operation and monitoring program outlined in Section 7.5.

7.8.2. EPMM Modifications

As discussed in Section 7.3, remote telemetry has been installed at each Option 1 EPMM except for 9 Knowlton Street. The owner of 9 Knowlton Street has been unresponsive to telemetry access request letters, telephone calls, and property visits. Therefore, it is currently infeasible to install telemetry at the property.

As discussed in Section 7.5.1, 10 Morton Street is being renovated and installation of the new EPMM in the modification was completed during previous reporting periods.

7.8.3. EPMM Closure Sampling

As discussed in Section 7.3.2, GEI collected indoor air samples from 13 Knowlton Street in February 2018, March 2019, November 2019, and January 2023 and from 9 Knowlton Street in June 2022, January 2023, and March 2023 to demonstrate that the Option 1 EPMM is not required to maintain a condition of NSR.

Based on the results of the Option 1 EPMM closure sampling, GEI will continue to evaluate the need for an AEPMM to achieve a condition of NSR at 9 Knowlton and 13 Knowlton Street.

7.8.4. Installation of New EPMMs

No new EPMMs were installed during the current reporting period.

7.8.5. AULs and Permanent Solutions

If post-installation indoor air sampling at a property demonstrates that an EPMM continues to achieve the remedial objectives, then that property is eligible for a Partial PSS with Conditions.

If feasible, GEI will record AULs for each property where an EPMM is installed, and a Partial PSS with Conditions is to be issued.

Once the AULs are recorded, GEI will prepare a Partial PSS with Conditions for the properties with EPMMs. As discussed in Section 7.7, GEI will prepare Partial PSSs for those properties that did not require mitigation.

7.8.6. Future Residential Monitoring

As discussed in Section 1.4., GEI continues to attempt to contact new property owners in the Tufts Street neighborhood as property ownership turnover occurs. As discussed in the previous status report, GEI conducted indoor air and sub-slab soil vapor sampling at 97 Franklin Street in February 2025; GEI will conduct an additional round of indoor air sampling in the heating season of winter 2025/2026. GEI was able to establish contact with the owner of 84 Franklin Street and collect indoor air samples in May 2025; we will collect another round of indoor air samples in the heating season of winter 2025/2026.

As required by the NOAF/NON, GEI will conduct two rounds of indoor air testing at the following residences where passive EPMMs have been installed: 91 and 93 Franklin Street; 166-168 Glen Street, 17, 32 and 34 Knowlton Street; 4, 11, and 19-19A Morton Street. 91 and 93 Franklin is a single building. As discussed in the previous status report, the first round of indoor air testing was conducted in 7 of the 8 properties between February and April 2025; however, we could not access 4 Morton Street. In December 2025, a second round of indoor air testing was competed for 5 of the 8 properties (91 and 93 Franklin Street, 32 and 34 Knowlton Street, and 11 and 19-19A Morton Street). We will continue to attempt to access the 4 Morton Street property, along with 166-168 Glen Street and 17 Knowlton Street for a second round of indoor air testing.

As required by the NOAF/NON, GEI will attempt to obtain access to the properties where the property owners previously refused UniFirst's offer to install a vapor mitigation system. These seven properties include: 99 Franklin Street, 162-164 Glen Street, 9, 11-13, 17, 19, and 25 Tufts Street. As documented in Appendix B, GEI attempted to contact the owners of these properties via certified mail letters and by visiting the properties in person on December 17, 2025. GEI was able to establish contact with the owners of 162-164 Glen Street and 11-13 and 19 Tufts Street during the reporting period, and scheduling of indoor air sampling is pending. GEI will continue to attempt to access the other properties during the next reporting period.

8. 60 Tufts Street

8.1. Background

60 Tufts Street is a 17-unit condominium building adjacent to the Property, equipped with SSDS for vapor mitigation. The SSDS, operational since 2009, includes 12 vertical sub slab extraction points and 2 horizontal foundation wall extraction points connected to two headers and a 5-horsepower blower with monitoring controls. The system discharges through the parking garage roofline and does not require off-gas treatment, as annual VOC emissions are well below thresholds established by MassDEP Policy No. WSC 25 150, revised July 28, 2025. Remote telemetry, consisting of one radio node and one pressure switch connected to the blower, for system monitoring was added in July 2015, enabling remote shutdown notifications.

8.2. Remedial Objectives

The objectives of the SSDS at 60 Tufts Street is to:

- Eliminate or mitigate, to the extent feasible, the potential soil vapor migration pathway to indoor air.
- Achieve a condition of NSR for occupants of the condominium building.

8.3. Inspection and Monitoring

The system has been monitored in accordance with the requirements and schedule in the Phase IV RIP, and in accordance with the requirements and schedule presented in subsequent Phase IV Status Reports, and the Phase IV FIR/Phase V ROS.

Operational parameters for the system (e.g., flow rate, vacuum) were historically monitored monthly and indoor air quality in Units 1, 4, and 5 and sub-slab conditions were monitored for 2 years following installation of the EPMM. The Phase IV RIP provided for ongoing annual indoor air sampling. However, post-EPMM indoor air sampling and visual inspections confirmed that the EPMM at 60 Tufts Street has been constructed in accordance with the Phase IV RIP and has achieved the remedial design objectives. Accordingly, GEI no longer conducts annual indoor air testing but has continued to monitor operational parameters of the system.

Once remote telemetry was installed on the system in July 2015, GEI began to perform monitoring of system parameters on a quarterly basis. Inspection and monitoring at 60 Tufts Street were performed once from June to December 2025. A summary of monitoring activities conducted during this reporting period is in Table 8-1 and the Field Monitoring Forms are provided in Appendix I.

As discussed further in Section 8.6, inspection and monitoring was only performed once during the current reporting period (in July 2025) as the system was shut off intermittently for maintenance beginning on July 29, 2025.

8.4. Performance Efficiency and Effectiveness

As presented in the Phase IV RIP and Phase IV FIR/Phase V Status reports, the SSDS monitoring data show that the sub-slab vacuum field generated by the SSDS influences nearly the entire floor slab area. Indoor air samples were collected in Units 1, 4, and 5, which are the units closest to the ground floor, for 2 years after EPMM installation. The indoor air testing results indicated that a condition of NSR has been achieved for building occupants at 60 Tufts Street and the soil vapor migration pathway to indoor air has been mitigated to the extent feasible.

8.4.1. AEPMM Closure Testing

On March 20, 2018, a shutdown valve was installed on the SSDS riser pipe at 60 Tufts Street. To simulate conditions without operation of the AEPMM, the SSDS fan was turned off and the shutdown valve was closed for one week beginning on April 17, 2019, prior to collecting soil vapor and indoor air samples. After the indoor air sampling was completed, the shutdown valve was opened, and the blower was reactivated. The results of the indoor air and soil vapor sampling were presented in previous Phase V Status Reports.

8.5. Management of Waste Materials

No waste materials were managed at 60 Tufts Street during this reporting period.

8.6. System Modifications

In June and July 2025, GEI began receiving complaints from tenants about increased noise associated with the SSDS. Additionally, GEI received notifications that the blower had switched off on July 2 and July 26, 2025. During this period, GEI visited the property on multiple occasions to investigate the issue and restart the system. The SSDS fan was operated intermittently beginning on July 29, 2025, typically experiencing issues during periods of above average heat, to address tenant noise complaints while GEI coordinated maintenance. On August 1, 2025, First Electric Motor Services, Inc., of Woburn, Massachusetts (First Electric), inspected the regenerative blower and determined that it needed to be removed for in-shop repairs. On October 16, 2025, First Electric removed the blower and brought it to their repair facility. First Electric reinstalled the blower on December 24, 2025. On January 8, 2026, GEI turned the SSDS back on after completion of additional EPMM closure testing, discussed in Section 5.

Because the SSDS was shut off for more than 30 days during the reporting period, GEI notified MassDEP on November 24, 2025, in accordance with 310 CMR 40.1026(5).

8.7. Future Phase V Activities

The system is achieving the remedial design objectives and OMM activities will continue. To confirm system performance, GEI will continue to monitor operational parameters and sub-slab conditions (e.g., flow rate, vacuum) on a quarterly basis. During monitoring events, GEI will also perform maintenance tasks as needed, which may include documenting that the blower is in operation, draining accumulated water from the moisture separator or collection headers, changing the filter element for the blower, changing the batteries in the auto-dialer, and correcting any issues observed during routine

inspection of system components. GEI will implement any modifications to the telemetry system that may be required.

8.7.1. EPMM Closure Sampling

As described in Section 8.4.1 and in previous status reports, GEI conducted EPMM Shutdown Sampling in 2018 and 2019. Based on pre-EPMM indoor air testing at 60 Tufts Street, and changes to the toxicological characteristics for PCE, the EPMM may not be required to maintain a condition of NSR.

Based on the results of the previous sampling, GEI pursued additional shutdown sampling while the system was offline for maintenance in the current reporting period. With the regenerative blower offline, the shutdown valve was closed for one week beginning on August 28, 2025, prior to collecting soil vapor and indoor air samples. The results of this sampling were discussed in Sections 5.1 and 5.2.

An additional round of indoor air and soil vapor samples were collected between January 7 and 8, 2026, during system shutdown and while the shutdown valve was still closed, prior to restarting the system. As discussed in Sections 5.1 and 5.2, results of this additional round of sampling are pending.

The results of these sampling rounds will be used to evaluate whether the EPMM is required to maintain a condition of NSR.

8.7.2. Longest Allowable Duration of AEPMM Shutdown

An operating regime for the 60 Tufts Street AEPMM was included in the Phase IV FIR/Phase V ROS submitted on August 4, 2011, which included an OMM plan for the system. In accordance with the MCP (310 CMR 40.1026[3][f]), and as presented in Status Report No. 7 and RMR No. 22, the longest duration of a shutdown that would be consistent with a level of exposure that does not pose an IH and that poses NSR is 52 years for the 60 Tufts Street property.

8.7.3. Regulatory Closure

A Permanent Solution with Conditions can be achieved for properties where an AEPMM has achieved the remedial objectives, an AUL has been recorded for the property, and telemetry is installed. A Partial Permanent Solution Statement with Conditions may be submitted to achieve regulatory closure for 60 Tufts Street if the condominium association for the property executes an AUL. Alternatively, if shutdown testing demonstrates that an AEPMM no longer is required to maintain a condition of NSR, then a Partial Permanent Solution may be prepared without an AUL.

9. 50 Tufts Street Property

9.1. Background

The remedial system at the Property was originally designed and constructed as an SSDS that includes 22 sub-slab extraction points inside the building, a 15-horsepower regenerative blower with pressure gauges, controls, and particulate filter, and three 2,000-lb activated carbon absorbers operated in series for off-gas treatment. As part of the SSDS installation, the building slab was sealed to minimize vapor transmission through the slab. The cracks and joints in the building slab were filled with flexible sealant and a two-part epoxy coating was applied to the surface of the slab. GEI began operating the SSDS in April 2007.

In July and August 2007, SVE components were added to the system as part of the CRA to address residual VOCs in soil. The SVE system includes seven SVE points installed below the pavement in the north and south parking lots on the Property. The SSDS and the SVE system rely upon shared equipment, including the piping manifold, blower assembly, and off-gas treatment units. GEI began operating the SVE system on August 2007.

In April 2015, a wireless telemetry hub was installed at the Property. The telemetry hub receives telemetry notification from the other AEPMMs at the Site. A radio node was also installed and connected to monitor the 50 Tufts Street system.

9.2. Remedial Objectives

The design objectives of the combined SSDS/SVE system were to:

- Eliminate or mitigate, to the extent feasible, the soil vapor migration pathway to indoor air.
- Achieve a condition of NSR for a commercial full-time worker.
- Reduce the mass of contaminants in the vadose zone.
- Control the potential migration of soil vapor from the Property to the 60 Tufts Street property.

9.3. Inspection and Monitoring

The system has been monitored in accordance with the requirements and schedule in the Phase IV RIP. Monitoring of the system was historically performed monthly; however, once telemetry was installed on the system, GEI began performing quarterly monitoring in July 2015. Operational parameters for the system (e.g., flow rate, vacuum, off-gas treatment efficiency) were monitored six times from June to December 2025. GEI also measures the vapor pressure of sub-slab extraction points and monitoring points periodically. GEI uses these sub-slab pressure measurements to confirm system effectiveness. The pipe and hose connections on the pressure side of the blower are examined during monitoring visits for potential leaks. Leaks, if encountered, are corrected immediately. Carbon change-outs are scheduled based on carbon tank monitoring data to maximize VOC adsorption while maintaining compliance with regulatory requirements regarding discharge of VOCs to the atmosphere. Procedures to address

potential spills of spent activated carbon during carbon change-outs have been developed and are presented in the system OMM Plan provided in the Phase IV RIP.

GEI performs monitoring for off-gas treatment efficiency monthly. Based on that monitoring, the system off-gas for the combined SSDS/SVE system was within permissible limits during the reporting period. A summary of monitoring activities during this reporting period is provided in Table 9-1, and Field Monitoring Forms are provided in Appendix I.

9.4. Performance Efficiency and Effectiveness

The SSDS monitoring data show that the sub-slab vacuum field generated by the SSDS covers most of the building slab area. In conjunction with the physical sealing of the slab, this indicates the soil vapor migration pathway to indoor air is being mitigated by the system. Based on indoor air testing results collected since the combined system has been in operation, and the Method 3 risk characterizations prepared for the Site, a condition of NSR for full-time commercial workers has been achieved for the building at the Property.

The SVE system monitoring data show that vacuum influence from the SVE points in the south parking lot extends approximately 30 feet south of the building and from the SVE points in the north parking lot extends onto 60 Tufts Street.

Three influent and two effluent samples from the carbon treatment system were collected in May 2007, June 2007, and March 2008. The results of this sampling were compared with PID field measurements to estimate the total mass of VOCs removed from soil vapor between April 2007 and May 2014. However, GEI collected more recent influent and effluent samples in February 2014. The results of the February 2014 influent and effluent sampling are a better indicator of current system conditions and were used to estimate the total mass of VOCs removed from soil vapor based on PID field measurements beginning in June 2014. Monitoring data from both the SSDS and SVE components through December 15, 2025, show that approximately 9,522 lbs (approximately 707 gallons) of VOCs have been removed from the vadose zone at the Property (Fig. 9-1).

9.5. Management of Waste Materials

Infrequently, condensate in system piping may accumulate in the moisture separator installed as part of the blower assembly. If observed, the liquid is drained from the moisture separator and dispensed to the bare ground surface at the Property so that it can infiltrate into the subsurface within the Site boundary.

Based on the previous quantities of spent carbon generated by the system, a 2023 Hazardous Waste Report was submitted to MassDEP on March 7, 2024, identifying the Property as a Large Quantity Generator (LQG) facility. GEI will submit the next biennial Hazardous Waste Report in early 2026.

Remediation waste generated during this reporting period consisted of 4,000 lbs of spent activated carbon. The carbon change-out occurred on July 17, 2025, and the spent carbon was delivered to Reworld Avon TSDF (Reworld Waste, LLC) of Avon, Ohio under a uniform hazardous waste manifest. Disposal documentation for this reporting period is in Appendix E.

9.6. System Modifications

No system modifications were made during this reporting period.

9.7. Future Phase V Activities

The system is achieving the remedial design objectives. Phase V OMM activities will continue in accordance with the requirements and schedule set forth in the Phase IV RIP.

9.7.1. Longest Duration of AEPMM Shutdown

An operating regime for the 50 Tufts Street AEPMMs was included in the Phase IV FIR/ Phase V ROS submitted on August 4, 2011, which included an OMM plan for the system. Indoor air sampling performed at 50 Tufts Street by GeoInsight in September 2006 identified PCE concentrations ranging from 550 to 800 µg/m^3, and TCE concentrations ranging from 16 to 150 µg/m^3. In accordance with the MassDEP Fact Sheet "TCE Toxicity Information: Implications for Chronic and Shorter-Term Exposure," dated March 27, 2014, the pre-EPMM concentrations in the building would pose an IH even over a short time period, such as a matter of days. However, GEI performed indoor air sampling during an unscheduled SSDS/SVE system shutdown in March 2015. The March 2015 indoor air concentrations did not pose an IH, and TCE was not detected during the March 2015 indoor air sampling. Based on system monitoring logs, the system was likely down for slightly less than 1 month during the March 2015 shut down. This information indicates that an IH would not be present during a minor shut down of the 50 Tufts Street system. Because the building is currently occupied, sampling cannot be conducted after the system has been shut down for a full 60 days or longer, so the maximum duration for a system shutdown that might pose an IH is not known now.

GEI will continue to operate the AEPMM at 50 Tufts Street.

10. Monitored Natural Attenuation

MNA is part of the remedial strategy to reach a Permanent Solution for the Site. GEI has implemented an MNA program to confirm on-going natural attenuation is occurring at the Site. The MNA program is described in the MNA OMM Plan presented in the Phase IV RIP. The primary elements of the MNA program include:

- Plume Stability Monitoring: A groundwater sampling plan to monitor overburden and bedrock groundwater plume concentrations through time to confirm that the groundwater plumes are stable, and that overall groundwater concentrations of chlorinated VOCs are not increasing.
- Natural Attenuation Evaluation: An evaluation of overburden and bedrock groundwater plume concentrations through time for indications of the presence and rate of natural attenuation processes.

MNA was incorporated into the remedial strategy to achieve a Permanent Solution for the Site, as documented in the Phase III Report submitted to MassDEP in 2008. GEI is conducting a groundwater monitoring program and a comprehensive update of the MNA evaluation to verify on-going natural attenuation at the Site. The MNA update will be included in the "Phase II CSA Addendum" report and updated CSM.

11. Tufts Street Reconstruction

The City of Somerville announced the Tufts Street Reconstruction project in July 2023, initially planning for sidewalk reconstruction, catch basin replacement, street realignment, and repaving, with construction originally scheduled for summer and fall 2024. Following community feedback, the project's scope was expanded in February 2024 to include new trees and greenery, which required deeper soil excavation and additional shallow soil testing due to contamination at 50 Tufts Street. This led to a revised construction timeline for 2025 and 2026. The project was put out to bid in February 2025, awarded in March 2025, and construction began in September 2025 and is currently ongoing.

GEI has been working cooperatively with the City of Somerville and their LSP (Atlas Technical Consultants LLC [Atlas]) regarding the impacts of the 50 Tufts Street contamination on the project.

The Tufts Street Reconstruction project website with updated communication and concept plans is:

https://voice.somervillema.gov/tufts-street-reconstruction

11.1. 50 Tufts Street Soil Borings and Soil Samplings

On February 12, 2024, GEI observed NDS advance five soil borings (50TUFT B101 through 50TUFT B105) on the 50 Tufts Street property adjacent to the property boundary with the City of Somerville sidewalk (Fig 11-1). The purpose of the soil sampling was to evaluate concentrations of chlorinated VOCs on the 50 Tufts Street property near the proposed work area for the Tufts Street Reconstruction Project. Borings 50TUFT B101 and 501TUFT B102 were advanced in the northern parking lot and borings 50TUFT B103 through 50TUFT B105 were advanced in the southern parking lot. Borings were advanced to a depth of five feet and samples were collected for analysis of VOCs.

Boring logs and Laboratory Data Reports were included in the Phase V Status Report No. 26 and RMR No. 41.

11.2. City of Somerville Subsurface Investigation

GEI learned from the City of Somerville and its LSP that eight soil borings were completed in March 2024 during a subsurface investigation. The City's data, previously not publicly available, was submitted with a Utility-Related Abatement Measure (URAM) in May 2025.

11.2.1. Utility-Related Abatement Measure

Atlas notified MassDEP on May 9, 2025, of their intent to manage contaminated soil and groundwater associated with the 50 Tufts Street Site (RTN 3-23246) as part of the Tufts Street Reconstruction Project as a Utility Release Abatement Measure (URAM). MassDEP assigned RTN 3-51811 to the URAM. Atlas submitted the URAM to MassDEP on May 16, 2025, which includes the details of soil sampling and laboratory testing. A copy of a URAM is in Appendix K.

In March 2024, Atlas installed eight soil borings (ATC-1 through ATC-8) within Tufts Street to approximately 10 feet. Atlas collected two soil samples from each boring at depths of 0 to 5 feet and 5-10 feet for analysis of VOCs. Additionally, Atlas collected two composite soil samples, for analysis of waste disposal parameters. Concentrations of VOCs (PCE) were detected in one of the sixteen soil samples (ATC-8 5-10 feet) at 0.0314 mg/kg.

The URAM incorporates contaminated soil and groundwater management into the project's design and specifications. It requires a contractor health and safety plan, potential PPE upgrades to Level C, and the installation of check dams every 30 feet along drainage pipes to prevent groundwater contamination. Additionally, a Contained-In-Determination (CID) was submitted in May 2025 to facilitate off-site soil disposal.

11.2.2. Contained-In Determination

Atlas submitted a Contained-In Determination (CID) to MassDEP on May 19, 2025, to reclassify soil with detected concentrations of chlorinated VOCs as suitable for disposal at an in-state landfill. The CID was based on subsurface investigations from March 2024 and additional data from GEI's February 2024 soil sampling. Atlas requested that all soil within the right-of-way, except for a small area in front of 50 Tufts Street (due to elevated PCE levels), be declassified as hazardous waste. The limited area with higher contamination was excluded from the request. The CID is included in Appendix K.

MassDEP rejected the CID and requested additional sampling to better define the extent of chlorinated VOC contamination in soil. Atlas submitted a revised CID on July 10, 2025, which was presumptively approved on July 29, 2025. A copy of the revised CID is included in Appendix K.

11.3. Summary of URAM Activities

Construction began in September 2025 and is ongoing. Excavated soil is being stockpiled on the 50 Tufts Street property prior to reuse or offsite disposal. Excavation has not started in the area in front of the 50 Tufts Street building excluded from the CID; additional test pits are planned to better delineate this area. Construction was paused in December 2025 due to winter conditions and will resume in the spring.

12. Remedial Monitoring Report No. 44

Remedial Monitoring Report No. 44, documenting OMM activities for active remedial systems at the Site, is presented in the BWSC-108A and 108B Transmittal Forms in Appendix A.

Phase V Status Report No. 29 and Remedial Monitoring Report No. 44
50 Tufts Street
Somerville, Massachusetts

Exploration ID	Monitoring Well/ Soil Boring	Depth of Exploration (ft)	Completion Date	Drilling Method	Well Screen Interval (ft)	Property	Purpose	Soil Sampling Analysis
B401S / MW401S	Monitoring Well	20	10/3/2025	Drive and Wash	10 to 20	86 Franklin Street (sidewalk)	assess shallow overburden conditions	NA
B401D / MW401D	Monitoring Well	44.5	9/30/2025	Drive and Wash	34 to 44	86 Franklin Street (sidewalk)	assess shallow bedrock conditions	NA
B402 / MW402	Monitoring Well	30	10/6/2025	Drive and Wash	20 to 30	Intersection of Morton Street and Knowlton Street	assess shallow bedrock conditions	NA
B403 / MW403	Monitoring Well	90	10/14/2025	Drive and Wash	80 to 90	50 Tufts Street (south portion)	assess deep bedrock conditions	VOCs
B404 / MW404	Monitoring Well	90	10/22/2025	Drive and Wash	72.5 to 82.5	50 Tufts Street (central parking lot)	assess deep bedrock conditions	VOCs
B405 / MW405	Monitoring Well	20	10/23/2025	Direct Push (Geoprobe)	10 to 20	Intersection of New Washington Street and Washington Street	assess shallow overburden conditions	NA
B406 / MW406	Monitoring Well	14	10/24/2025	Direct Push (Geoprobe)	4 to 14	Intersection of Joy Street and Washington Street	assess shallow overburden conditions	NA
B407 / MW407	Monitoring Well	18	12/30/2025	Direct Push (Geoprobe)	4.45 to 14.45	31 Tufts Street (sidewalk at corner of Glen Street and Tufts Street)	assess shallow overburden conditions	NA

Notes:
1. NA = Not Applicable
2. VOCs = Volatile Organic Compounds
3. Boring B406 encountered refusal at 14 feet.
4. Boring B407 encountered refusal at 18 feet, and the casing encountered refusal at 14.6 feet.

General Chemistry				NS						
Solids, Percent	2540G	%	NS		78	77	90	98	94	91

General Notes:

1. In general, analytes detected in at least one sample are reported here. For a complete list of analytes see the laboratory data sheets.
2. "<" = The analyte was not detected at a concentration above the specified laboratory reporting limit.
3. MCP = 310 CMR 40.0000 Massachusetts Contingency Plan with revisions effective March 1, 2024
4. Reportable Concentrations (e.g., RCS-1) where identified, are cited from the MCP.
5. **Bold** = Value exceeds RCS-1 standards.
6. ND = Not detected above laboratory reporting limit
7. NS = No standard has been promulgated for this analyte.
8 NT = Not tested.
9. mg/kg = milligrams per kilogram.

Qualifying Notes:

K- The result has a low bias due to blank spike or laboratory recovery below lower control limits

General Notes:
1. ft = feet.
2. bgs = below ground surface.
3. ID = identification.
4 GW = groundwater.
5. NAVD = North American Vertical Datum of 1988.
6. The top of the PVC riser was used as the measuring point for depth to groundwater.
7. "--" = Well not yet installed, abandoned, or not measured.
8. NM = Not measured.

Table 4-3. Groundwater Elevations

General Notes:
1. ft = feet.
2. bgs = below ground surface.
3. ID = identification.
4 GW = groundwater.
5. NAVD = North American Vertical Datum of 1988.
6. The top of the PVC riser was used as the measuring point for depth to groundwater.
7. "--" = Well not yet installed, abandoned, or not measured.
8. NM = Not measured.

General Notes:
1. ft = feet.
2. bgs = below ground surface.
3. ID = identification.
4 GW = groundwater.
5. NAVD = North American Vertical Datum of 1988.
6. The top of the PVC riser was used as the measuring point for depth to groundwater.
7. "--" = Well not yet installed, abandoned, or not measured.
8. NM = Not measured.

General Notes:
1. ft = feet.
2. bgs = below ground surface.
3. ID = identification.
4 GW = groundwater.
5. NAVD = North American Vertical Datum of 1988.
6. The top of the PVC riser was used as the measuring point for depth to groundwater.
7. "--" = Well not yet installed, abandoned, or not measured.
8. NM = Not measured.

Table 4-4. Summary of Groundwater Sampling Activities
Phase V Status Report No. 29 and Remedial Monitoring Report No. 44
50 Tufts Street
Somerville, Massachusetts

Sampling Event and Date	Sampled Locations	QA/QC Samples
Quarterly Groundwater Sampling		
5/23/2006	SH-MW1, SH-MW2, SH-MW3, GEO-1, GEO-2, MW-1, MW-	NA
5/24/2006	GEO-3, GEO-4, GEO-5, GEO-6, MW101, MW102 MW103,	Field Duplicate of GEO-3
5/25/2006	SH-4	NA
Groundwater Sampling		
8/7/2006	MW103	NA
Quarterly Groundwater Sampling		
10/4/2006	SH-MW1, SH-MW2, SH-MW3, GEO-3 GEO-4, GEO-5 and	Field Duplicate MW900 (GEO-3)
10/5/2006	GEO-1, GEO-2, MW101, MW102, MW103, MW104 and	NA
Quarterly Groundwater Sampling		
1/16/2007	SH-MW1, SH-MW2, GEO-3, GEO-4, GEO-5, GEO-6,	Field Duplicate MW900 (GEO-6)
1/17/2007	SH-MW3, MW-1, MW-3, GEO-1 and GEO-2	Field Duplicate MW800 (GEO-1)
1/18/2007	MW103, MW106, MW107, MW108, MW109, MW110 and	NA
Groundwater Sampling		
2/20/2007	MW113 and MW114	NA
3/23/2007	MW112A, MW115R AND MW116	NA
Quarterly Groundwater Sampling		
4/12/07	SHMW1, SHMW3, GEO1, GEO2 and MW113	NA
4/13/07	GEO3, MW101, MW102, MW103, MW104, MW106,	Field Duplicate MW900 (MW101)
4/16/07	SHMW2, GEO4, GEO5, GEO6, MW105, MW108, MW109,	Field Duplicate MW901 (GEO6)
5/23/07	MWCS1	NA
Quarterly Groundwater Sampling		
7/18/2007	MW102, MW107, MW108, MW11, MW112A, MW113, MW114, MW115R, M2116 and MW117S	Sample from MW102 was used for MS/MSD Field Duplicate MW900 (MW113) Field Duplicate MW901 (MW116)
7/19/2007	SHMW2, MW104, MW105, MW106, MW117T, MW117D,	NA
7/20/2007	MW118S, MW118T and MW118D	NA
Groundwater Sampling		
8/22/07	MW119S, MW119T, MW120S and MW120D	NA
8/30/07	MW118S, MW118T and MW118D	NA
Quarterly Groundwater Sampling		
10/10/2007	MW102, MW105, MW106, MW107, MW108, MW111, MW112A, MW113, MW114, MW115	Sample from MW102 was used for MS/MSD Field Duplicate MW900 (MW113)
10/11/2007	MW117T, MW117D, MW118S, MW118T, MW118D	NA
10/12/2007	MW116, MW119S, MW119T, MW120S, MW120D, MW201,	Field Duplicate MW901 (MW116)
10/15/2007	MW104, MW117S	NA
10/22/2007	MW121S, MW121D	NA
Quarterly Groundwater Sampling		
1/9/2008	MW105, MW115	NA
1/10/2008	MW102, MW106, MW107, MW108, MW111, MW112A	Sample from MW102 was used for MS/MSD
1/11/2008	MW104, MW113, MW114, MW116, MW117S, MW118S, MW201, MW202	Field Duplicate MW900 (MW113) Field Duplicate MW901 (MW116)
1/15/2008	MW117T, MW117D, MW118T, MW119S, MW120S,	NA
1/16/2008	MW118D, MW119T	NA
1/17/2008	MW120D	NA
Groundwater Sampling		
1/30/2008	MW122	NA
Quarterly Groundwater Sampling		
4/15/2008	GEO-1, SH-MW3, MW3, MW104, MW113, MW116, MW201, MW202, MW203	Field duplicate MW113 (MW900) Field duplicate MW116 (MW901)
4/16/2008	MW117S, MW117T, MW117D, MW118T, MW118D,	NA
4/17/2008	MW102, MW106, MW107, MW108, MW109, MW111, MW112A, MW114, MW115R, MW120D, MW121S,	Sample from MW102 was used for MS/MSD
4/18/2008	MW105	NA

50 Tufts Street
Somerville, Massachusetts

Sampling Event and Date	Sampled Locations	QA/QC Samples
Annual Groundwater Sampling		
4/20/2011	MW105, MW112A, MW117D, MW118S, MW118T,	Field duplicate MW112A (MW900)
4/21/2011	GEO-2, SH-MW3, MW104, MW116, MW117S, MW117T	Field duplicate MW116 (MW901) Sample from MW104 was used for MS/MSD
4/22/2011	GEO-1, MW119S, MW119D, MW120S, MW120D, MW202	
Semi-Annual Groundwater Sampling		
11/16/2011	MW112A, MW122	NA
Annual Groundwater Sampling		
4/16/2012	SH-MW-3, MW112A, MW117S, MW117T, MW117D, MW118D, MW119S, MW119T, MW120S, MW120D, MW121S, MW121D	Field duplicate MW112A (MW900)
4/17/2012	GEO-1, MW104, MW105, MW116, MW118T, MW122, MW202	Field duplicate MW116 (MW901) Sample from MW104 was used for MS/MSD
Semi-Annual Groundwater Sampling		
11/12/2012	MW112A, MW118D, MW121D, MW122	NA
Annual Groundwater Sampling		
4/23/2013	SH-MW-3, MW105, MW117T, MW119S, MW119T, MW120S, MW120D, MW121S, MW121D, MW122, MW202	NA
4/24/2013	GEO-1, MW104, MW112A, MW116, MW117S, MW117D, MW118S, MW118T, MW118D	Field duplicate MW116 (MW900) Field duplicate MW112A (MW901) Sample from MW104 was used for MS/MSD
5/1/2013	GEO-2	
Semi-Annual Groundwater Sampling		
11/18/2013	MW112A, MW118D, MW121D, MW122	NA
Kleinfelder Groundwater Sampling		
2/6/2014	KE-114-140206, KE-115-140206, KE-116-140206, KE-117-140206, MW-SR-140206, WashSW-140206	Sample from WashSW-140206 was a grab sample from the base of an open excavation.
4/8/2014	KE-202D, KE-202S	NA
4/9/2014	KE-117	NA
4/14/2014	KE-204, KE-206, KE-208	NA
4/15/2014	KE-205, KE-207, KE-209, KE-210	NA
Annual Groundwater Sampling		
4/30/2014	MW104, MW121S, MW121D, MW122, SH-MW-3, GEO-1, GEO-2	Sample from MW104 was used for MS/MSD
5/1/2014	MW117S, MW117T, MW117D, MW118S, MW118D, MW118T, MW119S, MW119T, MW120S, MW120D, MW116	Field duplicate MW116 (MW900)
6/11/2014	MW112A	NA
Semi-Annual Groundwater Sampling		
11/18/2014	MW112A, MW118D, MW121D, MW122	NA
Annual Groundwater Sampling		
4/2/2015	MW104, MW116, MW117S, MW117T, MW117D, MW118S, MW118D, MW119S, MW119T, MW121S, MW121D, MW122, SH-MW-3, GEO-1, GEO-2	Sample from MW104 was used for MS/MSD Field duplicate MW116 (MW901)
4/3/2015	MW118T, MW120S, MW120D	
4/17/2015	MW112A	Field duplicate MW112A (MW900)
Semi-Annual Groundwater Sampling		
11/19/2015	MW118D, MW121D, MW122	NA
Annual Groundwater Sampling		
4/28/2016	MW1112A, MW117S, MW117T, MW117D, MW118S, MW118T, MW118D, MW119S, MW119T, MW120S, MW120D, MW121S, MW121D, MW122, GEO-1	Field duplicate MW116 (MW900) Field duplicate GEO-2 (MW901) Sample from MW104 was used for MS/MSD
4/29/2016	MW104, MW116, MW202, GEO-2	

Table 4-4. Summary of Groundwater Sampling Activities
Phase V Status Report No. 29 and Remedial Monitoring Report No. 44
50 Tufts Street
Somerville, Massachusetts

Sampling Event and Date	Sampled Locations	QA/QC Samples
Semi-Annual Groundwater Sampling		
11/21/2016	MW112A, MW118D, MW121D, MW122	NA
Annual Groundwater Sampling		
4/17/2017	MW104, MW116, MW117S, MW117T, MW117D, MW118S, MW118T, MW118D, MW121S, MW121D, MW122, MW202, GEO-1	Field duplicate MW116 (MW900) Field duplicate MW112A (MW901) Sample from MW104 was used for MS/MSD
4/18/2017	MW112A, MW119S, MW119T, MW120S, MW120D, GEO-2	
4/28/2017	SH-MW-2, MW104

4/15/2019	MW112A, MW117S, MW117T, MW117D, MW118S, MW118D, MW121S, MW121D, MW122	Field duplicate MW116 (MW900) Field duplicate GEO-2 (MW901) Sample from SHMW2 was used for MS/MSD
4/16/2019	MW116, MW118T, MW119S, MW119T, MW120S, MW120D, MW202, SHMW2, GEO-1, GEO-2	
Semi-Annual Groundwater Sampling		
11/23/2019	MW 112A, MW118D, MW121D, MW122	NA
Annual Groundwater Sampling		
4/16/2020	MW112A, MW117S, MW117T, MW117D, MW118S, MW118D, MW121S, MW121D, MW122	Field duplicate MW116 (MW900) Field duplicate GEO-2 (MW901) Sample from MW202 was used for MS/MSD
4/17/2020	MW116, MW118T, MW119S, MW119T, MW120S, MW120D, MW202, GEO-1, GEO-2	
Semi-Annual Groundwater Sampling		NA
11/18/2020	MW 112A, MW118D, MW121D, MW122	
Annual Groundwater Sampling		
4/13/2021	MW112A, MW117S, MW117T, MW117D, MW118S, MW118T, MW118D, MW121S, MW121D, MW122	Field duplicate MW116 (MW900) Field duplicate GEO-2 (MW901) Sample from GEO-1 was used for MS/MSD
4/14/2021	MW116, MW119S, MW119T, MW120S, MW120D, MW202, GEO-1, GEO-2	
Semi-Annual Groundwater Sampling		NA
11/30/2021	MW 112A, MW118D, MW121D, MW122	
Annual Groundwater Sampling		
4/12/2022	MW118S, MW118T, MW118D, MW117T, MW117S, MW117D	Field duplicate MW116 (MW900) Field duplicate GEO-2 (MW901) Sample from GEO-1 was used for MS/MSD
4/13/2022	MW120S, MW120D, MW119S, MW119T, MW121S, MW121D, GEO-1, MW122, MW202, MW116	
4/14/2022	GEO-2 and MW112A	
Semi-Annual Groundwater Sampling		NA
11/29/2022	MW 112A, MW118D, MW121D, MW122	

Table 4-4. Summary of Groundwater Sampling Activities
Phase V Status Report No. 29 and Remedial Monitoring Report No. 44
50 Tufts Street
Somerville, Massachusetts

Sampling Event and Date	Sampled Locations	QA/QC Samples
Annual Groundwater Sampling		
4/17/2023	MW118S, MW118T, MW118D, MW117T, MW117S, MW117D, MW122, MW119S, MW119T	Field duplicate MW116 (MW900) Field duplicate GEO-2 (MW901) Sample from GEO-1 was used for MS/MSD
4/18/2023	MW120S, MW120D, MW121S, MW121D GEO-1, GEO-2, MW202, MW116	
5/11/2023	MW112A	
Additional Sampling for PSS		NA
9/15/2023	MW108	
Semi-Annual Groundwater Sampling		NA
11/7/2023	MW 112A, MW118D, MW121D, MW122	
Annual Groundwater Sampling		
4/2/2024	MW107, MW112A, MW118D, MW118S, MW118T, MW117D, MW117S, MW117T, MW119S, MW119T, GEO-1, MW108, MW120S	Field duplicate MW116 (MW900) Field duplicate GEO-2 (MW901) Sample from GEO-1 was used for MS/MSD
4/3/2024	MW102, MW103, MW106, MW116, MW120D, MW121S, MW121D, MW201, MW202, GEO-5, GEO-6, SH-MW2R	
4/4/2024	MW104R, MW109, MW122,GEO-2, GEO-4, MW203R	
Semi-Annual Groundwater Sampling		NA
9/20/2024	MW104R	
11/14/2024	MW104R, MW 112A, MW118D, MW121D, MW122	
Site Investigation Sampling		NA
1/20/2025	MW104R, MW301, MW115R	
Annual Groundwater Sampling		
3/7/2025	MW111R	Field duplicate MW116 (MW900) Field duplicate GEO-2 (MW901) Sample from GEO-1 was used for MS/MSD
3/18/2025	GEO-4, GEO-5	
3/19/2025	MW106, MW109, GEO-6	
4/22/2025	MW107, MW108, MW115R, MW117S, MW117D, MW117T, MW118S, MW118D, MW118T, MW119S, MW119T, MW120S, MW120D	
4/23/2025	MW102, MW103, MW104R, MW121S, MW121D, MW201, MW202, MW301, GEO-1, GEO-2	
4/24/2025	MW111R, MW116, MW122, MW203R, SH-MW2R	
4/25/2025	MW112A	
Semi-Annual Groundwater Sampling		
11/10/2025	MW117S, MW117T, MW117T, MW118S, MW118T, MW118D, MW203R,MW403, MW405, MW406, MW	Field duplicate MW116 (MW900) Field duplicate GEO-2 (MW901) Field duplicate MW404 (MW902) Sample from GEO-1 was used for MS/MSD
11/11/2025	GEO-2, MW102, MW103, MW112A MW116, MW119S, MW119T MW120S, MW120D, MW121S, MW121D, MW301, MW402, MW900, MW901	
11/12/2025	GEO-4, GEO-5, GEO-6, MW106, MW107, MW108, MW111R MW122, MW201, MW202, MW404, SHMW-2, MW902	
11/13/2025	GEO-1, MW109, MW115R, MW401S, MW401D	

General Notes:
1. NA = not applicable.
2. QA/QC = quality assurance/quality check.
3. MS/MSD = matrix spike/matrix spike duplicate.
4. VOC = volatile organic compound.
5. All groundwater samples submitted for VOC testing. Selected samples collected in January 2007, April 2010, April 2011, April 2012, April 2013, April 2014, May 2014, June 2014, April 2015, April 2016, April 2017, April 2018, April 2019, April 2020, April 2021, April 2022, April and May 2023, April 2024, April 2025, and November 2025 were also submitted for natural attenuation parameter testing.

General Notes:
1. Analytes detected in at least one sample are reported here. For a complete list of analytes refer to the laboratory data reports.
2. ft bgs = feet below ground surface.
3. µg/l = micrograms per liter.
4. "< " = The analyte was not detected at a concentration above the specified reporting.
5. SHA = Sanborn Head & Associates.
6. FD = Field Duplicate Sample.
7. NT = Not Tested.
8. * = micrograms CaCO3 per liter

Qualifying Notes:
B The analyte found in associated method blank.
C+ The result has a high bias due to surrogate recovery above upper control limits.
E The value exceeds the calibration range.
F+ The result has a high bias due to matrix spike recovery above upper control limits.
F- The result has a low bias due to matrix spike recovery below lower control limits.
G The result is estimated due to duplicate precision outside control limits.
J The reported result is below the laboratory reporting limit and is estimated.
J+ The reported result is estimated.
K- The result has a low bias due to blank spike or laboratory control sample recovery below lower control limits.
K+ The result has a high bias due to blank spike or laboratory control sample recovery above upper control limits.
R The result is rejected due to gross exceedence of minimum response factor criteria.

General Notes:

1. Analytes detected in at least one sample are reported here. For a complete list of analytes refer to the laboratory data reports.
2. ft bgs = feet below ground surface.
3. µg/l = micrograms per liter.
4. "< " = The analyte was not detected at a concentration above the specified reporting.
5. SHA = Sanborn Head & Associates.
6. FD = Field Duplicate Sample.
7. NT = Not Tested.
8. * = micrograms CaCO3 per liter

Qualifying Notes:

B The analyte found in associated method blank.
C+ The result has a high bias due to surrogate recovery above upper control limits.
E The value exceeds the calibration range.
F+ The result has a high bias due to matrix spike recovery above upper control limits.
F- The result has a low bias due to matrix spike recovery below lower control limits.
G The result is estimated due to duplicate precision outside control limits.
J The reported result is below the laboratory reporting limit and is estimated.
J+ The reported result is estimated.
K- The result has a low bias due to blank spike or laboratory control sample recovery below lower control limits.
K+ The result has a high bias due to blank spike or laboratory control sample recovery above upper control limits.
R The result is rejected due to gross exceedence of minimum response factor criteria.

General Notes:
1. Analytes detected in at least one sample are reported here. For a complete list of analytes refer to the laboratory data reports.
2. ft bgs = feet below ground surface.
3. µg/l = micrograms per liter.
4. "< " = The analyte was not detected at a concentration above the specified reporting.
5. SHA = Sanborn Head & Associates.
6. FD = Field Duplicate Sample.
7. NT = Not Tested.
8. * = micrograms CaCO3 per liter

Qualifying Notes:
B The analyte found in associated method blank.
C+ The result has a high bias due to surrogate recovery above upper control limits.
E The value exceeds the calibration range.
F+ The result has a high bias due to matrix spike recovery above upper control limits.
F- The result has a low bias due to matrix spike recovery below lower control limits.
G The result is estimated due to duplicate precision outside control limits.
J The reported result is below the laboratory reporting limit and is estimated.
J+ The reported result is estimated.
K- The result has a low bias due to blank spike or laboratory control sample recovery below lower control limits.
K+ The result has a high bias due to blank spike or laboratory control sample recovery above upper control limits.
R The result is rejected due to gross exceedence of minimum response factor criteria.

General Notes:

1. Analytes detected in at least one sample are reported here. For a complete list of analytes refer to the laboratory data reports.
2. ft bgs = feet below ground surface.
3. µg/l = micrograms per liter.
4. "< " = The analyte was not detected at a concentration above the specified reporting.
5. SHA = Sanborn Head & Associates.
6. FD = Field Duplicate Sample.
7. NT = Not Tested.
8. * = micrograms CaCO3 per liter

Qualifying Notes:

B The analyte found in associated method blank.
C+ The result has a high bias due to surrogate recovery above upper control limits.
E The value exceeds the calibration range.
F+ The result has a high bias due to matrix spike recovery above upper control limits.
F- The result has a low bias due to matrix spike recovery below lower control limits.
G The result is estimated due to duplicate precision outside control limits.
J The reported result is below the laboratory reporting limit and is estimated.
J+ The reported result is estimated.
K- The result has a low bias due to blank spike or laboratory control sample recovery below lower control limits.
K+ The result has a high bias due to blank spike or laboratory control sample recovery above upper control limits.
R The result is rejected due to gross exceedence of minimum response factor criteria.

General Notes:
1. Analytes detected in at least one sample are reported here. For a complete list of analytes refer to the laboratory data reports.
2. ft bgs = feet below ground surface.
3. µg/l = micrograms per liter.
4. "< " = The analyte was not detected at a concentration above the specified reporting.
5. SHA = Sanborn Head & Associates.
6. FD = Field Duplicate Sample.
7. NT = Not Tested.
8. * = micrograms CaCO3 per liter

Qualifying Notes:
B The analyte found in associated method blank.
C+ The result has a high bias due to surrogate recovery above upper control limits.
E The value exceeds the calibration range.
F+ The result has a high bias due to matrix spike recovery above upper control limits.
F- The result has a low bias due to matrix spike recovery below lower control limits.
G The result is estimated due to duplicate precision outside control limits.
J The reported result is below the laboratory reporting limit and is estimated.
J+ The reported result is estimated.
K- The result has a low bias due to blank spike or laboratory control sample recovery below lower control limits.
K+ The result has a high bias due to blank spike or laboratory control sample recovery above upper control limits.
R The result is rejected due to gross exceedence of minimum response factor criteria.

General Notes:
1. Analytes detected in at least one sample are reported here. For a complete list of analytes refer to the laboratory data reports.
2. ft bgs = feet below ground surface.
3. µg/l = micrograms per liter.
4. "< " = The analyte was not detected at a concentration above the specified reporting.
5. SHA = Sanborn Head & Associates.
6. FD = Field Duplicate Sample.
7. NT = Not Tested.
8. * = micrograms CaCO3 per liter

Qualifying Notes:
B The analyte found in associated method blank.
C+ The result has a high bias due to surrogate recovery above upper control limits.
E The value exceeds the calibration range.
F+ The result has a high bias due to matrix spike recovery above upper control limits.
F- The result has a low bias due to matrix spike recovery below lower control limits.
G The result is estimated due to duplicate precision outside control limits.
J The reported result is below the laboratory reporting limit and is estimated.
J+ The reported result is estimated.
K- The result has a low bias due to blank spike or laboratory control sample recovery below lower control limits.
K+ The result has a high bias due to blank spike or laboratory control sample recovery above upper control limits.
R The result is rejected due to gross exceedence of minimum response factor criteria.

General Notes:
1. Analytes detected in at least one sample are reported here. For a complete list of analytes refer to the laboratory data reports.
2. ft bgs = feet below ground surface.
3. µg/l = micrograms per liter.
4. "< " = The analyte was not detected at a concentration above the specified reporting.
5. SHA = Sanborn Head & Associates.
6. FD = Field Duplicate Sample.
7. NT = Not Tested.
8. * = micrograms CaCO3 per liter

Qualifying Notes:
B The analyte found in associated method blank.
C+ The result has a high bias due to surrogate recovery above upper control limits.
E The value exceeds the calibration range.
F+ The result has a high bias due to matrix spike recovery above upper control limits.
F- The result has a low bias due to matrix spike recovery below lower control limits.
G The result is estimated due to duplicate precision outside control limits.
J The reported result is below the laboratory reporting limit and is estimated.
J+ The reported result is estimated.
K- The result has a low bias due to blank spike or laboratory control sample recovery below lower control limits.
K+ The result has a high bias due to blank spike or laboratory control sample recovery above upper control limits.
R The result is rejected due to gross exceedence of minimum response factor criteria.

General Notes:
1. Analytes detected in at least one sample are reported here. For a complete list of analytes refer to the laboratory data reports.
2. ft bgs = feet below ground surface.
3. µg/l = micrograms per liter.
4. "< " = The analyte was not detected at a concentration above the specified reporting.
5. SHA = Sanborn Head & Associates.
6. FD = Field Duplicate Sample.
7. NT = Not Tested.
8. * = micrograms CaCO3 per liter

Qualifying Notes:
B The analyte found in associated method blank.
C+ The result has a high bias due to surrogate recovery above upper control limits.
E The value exceeds the calibration range.
F+ The result has a high bias due to matrix spike recovery above upper control limits.
F- The result has a low bias due to matrix spike recovery below lower control limits.
G The result is estimated due to duplicate precision outside control limits.
J The reported result is below the laboratory reporting limit and is estimated.
J+ The reported result is estimated.
K- The result has a low bias due to blank spike or laboratory control sample recovery below lower control limits.
K+ The result has a high bias due to blank spike or laboratory control sample recovery above upper control limits.
R The result is rejected due to gross exceedence of minimum response factor criteria.

General Notes:
1. Analytes detected in at least one sample are reported here. For a complete list of analytes refer to the laboratory data reports.
2. ft bgs = feet below ground surface.
3. µg/l = micrograms per liter.
4. "< " = The analyte was not detected at a concentration above the specified reporting.
5. SHA = Sanborn Head & Associates.
6. FD = Field Duplicate Sample.
7. NT = Not Tested.
8. * = micrograms CaCO3 per liter

Qualifying Notes:
B The analyte found in associated method blank.
C+ The result has a high bias due to surrogate recovery above upper control limits.
E The value exceeds the calibration range.
F+ The result has a high bias due to matrix spike recovery above upper control limits.
F- The result has a low bias due to matrix spike recovery below lower control limits.
G The result is estimated due to duplicate precision outside control limits.
J The reported result is below the laboratory reporting limit and is estimated.
J+ The reported result is estimated.
K- The result has a low bias due to blank spike or laboratory control sample recovery below lower control limits.
K+ The result has a high bias due to blank spike or laboratory control sample recovery above upper control limits.
R The result is rejected due to gross exceedence of minimum response factor criteria.

General Notes:

1. Analytes detected in at least one sample are reported here. For a complete list of analytes refer to the laboratory data reports.
2. ft bgs = feet below ground surface.
3. µg/l = micrograms per liter.
4. "<" = The analyte was not detected at a concentration above the specified reporting limit.

Footnote:

(a) The groundwater sample from KE-117 on February 6, 2014 was collected during overpumping of the well to simulate construction dewatering conditions and was not collected via low flow sampling techniques.

(b) WashSW was a grab sample collected from the base of an open excavation within Washington Street.

General Notes:

1. Analytes detected in at least one sample are reported here. For a complete list of analytes see the attached laboratory data sheets.
2. µg/m3 = micrograms per cubic meter.
3. ppbv = parts per billion by volume.
4. EPMM = Exposure Pathway Mitigation Measure.
5. SSDS = Sub-Slab Depressurization System
6. NA = Not applicable
7. MassDEP = Massachusetts Department of Environmental Protection
8. < = The analyte was not detected at a concentration above the specified laboratory reporting limit.
9. On March 20, 2018, GEI observed the installation of a shutdown valve on the riser pipe of the SSDS.
10. The shutdown valve was closed for 1 week prior to collection of indoor air samples in April 2019, and October 2025.
11. Highlighted sample indicates most recent round.
12. NT = Not tested.
13. Residential Sub-Slab Soil Gas Screening Values taken from MassDEP "Vapor Intrusion Guidance: Site Assessment, Mitigation and Closure" dated October 2016.

Qualifying Notes:

G The result is estimated due to duplicate precision outside control limits.
J The reported result is below the laboratory reporting limit and is estimated.

General Notes:

1. Analytes detected in at least one sample are reported here. For a complete list of analytes see the attached laboratory data sheets.
2. µg/m3 = micrograms per cubic meter.
3. ppbv = parts per billion by volume.
4. EPMM = Exposure Pathway Mitigation Measure.
5. SSDS = Sub-Slab Depressurization System
6. NA = Not applicable
7. MassDEP = Massachusetts Department of Environmental Protection
8. < = The analyte was not detected at a concentration above the specified laboratory reporting limit
9. On March 20, 2018, GEI observed the installation of a shutdown valve on the riser pipe of the SSDS.
10. The shutdown valve was closed for 1 week prior to collection of indoor air samples in July 2018, April 2019, and October 2025.
11. Highlighted sample indicates most recent round.
12. NT = Not tested.
13. "SVT-MW202S" samples were collected from monitoring well soil vapor ports as part of sub-slab soil vapor sampling.
14. Residential Sub-Slab Soil Gas Screening Values taken from MassDEP "Vapor Intrusion Guidance: Site Assessment, Mitigation and Closure" dated October 2016.

Qualifying Notes:

G The result is estimated due to duplicate precision outside control limits.
J The reported result is below the laboratory reporting limit and is estimated.

General Notes:

1. Analytes detected in at least one sample are reported here. For a complete list of analytes see the attached laboratory data sheets.
2. µg/m^3 = micrograms per cubic meter.
3. ppbv = parts per billion by volume.
4. < = The analyte was not detected at a concentration above the specified laboratory reporting limit.
5. EPMM = Exposure Pathway Mitigation Measure.
6. NT= Not tested
7. NA = Not applicable
8. MassDEP = Massachusetts Department of Environmental Protection
9. Residential Threshold Values for indoor air taken from the Massachusetts Department of Environmental Protection (MassDEP) "Vapor Intrusion Guidance: Site Assessment, Mitigation and Closure" dated October 2016.
10. Highlighted sample indicates most recent sampling rounds.
11. The samples from January 21, 2009 (11MORT-B1 and B2, and 11MORT-1A and 1B) were field duplicates of each other.
12. The laboratory notes for 11MORT-B from April 2025 indicate that the cansiter ran ambient.
13. Art supplies used by the homeowner were removed on July 31, 2025
14. APU installed on the first floor on July 29, 2025, and in the finished portion of the basement on August 6, 2025.
15. APUs shutdown on 8/21/2025 following completion of sampling.

Qualifying Note:

J The reported result is below the laboratory reporting limit and is estimated.

General Notes:
1. ºF = degrees Fahrenheit.
2. in. Hg = inches of mercury.
3. Temperatures were measured in the field using a hand-held thermometer.
4. Barometric pressures were measured in the field with a digital barometer.

Table 6-1. Summary of SSDS Monitoring Events - Capuano Center
Phase V Status Report No. 29 and Remedial Monitoring Report No. 44
50 Tufts Street
Somerville, Massachusetts

Monitoring Date	Monitoring Event per RMR Report Period	Type of Monitoring Event	SSDS Field Parameters Measured	Analytical Samples Collected (Yes/No)?
7/9/2025	1	SSDS Quarterly Monitoring	-Pressure readings, VOC concentrations, and flow rate at each manifold pipe. -Pressure readings, VOC concentrations, and flow rate at all the exterior extraction pipes.	No
10/10/2025	2	SSDS Quarterly Monitoring	-Pressure readings, VOC concentrations, and flow rate at each manifold pipe. -Pressure readings, VOC concentrations, and flow rate at all the exterior extraction pipes.	No

General Notes:

1. SSDS = Sub-Slab Depressurization System.
2. RMR = Remedial Monitoring Report.
3. VOC = Volatile Organic Compound.
4. VOC measurements collected with a ppm-RAE calibrated to 100 parts per million (ppm) isobutylene.
5. Pressure readings collected using a Dwyer 475-000-FM manometer.

General Notes:

1. Analytes detected in at least one sample are reported here. For a complete list of analytes see the attached laboratory data sheets.
2. µg/m³ = micrograms per cubic meter.
3. ppbv = parts per billion by volume.
4. "<" = The analyte was not detected at a concentration above the specified laboratory reporting limit.
5. FD = Field Duplicate.
6. The samples collected in August 2009, November 2009, February 2010, November 2010, March 2011, and May 2015 were collected over a 24 hour period.

7 NT = Not Tested.

Qualifying Notes:

J The reported result is below the laboratory reporting limit and is estimated.

J+ The reported result is estimated.

General Notes:

1. Analytes detected in at least one sample are reported here. For a complete list of analytes see the attached laboratory data sheets.
2. µg/m³ = micrograms per cubic meter.
3. ppbv = parts per billion by volume.
4. "<" = The analyte was not detected at a concentration above the specified laboratory reporting limit.
5. FD = Field Duplicate.
6. The samples collected in August 2009, November 2009, February 2010, November 2010, March 2011, and May 2015 were collected over a 24 hour period.

7 NT = Not Tested.

Qualifying Notes:

J The reported result is below the laboratory reporting limit and is estimated.

J+ The reported result is estimated.

General Notes:

1. Analytes detected in at least one sample are reported here. For a complete list of analytes see the attached laboratory data sheets.
2. µg/m³ = micrograms per cubic meter.
3. ppbv = parts per billion by volume.
4. "<" = The analyte was not detected at a concentration above the specified laboratory reporting limit.
5. FD = Field Duplicate.
6. The samples collected in August 2009, November 2009, February 2010, November 2010, March 2011, and May 2015 were collected over a 24 hour period.

7 NT = Not Tested.

Qualifying Notes:

J The reported result is below the laboratory reporting limit and is estimated.

J+ The reported result is estimated.

General Notes:

1. Analytes detected in at least one sample are reported here. For a complete list of analytes see the attached laboratory data sheets.
2. µg/m^3 = micrograms per cubic meter.
3. ppbv = parts per billion by volume.
4. "<" = The analyte was not detected at a concentration above the specified laboratory reporting limit.
5. FD = Field Duplicate.
6. The samples collected in August 2009, November 2009, February 2010, November 2010, March 2011, and May 2015 were collected over a 24 hour period.

7 NT = Not Tested.

Qualifying Notes:

J The reported result is below the laboratory reporting limit and is estimated.

J+ The reported result is estimated.

General Notes:

1. Analytes detected in at least one sample are reported here. For a complete list of analytes see the attached laboratory data sheets.
2. µg/m³ = micrograms per cubic meter.
3. ppbv = parts per billion by volume.
4. "<" = The analyte was not detected at a concentration above the specified laboratory reporting limit.
5. FD = Field Duplicate.
6. The samples collected in August 2009, November 2009, February 2010, November 2010, March 2011, and May 2015 were collected over a 24 hour period.
7 NT = Not Tested.

Qualifying Notes:

J The reported result is below the laboratory reporting limit and is estimated.
J+ The reported result is estimated.

General Notes:

1. NS = Not sampled.
2. - = Not Applicable.

Footnotes:

(a) Ventilation fans manufactured by Radon Away.
(b) An Option 2 or 3 EPMM was initially installed at these properties; however, a fan was added to the EPMM to improve performance. Therefore, these EPMMs consist of Option 1 with Option 2 or 3 EPMM elements.
(c) EPMM demonstrated to be no longer required based on testing requirements in the MassDEP Vapor Intrusion Guidance: Site Assessment, Mitigation and Closure, Policy #WSC-16-435 (Section 3.7 and Tables 3-1 and 3-2).
(d) EPMM eliminated during demolition and not installed in redevelopment
(e) An Option 3 EPMM was initially installed at 10 Morton Street in March 2009; however, a new EPMM was installed during renovations.

General Notes:

1. EPMM = Exposure Pathway Mitigation Measure.
2. See Appendix E for Air Sampling Checklists and Appendix H for EPMM forms.
3. See Section 6 for a description of EPMM Inspection activities. 60 Tufts Street EPMM is inspected quarterly; see Section 7.
4. NA = No inspection was performed during this reporting period.
5 SSDS = Sub-slab depressurization system.
6. Properties identified with -- indictes no EPMM installed

Table 8-1. Summary of SSDS Monitoring Events - 60 Tufts Street
Phase V Status Report No. 29 and Remedial Monitoring Report No. 44
50 Tufts Street
Somerville, Massachusetts

Monitoring Date	Monitoring Event per RMR Report Period	Type of Monitoring Event	SSDS Field Parameters Measured	Analytical Samples Collected (Yes/No)?
7/9/2025	1	SSDS Quarterly Monitoring	-Pressure readings and VOC concentrations at system influent/effluent and blower. -System flow rate.	No

General Notes:

1. SSDS = Sub-Slab Depressurization System.
2. RMR = Remedial Monitoring Report.
3. VOC = Volatile Organic Compound.
4. VOC measurements collected with a ppm-RAE calibrated to 100 ppm isobutylene gas.
5. Pressure readings collected using a Dwyer 475-000-FM manometer.

Table 9-1. Summary of SSDS Monitoring Events - 50 Tufts Street
Phase V Status Report No. 29 and Remedial Monitoring Report No. 44
50 Tufts Street
Somerville, Massachusetts

Monitoring Date	Monitoring Event per RMR Report Period	Type of Monitoring Event	SSDS Field Parameters Measured	Analytical Samples Collected (Yes/No)?
7/9/2025	1	SSDS Quarterly Monitoring	-Pressure readings and VOC concentrations at the combined influent, and effluent pipes. -Pressure readings and VOC concentrations at carbon tanks. -System flow rate.	No
8/20/2025	2	SSDS Monthly Monitoring	-VOC concentrations at the combined influent, and effluent pipes. -VOC concentrations at carbon tanks.	No
9/17/2025	3	SSDS Monthly Monitoring	-VOC concentrations at the combined influent, and effluent pipes. -VOC concentrations at carbon tanks.	No
10/9/2025	4	SSDS Quarterly Monitoring	-Pressure readings and VOC concentrations at the combined influent, and effluent pipes. -Pressure readings and VOC concentrations at carbon tanks. -System flow rate.	No
11/10/2025	5	SSDS Monthly Monitoring	-VOC concentrations at the combined influent, and effluent pipes. -VOC concentrations at carbon tanks.	No
12/12/2025	6	SSDS Monthly Monitoring	-VOC concentrations at the combined influent, and effluent pipes. -VOC concentrations at carbon tanks.	No

General Notes:
1. SSDS = Sub-Slab Depressurization System.
2. RMR = Remedial Monitoring Report.
3. VOC = Volatile Organic Compound.
4. VFD = Variable Flow Drive.
5. SVT/SVE = Soil Vapor Temporary Point/Soil Vapor Extraction.
6. VOC measurements collected with a ppm-RAE calibrated to 100 parts per million (ppm) with 10.6V lamp.
7. Pressure readings collected using a Dwyer 475-000-FM manometer.

LEGEND:

- MONITORING WELL INSTALLED BY TRC, 2014
- BORING BY KLEINFELDER, MARCH 2014 AND APRIL 2014
- MONITORING WELL BY KLEINFELDER, SEPTEMBER 2012, MARCH 2014, AND APRIL 2014
- MONITORING WELL WITH SOIL VAPOR SAMPLE PORT INSTALLED BY GEI, JANUARY 2007 - JANUARY 2008
- MONITORING WELL INSTALLED BY GEI, MAY 2006
- MONITORING WELL INSTALLED BY GEI, MAY 2022, MARCH 2024, OCTOBER 2024, & JANUARY, OCTOBER, & DECEMBER 2025
- PREVIOUSLY INSTALLED IRRIGATION WELL
- GLXC WELL INSTALLED AUGUST 2020
- WELLS IN GRAY HAVE BEEN DESTROYED OR DECOMMISSIONED
- CHAIN LINK FENCE
- 138 ROOM NUMBER AT CAPUANO SCHOOL
- BOUNDARY OF COMMUNITY GARDENS
- 84 STREET ADDRESS
- MBTA = MASSACHUSETTS BAY TRANSPORTATION AUTHORITY
- DISPOSAL SITE BOUNDARY (DASHED WHERE INFERRED)
- EXTENT OF PCE CONCENTRATION IN SHALLOW GROUNDWATER GREATER THAN OR EQUAL TO 20 µg/l
- µg/l = MICROGRAMS PER LITER

GENERAL NOTES:

1. HORIZONTAL CONTROL FOR THIS PLAN WAS ESTABLISHED BY GPS AND IS BASED ON THE NORTH AMERICAN DATUM OF 1983.
2. STREET AND PROPERTY LINES BASED ON SOMERVILLE ASSESSORS' MAPS AND ARE BEST FIT RELATIVE TO THE LOCATION OF THE 50 TUFTS ST. BUILDING.
3. MONITORING WELL LOCATIONS AND ELEVATIONS, AND CAPUANO CENTER COMMUNITY GARDEN LOCATIONS WERE ESTABLISHED BY ON THE GROUND SURVEYS BY BSC GROUP, INC. OR INFORMATION PROVIDED BY KLEINFELDER.
4. GEI OBSERVED DECOMMISSIONING OF SH-MW1 AND SH-1 THROUGH SH-5 IN 2007.
5. THE 20 µg/l BOUNDARY LINE IS BASED ON SHALLOW GROUNDWATER ANALYTICAL RESULTS (0 TO 15 FEET BELOW GROUND SURFACE) COLLECTED THROUGH NOVEMBER 2022. KE-204 IS A WELL SCREENED GREATER THAN 15 FEET BELOW GROUND SURFACE, BUT HAS BEEN INCLUDED IN THE 20 µg/l BOUNDARY LINE BECAUSE OF UNCERTAINTY ON THE SHALLOW GROUNDWATER CONCENTRATIONS WITHIN THE IMMEDIATE VICINITY OF THIS WELL.

Preferred Criteria For:

Option 1 (SSDS):

1. Competent concrete slab
2. Poured concrete foundation
3. Granular sub-grade (good sub-slab air flow)

Option 2 (Vapor Trench):

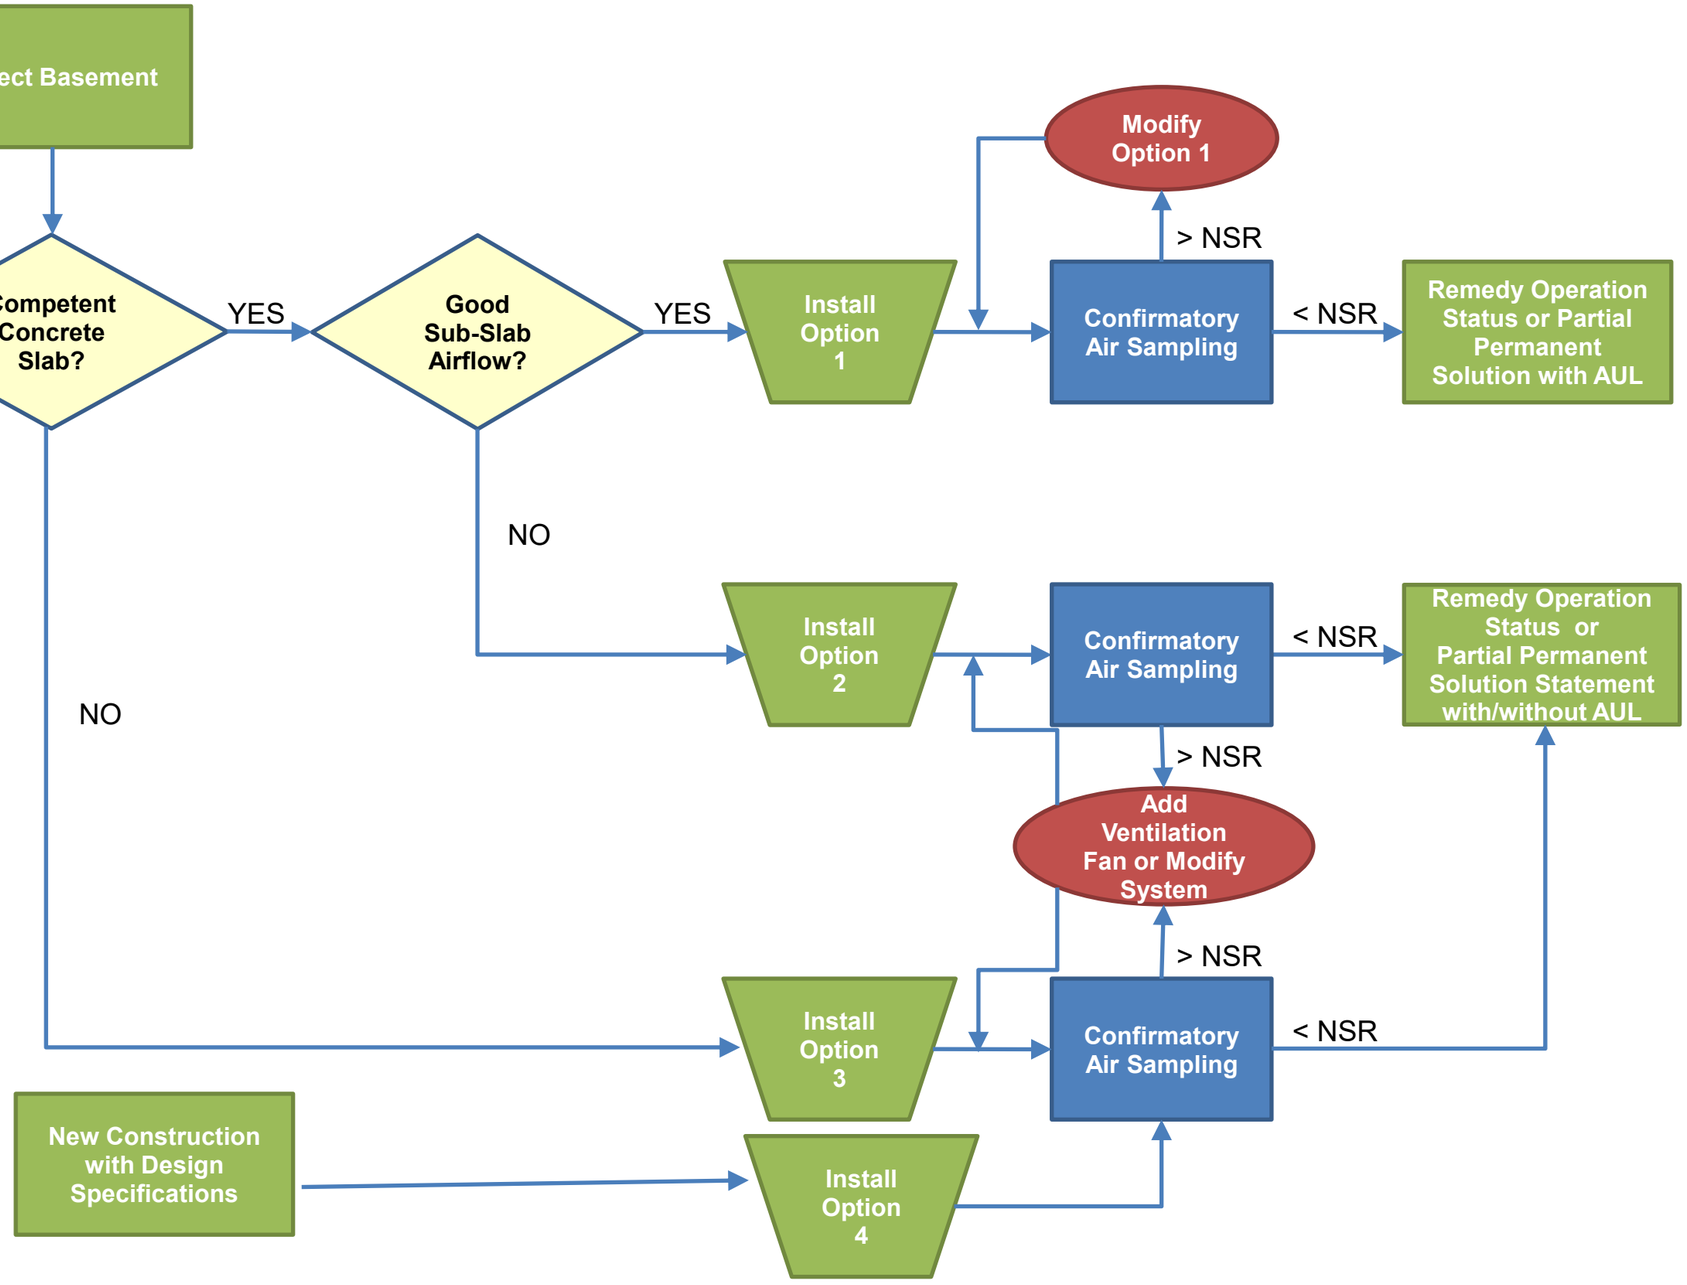
1. Competent concrete slab
2. Silt/clay sub-grade (poor sub-slab air flow)

Option 3 (New Slab Installation):

1. Incompetent concrete slab
2. Silt/clay sub-grade (poor sub-slab air flow)

Option 4 (New Construction):

1. New construction



NSR = No Significant Risk

COMPREHENSIVE RESPONSE ACTION TRANSMITTAL FORM & PHASE I COMPLETION STATEMENT

Pursuant to 310 CMR 40.0484 (Subpart D) and 40.0800 (Subpart H)

A. SITE LOCATION:

1. Site Name: 50 TUFTS ST & PROP ACROSS THE ST

2. Street Address: 50 TUFTS ST

3. City/Town: SOMERVILLE 4. ZIP Code: 021454129

☑ 5. Check here if the disposal site that is the source of the release is Tier Classified. Check the current Tier Classification Category:

☐ a. Tier I ☐ b. Tier ID ☑ c. Tier II

B. THIS FORM IS BEING USED TO: (check all that apply)

☐ 1. Submit a **Phase I Completion Statement,** pursuant to 310 CMR 40.0484.

☐ 2. Submit a **Revised Phase I Completion Statement,** pursuant to 310 CMR 40.0484.

☐ 3. Submit a **Phase II Scope of Work,** pursuant to 310 CMR 40.0834.

☐ 4. Submit [illegible] **interim Phase II Report.** This report does not satisfy the response action deadline requirements in 310 CMR [illegible].

☐ 5. Submit a **final Phase II Report and Completion Statement,** pursuant to 310 CMR 40.0836.

☐ 6. Submit a **Revised Phase II Report and Completion Statement,** pursuant to 310 CMR 40.0836.

☐ 7. Submit a **Phase III Remedial Action Plan and Completion Statement,** pursuant to 310 CMR 40.0862.

☐ 8. Submit a **Revised Phase III Remedial Action Plan and Completion Statement,** pursuant to 310 CMR 40.0862.

☐ 9. Submit a **Phase IV Remedy Implementation Plan,** pursuant to 310 CMR 40.0874.

☐ 10. Submit a **Modified Phase IV Remedy Implementation Plan,** pursuant to 310 CMR 40.0874.

☐ 11. Submit an **As-Built Construction Report,** pursuant to 310 CMR 40.0875.

☐ 12. Submit a **Phase IV Status Report,** pursuant to 310 CMR 40.0877.

☐ 13. Submit a **Phase IV Completion Statement,** pursuant to 310 CMR 40.0878 and 40.0879.

Specify the outcome of Phase IV activities: (check one)

☐ a. Phase V Operation, Maintenance or Monitoring of the Comprehensive Remedial Action is necessary to achieve a Permanent or Temporary Solution.

☐ b. The requirements of a Permanent Solution have been met. A completed Permanent Solution Statement and Report (BWSC104) will be submitted to DEP.

☐ c. The requirements of a Temporary Solution have been met. A completed Temporary Solution Statement and Report (BWSC104) will be submitted to DEP.

DRAFT COPY

B. THIS FORM IS BEING USED TO (cont.): (check all that apply)

☐ 14. Submit a **Revised Phase IV Completion Statement,** pursuant to 310 CMR 40.0878 and 40.0879.

☑ 15. Submit a **Phase V Status Report,** pursuant to 310 CMR 40.0892.

☑ 16. Submit a **Remedial Monitoring Report.** (This report can only be submitted through eDEP.)

a. Type of Report: (check one) ☐ i. Initial Report ☑ ii. Interim Report ☐ iii. Final Report

b. Frequency of Submittal: (check all that apply)

☐ i. A Remedial Monitoring Report(s) submitted monthly to address an Imminent Hazard.

☐ ii. A Remedial Monitoring Report(s) submitted monthly to address a Condition of Substantial Release Migration.

☑ iii. A Remedial Monitoring Report(s) submitted every six months, concurrent with a Status Report.

☐ iv. A Remedial Monitoring Report(s) submitted, concurrent with a Status Report.

c. Status of Site: (check one) ☐ i. Phase IV ☑ ii. Phase V ☐ iii. Remedy Operation Status ☐ iv. Temporary Solution

d. Number of Remedial Systems and/or Monitoring Programs: 6

A separate BWSC108A, CRA Remedial Monitoring Report, must be filled out for each Remedial System and/or Monitoring Program addressed by this transmittal form.

☐ 17. Submit a **Remedy Operation Status,** pursuant to 310 CMR 40.0893.

☐ 18. Submit a **Status Report to maintain a Remedy Operation Status,** pursuant to 310 CMR 40.0893(2).

☐ 19. Submit a **Transfer and/or a Modification of Persons Maintaining a Remedy Operation Status (ROS),** pursuant to 310 CMR 40.0893(5) (check one, or both, if applicable).

☐ a. Submit a Transfer of Persons Maintaining an ROS (the transferee should be the person listed in Section D, "Person Undertaking Response Actions").

☐ b. Submit a Modification of Persons Maintaining an ROS (the primary representative should be the person listed in Section D, "Person Undertaking Response Actions").

c. Number of Persons Maintaining an ROS not including the primary representative: _____

☐ 20. Submit a **Termination of a Remedy Operation Status,** pursuant to 310 CMR 40.0893(6).(check one)

☐ a. Submit a notice indicating ROS performance standards have been met. A plan and timetable pursuant to 310 CMR 40.0893(6)(b) for resuming the ROS are attached.

☐ b. Submit a notice of Termination of ROS.

☐ 21. Submit a **Phase V Completion Statement,** pursuant to 310 CMR 40.0894.

Specify the outcome of Phase V activities: (check one)

☐ a. The requirements of a Permanent Solution have been met. A completed Permanent Solution Statement and Report (BWSC104) will be submitted to DEP.

☐ b. The requirements for a Temporary Solution have been met. A completed Temporary Solution Statement and Report (BWSC104) will be submitted to DEP.

☐ 22. Submit a **Revised Phase V Completion Statement,** pursuant to 310 CMR 40.0894.

☐ 23. Submit a **Temporary Solution Status Report,** pursuant to 310 CMR 40.0898.

☐ 24. Submit a **Plan for the Application of Remedial Additives** near a sensitive receptor, pursuant to 310 CMR 40.0046(3).

a. Status of Site: (check one)

☐ i. Phase IV ☐ ii. Phase V ☐ iii. Remedy Operation Status ☐ iv. Temporary Solution

COMPREHENSIVE RESPONSE ACTION TRANSMITTAL FORM & PHASE I COMPLETION STATEMENT

Pursuant to 310 CMR 40.0484 (Subpart D) and 40.0800 (Subpart H)

D. PERSON UNDERTAKING RESPONSE ACTIONS:

1. Check all that apply: ☐ a. change in contact name ☐ b. change of address ☐ c. change in the person undertaking response actions

2. Name of Organization: UNIFIRST CORPORATION

3. Contact First Name: CATHERINE 4. Last Name: MALAGRIDA

5. Street: 68 JONSPIN RD 6. Title: ENV COMPLIANCE MANAGER

7. City/Town: WILMINGTON 8. State: MA 9. ZIP Code: 018871090

10. Telephone: 9786588888 11. Ext: 12. Email: catherine_malagrida@unifirst.com

E. RELATIONSHIP TO SITE OF PERSON UNDERTAKING RESPONSE ACTIONS: ☐ Check here to change relationship

☑ 1. RP or PRP ☐ a. Owner ☐ b. Operator ☐ c. Generator ☐ d. Transporter

☑ e. Other RP or PRP Specify: OTHER PRPS

☐ 2. Fiduciary, Secured Lender or Municipality with Exempt Status (as defined by M.G.L. c. 21E, s. 2)

☐ 3. Agency or Public Utility on a Right of Way (as defined by M.G.L. c. 21E, s. 5(j))

☐ 4. Any Other Person Undertaking Response Actions Specify Relationship:

F. REQUIRED ATTACHMENT AND SUBMITTALS:

DRAFT COPY

☐ 1. Check here if the Response Action(s) on which this opinion is based, if any, are (were) subject to any order(s), permit(s) and/or approval(s) issued by DEP or EPA. If the box is checked, you MUST attach a statement identifying the applicable provisions thereof.

☑ 2. Check here to certify that the Chief Municipal Officer and the Local Board of Health have been notified of the submittal of any Phase Reports to DEP.

☑ 3. Check here to certify that the Chief Municipal Officer and the Local Board of Health have been notified of the availability of a Phase III Remedial Action Plan.

☑ 4. Check here to certify that the Chief Municipal Officer and the Local Board of Health have been notified of the availability of a Phase IV Remedy Implementation Plan.

☑ 5. Check here to certify that the Chief Municipal Officer and the Local Board of Health have been notified of any field work involving the implementation of a Phase IV Remedial Action.

☐ 6. If submitting a Transfer of a Remedy Operation Status (as per 310 CMR 40.0893(5)), check here to certify that a statement detailing the compliance history for the person making this submittal (transferee) is attached.

☐ 7. If submitting a Modification of a Remedy Operation Status (as per 310 CMR 40.0893(5)), check here to certify that a statement detailing the compliance history for each new person making this submittal is attached.

☐ 8. Check here if any non-updatable information provided on this form is incorrect, e.g. Release Address/Location Aid. Send corrections to: BWSC.eDEP@Mass.Gov.

☑ 9. Check here to certify that the LSP Opinion containing the material facts, data including, but not limited to: pressure measurements, maps, graphs, or diagrams, and other information is attached.

G. CERTIFICATION OF PERSON UNDERTAKING RESPONSE ACTIONS:

1. I, _____, attest under the pains and penalties of perjury (i) that I have personally examined and am familiar with the information contained in this submittal, including any and all documents accompanying this transmittal form, (ii) that, based on my inquiry of those individuals immediately responsible for obtaining the information, the material information contained in this submittal is, to the best of my knowledge and belief, true, accurate and complete, and (iii) that I am fully authorized to make this attestation on behalf of the entity legally responsible for this submittal. I/the person or entity on whose behalf this submittal is made am/is aware that there are significant penalties, including, but not limited to, possible fines and imprisonment, for willfully submitting false, inaccurate, or incomplete information.

>*if Section B indicates that this is a* **Modification of a Remedy Operation Status (ROS),** I attest under the pains and penalties of perjury that I am fully authorized to act on behalf of all persons performing response actions under the ROS as stated in 310 CMR 40.0893(5)(d) to receive oral and written correspondence from MassDEP with respect to performance of response actions under the ROS, and to receive a statement of fee amount as per 4.03(3).

I understand that any material received by the Primary Representative from MassDEP shall be deemed received by all the persons performing response actions under the ROS, and I am aware that there are significant penalties, including, but not limited to, possible fines and imprisonment, for willfully submitting false, inaccurate or incomplete information.

2. By: _____ (Signature) 3. Title: ENV COMPLIANCE MANAGER

4. For: UNIFIRST CORPORATION (Name of person or entity recorded in Section D) 5. Date: _____ (mm/dd/yyyy)

☐ 6. Check here if the address of the person providing certification is different from address recorded in Section D.

7. Street: _____

8. City/Town: _____ 9. State: _____ 10. ZIP Code: _____

11. Telephone: _____ 12. Ext. _____ 13. Email: _____

Remedial System or Monitoring Program: 1 of: 6

BWSC108 -A

Release Tracking Number
3 - 23246

A. DESCRIPTION OF ACTIVE OPERATION AND MAINTENANCE ACTIVITY:

1. Type of Active Operation and Maintenance Activity: (check all that apply)

☐ a. Active Remedial System: (check all that apply)
- ☐ i. NAPL Recovery
- ☐ ii. Soil Vapor Extraction/Bioventing
- ☐ iii. Vapor-phase Carbon Adsorption
- ☐ iv. Groundwater Recovery
- ☐ v. Dual/Multi-phase Extraction
- ☐ vi. Aqueous-phase Carbon Adsorption
- ☐ vii. Air Stripping
- ☐ viii. Sparging/Biosparging
- ☐ ix. Cat/Thermal Oxidation
- ☐ x. Other Describe:

☑ b. Active Exposure Pathway Elimination Measure
Active Exposure Pathway Mitigation System to address (check one): ☑ i. Indoor Air ☐ ii. Drinking Water

☐ c. Application of Remedial Additives: (check all that apply)
- ☐ i. To the Subsurface
- ☐ ii. To Groundwater (Injection)
- ☐ iii. To the Surface (Including stockpiled soil)

☐ d. Active Remedial Monitoring Program Without the Application of Remedial Additives: (check all that apply; Sections C, D and E are not required; attach supporting information, data, maps and/or sketches needed by checking Section G5)
- ☐ i. Reactive Wall
- ☐ ii. Natural Attenuation
- ☐ iii. Other Describe:

2. Mode of Operation: (check one)
☑ a. Continuous ☐ b. Intermittent ☐ c. Pulsed ☐ d. One-time Event Only ☐ e. Other:

3. System Effluent/Discharge: (check all that apply)
- ☐ a. Sanitary Sewer/POTW
- ☐ b. Groundwater Re-infiltration/Re-injection: (check one) ☐ i. Downgradient ☐ ii. Upgradient
- ☑ c. Vapor-phase Discharge to Ambient Air (check one) ☑ i. Off-gas Controls ☐ ii. No Off-gas Controls
- ☐ d. Drinking Water Supply
- ☐ e. Surface Water (including Storm Drains)
- ☐ f. Other Describe:

DRAFT COPY

B. MONITORING FREQUENCY:

1. Reporting period that is the subject of this submittal: From: 6/[illegible]/2025 To: 12/15/2025
(mm/dd/yyyy) (mm/dd/yyyy)

2. Number of monitoring events during the reporting period: (check one)

☐ a. System Startup: (if applicable)
- ☐ i. Days 1, 3, 6, and then weekly thereafter, for the first month.
- ☐ ii. Other Describe:

☑ b. Post-system Startup (after first month) or Monitoring Program:
- ☐ i. Monthly
- ☐ ii. Quarterly
- ☐ iii. Annually
- ☑ iv. Other Describe: OPERATIONAL PARAMETERS QUARTERLY, OFFGAS MONTHLY

☐ 3. Check here to certify that the number of required monitoring events were conducted during the reporting period.

C. EFFLUENT/DISCHARGE REGULATION: (check one to indicate how the effluent/discharge limits were established)

☐ 1. NPDES: (check one) ☐ a. Remediation General Permit ☐ b. Individual Permit ☐ c. Emergency Exclusion
Effective Date of Permit: (mm/dd/yyyy)

☑ 2. MCP Performance Standard MCP Citations(s): WSC-94-150

☐ 3. DEP Approval Letter Date of Letter: (mm/dd/yyyy)

☐ 4. Other Describe:

D. WASTEWATER TREATMENT PLANT OPERATOR: (check one)

☐ 1. Required due to Remedial Wastewater Treatment Plant in place for more than 30 days.
a. Name: _____ b. Grade: _____
c. License No: _____ d. License Exp. Date: _____ (mm/dd/yyyy)

☐ 2. Not Required
☑ 3. Not Applicable

E. STATUS OF ACTIVE REMEDIAL SYSTEM, ACTIVE EXPOSURE PATHWAY MITIGATION MEASURE(AEPMM) OR ACTIVE REMEDIAL MONITORING PROGRAM DURING REPORTING PERIOD: (check all that apply)

☑ 1. The Active Remedial System or AEPMM was functional one or more days during the Reporting Period.
a. Days System was Fully Functional: 183 b. GW Recovered (gals): _____
c. NAPL Recovered (gals): _____ d. GW Discharged (gals): _____
e. Avg. Soil Gas Recovery Rate (scfm): 309 f. Avg. Sparging Rate (scfm): _____

☐ 2. Remedial Additives: (check all that apply)

☐ a. No Remedial Additives applied during the Reporting Period.
☐ b. Enhanced Bioremediation Additives applied: (total quantity applied at the site for the current reporting period)
☐ i. Nitrogen/Phosphorus:

Name of Additive	Date	Quantity	Units

☐ ii. Peroxides:

Name of Additive	Date	Quantity	Units

☐ iii. Microorganisms:

Name of Additive	Date	Quantity	Units

☐ iv. Other:

Name of Additive	Date	Quantity	Units

☐ c. Chemical oxidation/reduction additives applied: (total quantity applied at the site for the current reporting period)
☐ i. Permanganates:

Name of Additive	Date	Quantity	Units

☐ ii. Peroxides:

Name of Additive	Date	Quantity	Units

☐ iii. Persulfates:

Name of Additive	Date	Quantity	Units

☐ iv. Other:

Name of Additive	Date	Quantity	Units

DRAFT COPY

E. STATUS OF ACTIVE REMEDIAL SYSTEM, AEPMM OR ACTIVE REMEDIAL MONITORING PROGRAM DURING REPORTING PERIOD: (cont.)

☐ d. Other additives applied: (total quantity applied at the site for the current reporting period)

Name of Additive	Date	Quantity	Units

Name of Additive	Date	Quantity	Units

☐ e. Check here if any additional Remedial Additives were applied. Attach list of additional additives and include Name of Additive, Date Applied, Quantity Applied and Units (in gals. or lbs.)

F. SHUTDOWNS OF ACTIVE REMEDIAL SYSTEM, AEPMM OR ACTIVE REMEDIAL MONITORING PROGRAM: (check all that apply)

☐ 1. The Active Remedial System or AEPMM had unscheduled shutdowns on one or more occasions during the Reporting Period.

a. Number of Unscheduled Shutdowns: _____ b. Total Number of Days of Unscheduled Shutdowns: _____

c. Reason(s) for Unscheduled Shutdowns: _____

☐ 2. The Active Remedial System or AEPMM had scheduled shutdowns on one or more occasions during the Reporting Period.

a. Number of Scheduled Shutdowns: _____ b. Total Number of Days of Scheduled Shutdowns: _____

c. Reason(s) for Scheduled Shutdowns: _____

☐ 3. The Active Remedial System, AEPMM or Active Remedial Monitoring Program was permanently shutdown/discontinued during the Reporting Period.

a. Date of Final System or Monitoring Program Shutdown: _____ (mm/dd/yyyy)

☐ b. No Further Effluent Discharge

☐ c. No Further Application of Remedial Additives planned; sufficient monitoring completed to demonstrate compliance with 310 CMR 40.0046.

☐ d. No Further Submittals Planned.

☐ e. Other: Describe: _____

DRAFT COPY

G. SUMMARY STATEMENTS: (check all that apply for the current reporting period)

☑ 1. All Active Remedial System checks and effluent analyses required by the approved plan and/or permit were performed when applicable.

☑ 2. There were no significant problems or prolonged (>25% of reporting period) unscheduled shutdowns of the Active Remedial System.

☑ 3. The Active Remedial System, AEPMM or Active Remedial Monitoring Program operated in conformance with the MCP, and all applicable approval conditions and/or permits.

4. Indicate any Operational Problems or Notes:

50 TUFTS STREET SSDS

☐ 5. Check here if additional/supporting Information, data, maps, and/or sketches are attached to the form.

A. DESCRIPTION OF ACTIVE OPERATION AND MAINTENANCE ACTIVITY:

1. Type of Active Operation and Maintenance Activity: (check all that apply)

☐ a. Active Remedial System: (check all that apply)
- ☐ i. NAPL Recovery
- ☐ ii. Soil Vapor Extraction/Bioventing
- ☐ iii. Vapor-phase Carbon Adsorption
- ☐ iv. Groundwater Recovery
- ☐ v. Dual/Multi-phase Extraction
- ☐ vi. Aqueous-phase Carbon Adsorption
- ☐ vii. Air Stripping
- ☐ viii. Sparging/Biosparging
- ☐ ix. Cat/Thermal Oxidation
- ☐ x. Other Describe:

☑ b. Active Exposure Pathway Elimination Measure
Active Exposure Pathway Mitigation System to address (check one): ☑ i. Indoor Air ☐ ii. Drinking Water

☐ c. Application of Remedial Additives: (check all that apply)
- ☐ i. To the Subsurface
- ☐ ii. To Groundwater (Injection)
- ☐ iii. To the Surface (Including stockpiled soil)

☐ d. Active Remedial Monitoring Program Without the Application of Remedial Additives: (check all that apply; Sections C, D and E are not required; attach supporting information, data, maps and/or sketches needed by checking Section G5)
- ☐ i. Reactive Wall
- ☐ ii. Natural Attenuation
- ☐ iii. Other Describe:

2. Mode of Operation: (check one)
☑ a. Continuous ☐ b. Intermittent ☐ c. Pulsed ☐ d. One-time Event Only ☐ e. Other:

3. System Effluent/Discharge: (check all that apply)
- ☐ a. Sanitary Sewer/POTW
- ☐ b. Groundwater Re-infiltration/Re-injection: (check one) ☐ i. Downgradient ☐ ii. Upgradient
- ☑ c. Vapor-phase Discharge to Ambient Air (check one) ☐ i. Off-gas Controls ☑ ii. No Off-gas Controls
- ☐ d. Drinking Water Supply
- ☐ e. Surface Water (including Storm Drains)
- ☐ f. Other Describe:

DRAFT COPY

B. MONITORING FREQUENCY:

1. Reporting period that is the subject of this submittal: From: 6/[illegible]/2025 To: 12/15/2025
(mm/dd/yyyy) (mm/dd/yyyy)

2. Number of monitoring events during the reporting period: (check one)
☐ a. System Startup: (if applicable)
- ☐ i. Days 1, 3, 6, and then weekly thereafter, for the first month.
- ☐ ii. Other Describe:

☑ b. Post-system Startup (after first month) or Monitoring Program:
- ☐ i. Monthly
- ☑ ii. Quarterly
- ☐ iii. Annually
- ☐ iv. Other Describe:

☐ 3. Check here to certify that the number of required monitoring events were conducted during the reporting period.

C. EFFLUENT/DISCHARGE REGULATION: (check one to indicate how the effluent/discharge limits were established)

☐ 1. NPDES: (check one) ☐ a. Remediation General Permit ☐ b. Individual Permit ☐ c. Emergency Exclusion
Effective Date of Permit: (mm/dd/yyyy)

☑ 2. MCP Performance Standard MCP Citations(s): WSC-94-150

☐ 3. DEP Approval Letter Date of Letter: (mm/dd/yyyy)

☐ 4. Other Describe:

D. WASTEWATER TREATMENT PLANT OPERATOR: (check one)

☐ 1. Required due to Remedial Wastewater Treatment Plant in place for more than 30 days.
a. Name: _____ b. Grade: _____
c. License No: _____ d. License Exp. Date: _____ (mm/dd/yyyy)

☐ 2. Not Required
☑ 3. Not Applicable

E. STATUS OF ACTIVE REMEDIAL SYSTEM, ACTIVE EXPOSURE PATHWAY MITIGATION MEASURE(AEPMM) OR ACTIVE REMEDIAL MONITORING PROGRAM DURING REPORTING PERIOD: (check all that apply)

☑ 1. The Active Remedial System or AEPMM was functional one or more days during the Reporting Period.
a. Days System was Fully Functional: 41 b. GW Recovered (gals): _____
c. NAPL Recovered (gals): _____ d. GW Discharged (gals): _____
e. Avg. Soil Gas Recovery Rate (scfm): 126 f. Avg. Sparging Rate (scfm): _____

☐ 2. Remedial Additives: (check all that apply)

☐ a. No Remedial Additives applied during the Reporting Period.
☐ b. Enhanced Bioremediation Additives applied: (total quantity applied at the site for the current reporting period)
☐ i. Nitrogen/Phosphorus:

Name of Additive	Date	Quantity	Units

☐ ii. Peroxides:

Name of Additive	Date	Quantity	Units

☐ iii. Microorganisms:

Name of Additive	Date	Quantity	Units

☐ iv. Other:

Re: Groundwater Sampling
60 Tufts Street
Somerville, Massachusetts

Thank you for permitting GEI to conduct groundwater sampling at your property located at 60 Tufts Street in Somerville, Massachusetts. Following groundwater sampling, we are providing you with a "Notice of Environmental Sampling Form (BWSC-123)," as required by the Massachusetts Department of Environmental Protection (MassDEP).

Thank you for your continued assistance. Please contact me at 781-721-4012 or igladstone@geiconsultants.com if you have any questions.

Sincerely,

GEI CONSULTANTS, INC.

NOTICE OF ENVIRONMENTAL SAMPLING

As required by 310 CMR 40.1403(10) of the Massachusetts Contingency Plan

A. The address of the disposal site related to this Notice and Release Tracking Number (provided above):

1. Street Address: 50 Tufts Street

City/Town: Somerville Zip Code: 02145-4129

B. This notice is being provided to the following party:

1. Name: Director

2. Street Address: Sanctuary Condominium Trust, Charlesgate, 867 Boylston St

City/Town: Boston, MA Zip Code: 02116

C. This notice is being given to inform its recipient (the party listed in Section B):

☑ 1. That environmental sampling ~~will be~~/has been conducted at property owned by the recipient of this notice.

☐ 2. Of the results of environmental sampling conducted at property owned by the recipient of this notice.

☐ 3. Check to indicate if the analytical results are attached. (If item 2. above is checked, the analytical results from the environmental sampling must be attached to this notice.)

D. Location of the property where the environmental sampling ~~will be~~/has been conducted:

1. Street Address: 60 Tufts Street

City/Town: Somerville, MA Zip Code: 02145-4110

2. MCP phase of work during which the sampling ~~will be~~/has been conducted:

☐ Immediate Response Action
☐ Release Abatement Measure
☐ Utility-related Abatement Measure
☐ Phase I Initial Site Investigation
☐ Phase II Comprehensive Site Assessment
☐ Phase III Feasibility Evaluation
☐ Phase IV Remedy Implementation Plan
☑ Phase V/Remedy Operation Status
☐ Post-Temporary Solution Operation, Maintenance and Monitoring
☐ Other _____ (specify)

3. Description of property where sampling ~~will be~~/has been conducted:

☑ residential ☐ commercial ☐ industrial ☐ school/playground ☑ Other Condominiums (specify)

4. Description of the sampling locations and types (e.g., soil, groundwater, indoor air, soil gas) to the extent known at the time of this notice.

NOTICE OF ENVIRONMENTAL SAMPLING

As required by 310 CMR 40.1403(10) of the Massachusetts Contingency Plan

MASSACHUSETTS REGULATIONS THAT REQUIRE THIS NOTICE

This notice is being provided pursuant to the Massachusetts Contingency Plan and the notification requirement at 310 CMR 40.1403(10). The Massachusetts Contingency Plan is a state regulation that specifies requirements for parties who are taking actions to address releases of chemicals (oil or hazardous material) to the environment.

THE PERSON(S) PROVIDING THIS NOTICE

This notice has been sent to you by the party who is addressing a release of oil or hazardous material to the environment at the location listed in **Section A** on the reverse side of this form. (The regulations refer to the area where the oil or hazardous material is present as the "disposal site".)

PURPOSE OF THIS NOTICE

When environmental samples are taken as part of an investigation of a release for which a notification to MassDEP has been made under the Massachusetts Contingency Plan (310 CMR 40.0300) on behalf of someone other than the owner of the property, the regulations require that the property owner (listed in **Section B** on the reverse side of this form) be given notice of the environmental sampling. The regulations also require that the property owner subsequently receive the analytical results following the analysis of the environmental samples.

Section C on the reverse side of this form indicates the circumstance under which you are receiving this notice at this time. If you are receiving this notice to inform you of the analytical results following the analysis of the environmental samples, you should also have received, as an attachment, a copy of analytical results. These results should indicate the number and type(s) of samples (e.g., soil, groundwater) analyzed, any chemicals identified, and the measured concentrations of those chemicals.

Section D on the reverse side of this form identifies the property where the environmental sampling will be/has been conducted, provides a description of the sampling locations within the property, and indicates the phase of work under the Massachusetts Contingency Plan regulatory process during which the samples will be/were collected.

FOR MORE INFORMATION

Information about the general process for addressing releases of oil or hazardous material under the Massachusetts Contingency Plan and related public involvement opportunities may be found at http://www.mass.gov/eea/agencies/massdep/cleanup. For more information regarding this notice, you may contact the party listed in **Section E** on the reverse side of this form. Information about the disposal site identified in Section A is also available in files at the Massachusetts Department of Environmental Protection. See http://public.dep.state.ma.us/SearchableSites2/Search.aspx to view site-specific files on-line or http://mass.gov/eea/agencies/massdep/about/contacts/conduct-a-file-review.html if you would like to make an appointment to see these files in person. Please reference the **Release Tracking Number** listed in the upper right hand corner on the reverse side of this form when making file review appointments.

Re: Groundwater Sampling Results
60 Tufts Street
Somerville, Massachusetts

To Whom It May Concern:

On behalf of UniFirst Corporation, GEI Consultants, Inc. is providing results of the groundwater sampling conducted at 60 Tufts Street on November 12, 2025. The sampling was conducted as part of our investigation related to the site at 50 Tufts Street in Somerville, Massachusetts. We collected groundwater samples from monitoring wells MW201 and MW202, located on your property.

The groundwater samples were submitted for chemical testing for volatile organic compounds (VOCs). We have attached a summary table of the chemicals detected in the groundwater samples along with the previous sampling results, and the laboratory data sheets for the recent sampling.

Thank you for permitting GEI to conduct groundwater sampling at your property.

Individuals and public officials may request additional public involvement activities under the Massachusetts Contingency Plan (MCP; 310 CMR 40.1403(10) and 40.1404). The property owner may also request additional documentation, such as that listed at 310 CMR 40.0017(3), associated with the above-referenced samples. We will provide such additional documentation within 30 days of our receipt of such a request.

We appreciate your continued cooperation throughout the sampling process. If you have any immediate questions regarding the water testing results, please do not hesitate to contact me at 781.721.4012 or igladstone@geiconsultants.com.

Sincerely,

GEI CONSULTANTS, INC.

NOTICE OF ENVIRONMENTAL SAMPLING

As required by 310 CMR 40.1403(10) of the Massachusetts Contingency Plan

A. The address of the disposal site related to this Notice and Release Tracking Number (provided above):

1. Street Address: 50 Tufts Street

City/Town: Somerville Zip Code: 02145-4129

B. This notice is being provided to the following party:

1. Name: Property Manager
2. Street Address: Sanctuary Condominium Trust, Charlesgate, 867 Boylston St

City/Town: Boston, MA Zip Code: 02116

C. This notice is being given to inform its recipient (the party listed in Section B):

☑ 1. That environmental sampling ~~will be~~/has been conducted at property owned by the recipient of this notice.

☑ 2. Of the results of environmental sampling conducted at property owned by the recipient of this notice.

☑ 3. Check to indicate if the analytical results are attached. (If item 2. above is checked, the analytical results from the environmental sampling must be attached to this notice.)

D. Location of the property where the environmental sampling ~~will be~~/has been conducted:

1. Street Address: 60 Tufts Street

City/Town: Somerville, MA Zip Code: 02145-4110

2. MCP phase of work during which the sampling ~~will be~~/has been conducted:

☐ Immediate Response Action	☐ Phase III Feasibility Evaluation
☐ Release Abatement Measure	☐ Phase IV Remedy Implementation Plan
☐ Utility-related Abatement Measure	☑ Phase V/Remedy Operation Status
☐ Phase I Initial Site Investigation	☐ Post-Temporary Solution Operation, Maintenance and Monitoring
☐ Phase II Comprehensive Site Assessment	☐ Other _____ (specify)

3. Description of property where sampling ~~will be~~/has been conducted:

☑ residential ☐ commercial ☐ industrial ☐ school/playground ☑ Other Condominiums (specify)

4. Description of the sampling locations and types (e.g., soil, groundwater, indoor air, soil gas) to the extent known at the time of this notice.

General Notes:

1. Analytes detected in at least one sample are reported here. For a complete list of analytes refer to the laboratory data reports.
2. ft bgs = feet below ground surface.
3. µg/l = micrograms per liter.
4. "< " = The analyte was not detected at a concentration above the specified reporting.
5. SHA = Sanborn Head & Associates.
6. FD = Field Duplicate Sample.
7. NT = Not Tested.
8. * = micrograms CaCO3 per liter

Qualifying Notes:

B The analyte found in associated method blank.
C+ The result has a high bias due to surrogate recovery above upper control limits.
E The value exceeds the calibration range.
F+ The result has a high bias due to matrix spike recovery above upper control limits.
F- The result has a low bias due to matrix spike recovery below lower control limits.
G The result is estimated due to duplicate precision outside control limits.
J The reported result is below the laboratory reporting limit and is estimated.
J+ The reported result is estimated.
K- The result has a low bias due to blank spike or laboratory control sample recovery below lower control limits.
K+ The result has a high bias due to blank spike or laboratory control sample recovery above upper control limits.
R The result is rejected due to gross exceedence of minimum response factor criteria.

Re: Groundwater Sampling
120 Washington Street
Somerville, Massachusetts

Thank you for permitting GEI to conduct groundwater sampling at your property located at 120 Washington Street in Somerville, Massachusetts. Following groundwater sampling, we are providing you with a "Notice of Environmental Sampling Form (BWSC-123)," as required by the Massachusetts Department of Environmental Protection (MassDEP).

Thank you for your continued assistance. Please contact me at 781-721-4012 or igladstone@geiconsultants.com if you have any questions.

Sincerely,

GEI CONSULTANTS, INC.

NOTICE OF ENVIRONMENTAL SAMPLING

As required by 310 CMR 40.1403(10) of the Massachusetts Contingency Plan

A. The address of the disposal site related to this Notice and Release Tracking Number (provided above):

1. Street Address: 50 Tufts Street

City/Town: Somerville Zip Code: 02145-4129

B. This notice is being provided to the following party:

1. Name: ITS Realty LLC

2. Street Address: 87 Baker Street

City/Town: Belmont, MA Zip Code: 02478

C. This notice is being given to inform its recipient (the party listed in Section B):

☑ 1. That environmental sampling ~~will be~~/has been conducted at property owned by the recipient of this notice.

☐ 2. Of the results of environmental sampling conducted at property owned by the recipient of this notice.

☐ 3. Check to indicate if the analytical results are attached. (If item 2. above is checked, the analytical results from the environmental sampling must be attached to this notice.)

D. Location of the property where the environmental sampling ~~will be~~/has been conducted:

1. Street Address: 120 Washington Street

City/Town: Somerville, MA Zip Code: 02143

2. MCP phase of work during which the sampling ~~will be~~/has been conducted:

☐ Immediate Response Action	☐ Phase III Feasibility Evaluation
☐ Release Abatement Measure	☐ Phase IV Remedy Implementation Plan
☐ Utility-related Abatement Measure	☑ Phase V/Remedy Operation Status
☐ Phase I Initial Site Investigation	☐ Post-Temporary Solution Operation, Maintenance and Monitoring
☐ Phase II Comprehensive Site Assessment	☐ Other _____ (specify)

3. Description of property where sampling ~~will be~~/has been conducted:

☐ residential ☑ commercial ☐ industrial ☐ school/playground ☑ Other parking lot (specify)

4. Description of the sampling locations and types (e.g., soil, groundwater, indoor air, soil gas) to the extent known at the time of this notice.

Annual Groundwater Sampling

NOTICE OF ENVIRONMENTAL SAMPLING

As required by 310 CMR 40.1403(10) of the Massachusetts Contingency Plan

MASSACHUSETTS REGULATIONS THAT REQUIRE THIS NOTICE

This notice is being provided pursuant to the Massachusetts Contingency Plan and the notification requirement at 310 CMR 40.1403(10). The Massachusetts Contingency Plan is a state regulation that specifies requirements for parties who are taking actions to address releases of chemicals (oil or hazardous material) to the environment.

THE PERSON(S) PROVIDING THIS NOTICE

This notice has been sent to you by the party who is addressing a release of oil or hazardous material to the environment at the location listed in **Section A** on the reverse side of this form. (The regulations refer to the area where the oil or hazardous material is present as the "disposal site".)

PURPOSE OF THIS NOTICE

When environmental samples are taken as part of an investigation of a release for which a notification to MassDEP has been made under the Massachusetts Contingency Plan (310 CMR 40.0300) on behalf of someone other than the owner of the property, the regulations require that the property owner (listed in **Section B** on the reverse side of this form) be given notice of the environmental sampling. The regulations also require that the property owner subsequently receive the analytical results following the analysis of the environmental samples.

Section C on the reverse side of this form indicates the circumstance under which you are receiving this notice at this time. If you are receiving this notice to inform you of the analytical results following the analysis of the environmental samples, you should also have received, as an attachment, a copy of analytical results. These results should indicate the number and type(s) of samples (e.g., soil, groundwater) analyzed, any chemicals identified, and the measured concentrations of those chemicals.

Section D on the reverse side of this form identifies the property where the environmental sampling will be/has been conducted, provides a description of the sampling locations within the property, and indicates the phase of work under the Massachusetts Contingency Plan regulatory process during which the samples will be/were collected.

FOR MORE INFORMATION

Information about the general process for addressing releases of oil or hazardous material under the Massachusetts Contingency Plan and related public involvement opportunities may be found at http://www.mass.gov/eea/agencies/massdep/cleanup. For more information regarding this notice, you may contact the party listed in **Section E** on the reverse side of this form. Information about the disposal site identified in Section A is also available in files at the Massachusetts Department of Environmental Protection. See http://public.dep.state.ma.us/SearchableSites2/Search.aspx to view site-specific files on-line or http://mass.gov/eea/agencies/massdep/about/contacts/conduct-a-file-review.html if you would like to make an appointment to see these files in person. Please reference the **Release Tracking Number** listed in the upper right hand corner on the reverse side of this form when making file review appointments.

Re: Groundwater Sampling Results
120 Washington Street
Somerville, Massachusetts

To Whom It May Concern:

On behalf of UniFirst Corporation, GEI Consultants, Inc. is providing results of the groundwater sampling conducted at 120 Washington Street on November 10, 2025. The sampling was conducted as part of our investigation related to the site at 50 Tufts Street in Somerville, Massachusetts. We collected groundwater samples from monitoring wells MW117S, MW117T, and MW117D, located on your property.

The groundwater samples were submitted for chemical testing for volatile organic compounds (VOCs). We have attached a summary table of the chemicals detected in the groundwater samples along with the previous sampling results, and the laboratory data sheets for the recent sampling.

Thank you for permitting GEI to conduct groundwater sampling at your property.

Individuals and public officials may request additional public involvement activities under the Massachusetts Contingency Plan (MCP; 310 CMR 40.1403(10) and 40.1404). The property owner may also request additional documentation, such as that listed at 310 CMR 40.0017(3), associated with the above-referenced samples. We will provide additional documentation within 30 days of our receipt of such a request.

We appreciate your continued cooperation throughout the sampling process. If you have any immediate questions regarding the water testing results, please do not hesitate to contact me at 781.721.4012 or igladstone@geiconsultants.com.

Sincerely,

GEI CONSULTANTS, INC.

General Notes:

1. Analytes detected in at least one sample are reported here. For a complete list of analytes refer to the laboratory data reports.
2. ft bgs = feet below ground surface.
3. µg/l = micrograms per liter.
4. "< " = The analyte was not detected at a concentration above the specified reporting.
5. SHA = Sanborn Head & Associates.
6. FD = Field Duplicate Sample.
7. NT = Not Tested.
8. * = micrograms CaCO3 per liter

Qualifying Notes:

B The analyte found in associated method blank.
C+ The result has a high bias due to surrogate recovery above upper control limits.
E The value exceeds the calibration range.
F+ The result has a high bias due to matrix spike recovery above upper control limits.
F- The result has a low bias due to matrix spike recovery below lower control limits.
G The result is estimated due to duplicate precision outside control limits.
J The reported result is below the laboratory reporting limit and is estimated.
J+ The reported result is estimated.
K- The result has a low bias due to blank spike or laboratory control sample recovery below lower control limits.
K+ The result has a high bias due to blank spike or laboratory control sample recovery above upper control limits.
R The result is rejected due to gross exceedence of minimum response factor criteria.

General Notes:

1. Analytes detected in at least one sample are reported here. For a complete list of analytes refer to the laboratory data reports.
2. ft bgs = feet below ground surface.
3. µg/l = micrograms per liter.
4. "< " = The analyte was not detected at a concentration above the specified reporting.
5. SHA = Sanborn Head & Associates.
6. FD = Field Duplicate Sample.
7. NT = Not Tested.
8. * = micrograms CaCO3 per liter

Qualifying Notes:

B The analyte found in associated method blank.
C+ The result has a high bias due to surrogate recovery above upper control limits.
E The value exceeds the calibration range.
F+ The result has a high bias due to matrix spike recovery above upper control limits.
F- The result has a low bias due to matrix spike recovery below lower control limits.
G The result is estimated due to duplicate precision outside control limits.
J The reported result is below the laboratory reporting limit and is estimated.
J+ The reported result is estimated.
K- The result has a low bias due to blank spike or laboratory control sample recovery below lower control limits.
K+ The result has a high bias due to blank spike or laboratory control sample recovery above upper control limits.
R The result is rejected due to gross exceedence of minimum response factor criteria.

Dear Ms. Wells:

Re: Groundwater Sampling
Certain "Public Ways", 90 Washington Street, and
Michael E. Capuano Early Childhood Center
Somerville, Massachusetts

Thank you for permitting GEI to conduct groundwater sampling at the Capuano Early Childhood Center, 90 Washington Street, and on certain public ways in Somerville, Massachusetts. Following groundwater sampling, we are providing you with a "Notice of Environmental Sampling Form (BWSC-123)," as required by the Massachusetts Department of Environmental Protection (MassDEP).

Thank you for your continued assistance. Please contact me at 781-721-4012 or igladstone@geiconsultants.com if you have any questions.

Sincerely,

GEI CONSULTANTS, INC.

NOTICE OF ENVIRONMENTAL SAMPLING

As required by 310 CMR 40.1403(10) of the Massachusetts Contingency Plan

A. The address of the disposal site related to this Notice and Release Tracking Number (provided above):

1. Street Address: 50 Tufts Street

City/Town: Somerville Zip Code: 02145-4129

B. This notice is being provided to the following party:

1. Name: Ms. Kimberly Wells, City Clerk

2. Street Address: 93 Highland Avenue, 1st Floor

City/Town: Somerville, MA Zip Code: 02143

C. This notice is being given to inform its recipient (the party listed in Section B):

☑ 1. That environmental sampling ~~will be~~/has been conducted at property owned by the recipient of this notice.

☐ 2. Of the results of environmental sampling conducted at property owned by the recipient of this notice.

☐ 3. Check to indicate if the analytical results are attached. (If item 2. above is checked, the analytical results from the environmental sampling must be attached to this notice.)

D. Location of the property where the environmental sampling ~~will be~~/has been conducted:

1. Street Address: Capuano Center, 90 Washington Street, Somerville City Streets

City/Town: Somerville, MA Zip Code: 02145

2. MCP phase of work during which the sampling ~~will be~~/has been conducted:

☐ Immediate Response Action
☐ Release Abatement Measure
☐ Utility-related Abatement Measure
☐ Phase I Initial Site Investigation
☐ Phase II Comprehensive Site Assessment
☐ Phase III Feasibility Evaluation
☐ Phase IV Remedy Implementation Plan
☑ Phase V/Remedy Operation Status
☐ Post-Temporary Solution Operation, Maintenance and Monitoring
☐ Other _____ (specify)

3. Description of property where sampling ~~will be~~/has been conducted:

☐ residential ☐ commercial ☐ industrial ☑ school/playground ☑ Other City Streets (specify)

4. Description of the sampling locations and types (e.g., soil, groundwater, indoor air, soil gas) to the extent known at the time of this notice.

Semi-Annual Groundwater Sampling

NOTICE OF ENVIRONMENTAL SAMPLING

As required by 310 CMR 40.1403(10) of the Massachusetts Contingency Plan

MASSACHUSETTS REGULATIONS THAT REQUIRE THIS NOTICE

This notice is being provided pursuant to the Massachusetts Contingency Plan and the notification requirement at 310 CMR 40.1403(10). The Massachusetts Contingency Plan is a state regulation that specifies requirements for parties who are taking actions to address releases of chemicals (oil or hazardous material) to the environment.

THE PERSON(S) PROVIDING THIS NOTICE

This notice has been sent to you by the party who is addressing a release of oil or hazardous material to the environment at the location listed in **Section A** on the reverse side of this form. (The regulations refer to the area where the oil or hazardous material is present as the "disposal site".)

PURPOSE OF THIS NOTICE

When environmental samples are taken as part of an investigation of a release for which a notification to MassDEP has been made under the Massachusetts Contingency Plan (310 CMR 40.0300) on behalf of someone other than the owner of the property, the regulations require that the property owner (listed in **Section B** on the reverse side of this form) be given notice of the environmental sampling. The regulations also require that the property owner subsequently receive the analytical results following the analysis of the environmental samples.

Section C on the reverse side of this form indicates the circumstance under which you are receiving this notice at this time. If you are receiving this notice to inform you of the analytical results following the analysis of the environmental samples, you should also have received, as an attachment, a copy of analytical results. These results should indicate the number and type(s) of samples (e.g., soil, groundwater) analyzed, any chemicals identified, and the measured concentrations of those chemicals.

Section D on the reverse side of this form identifies the property where the environmental sampling will be/has been conducted, provides a description of the sampling locations within the property, and indicates the phase of work under the Massachusetts Contingency Plan regulatory process during which the samples will be/were collected.

FOR MORE INFORMATION

Information about the general process for addressing releases of oil or hazardous material under the Massachusetts Contingency Plan and related public involvement opportunities may be found at http://www.mass.gov/eea/agencies/massdep/cleanup. For more information regarding this notice, you may contact the party listed in **Section E** on the reverse side of this form. Information about the disposal site identified in Section A is also available in files at the Massachusetts Department of Environmental Protection. See http://public.dep.state.ma.us/SearchableSites2/Search.aspx to view site-specific files on-line or http://mass.gov/eea/agencies/massdep/about/contacts/conduct-a-file-review.html if you would like to make an appointment to see these files in person. Please reference the **Release Tracking Number** listed in the upper right hand corner on the reverse side of this form when making file review appointments.

Re: Groundwater Sampling Results
Certain "Public Ways" and Michael E. Capuano Early Childhood Center
Somerville, Massachusetts
MassDEP RTN 3-23246

Dear Ms. Wells:

On behalf of UniFirst Corporation, GEI Consultants, Inc. is providing results for groundwater samples collected on November 10, November 11, November 12, and November 13, 2025, from groundwater monitoring wells located on municipal property. The sampling was conducted as part of our investigation related to the site at 50 Tufts Street in Somerville, Massachusetts. We:

- Collected groundwater samples from twenty one shallow monitoring wells (GEO-4, GEO-5, GEO-6, MW102, MW103, MW106, MW107, MW108, MW109, MW111R, MW112A, MW115/115R, MW118S, MW119S, MW120S, MW121S, MW122, MW301, MW401S, MW405, MW406), two monitoring wells screened in till (MW118T and MW119T), and six monitoring wells screened in bedrock (MW118D, MW120D, MW121D, MW116, MW401D, MW402) on November 10 through November 13, 2025. We collected a duplicate sample (MW900) from MW116.

Groundwater samples were submitted for chemical testing for volatile organic compounds (VOCs), and one groundwater sample (MW112A) was also tested for manganese and general chemistry compounds including alkalinity, chloride, nitrates, and sulfates. We have attached a summary table of the chemicals detected in the groundwater samples along with the previous sampling results, the laboratory data sheets for the recent sampling, and a figure showing the sampling locations.

Thank you for permitting GEI to conduct groundwater sampling at the Capuano Early Childhood Center, 90 Washington Street, and on certain public ways in Somerville, Massachusetts.

Individuals and public officials may request additional public involvement activities under the Massachusetts Contingency Plan (MCP; 310 CMR 40.1403[10] and 40.1404). The property owner may also request additional documentation, such as that listed at 310 CMR 40.0017(3), associated with the above-referenced samples. We will provide additional documentation within 30 days of our receipt of such a request.

We appreciate your continued cooperation throughout the sampling process. If you have any immediate questions regarding the water testing results, please do not hesitate to contact me at 781.721.4012 or igladstone@geiconsultants.com.

Sincerely,

GEI CONSULTANTS, INC.

NOTICE OF ENVIRONMENTAL SAMPLING

As required by 310 CMR 40.1403(10) of the Massachusetts Contingency Plan

MASSACHUSETTS REGULATIONS THAT REQUIRE THIS NOTICE

This notice is being provided pursuant to the Massachusetts Contingency Plan and the notification requirement at 310 CMR 40.1403(10). The Massachusetts Contingency Plan is a state regulation that specifies requirements for parties who are taking actions to address releases of chemicals (oil or hazardous material) to the environment.

THE PERSON(S) PROVIDING THIS NOTICE

This notice has been sent to you by the party who is addressing a release of oil or hazardous material to the environment at the location listed in **Section A** on the reverse side of this form. (The regulations refer to the area where the oil or hazardous material is present as the "disposal site".)

PURPOSE OF THIS NOTICE

When environmental samples are taken as part of an investigation of a release for which a notification to MassDEP has been made under the Massachusetts Contingency Plan (310 CMR 40.0300) on behalf of someone other than the owner of the property, the regulations require that the property owner (listed in **Section B** on the reverse side of this form) be given notice of the environmental sampling. The regulations also require that the property owner subsequently receive the analytical results following the analysis of the environmental samples.

Section C on the reverse side of this form indicates the circumstance under which you are receiving this notice at this time. If you are receiving this notice to inform you of the analytical results following the analysis of the environmental samples, you should also have received, as an attachment, a copy of analytical results. These results should indicate the number and type(s) of samples (e.g., soil, groundwater) analyzed, any chemicals identified, and the measured concentrations of those chemicals.

Section D on the reverse side of this form identifies the property where the environmental sampling will be/has been conducted, provides a description of the sampling locations within the property, and indicates the phase of work under the Massachusetts Contingency Plan regulatory process during which the samples will be/were collected.

FOR MORE INFORMATION

Information about the general process for addressing releases of oil or hazardous material under the Massachusetts Contingency Plan and related public involvement opportunities may be found at http://www.mass.gov/eea/agencies/massdep/cleanup. For more information regarding this notice, you may contact the party listed in **Section E** on the reverse side of this form. Information about the disposal site identified in Section A is also available in files at the Massachusetts Department of Environmental Protection. See http://public.dep.state.ma.us/SearchableSites2/Search.aspx to view site-specific files on-line or http://mass.gov/eea/agencies/massdep/about/contacts/conduct-a-file-review.html if you would like to make an appointment to see these files in person. Please reference the **Release Tracking Number** listed in the upper right hand corner on the reverse side of this form when making file review appointments.

General Notes:

1. Analytes detected in at least one sample are reported here. For a complete list of analytes refer to the laboratory data reports.
2. ft bgs = feet below ground surface.
3. µg/l = micrograms per liter.
4. "< " = The analyte was not detected at a concentration above the specified reporting.
5. SHA = Sanborn Head & Associates.
6. FD = Field Duplicate Sample.
7. NT = Not Tested.
8. * = micrograms CaCO3 per liter

Qualifying Notes:

B The analyte found in associated method blank.
C+ The result has a high bias due to surrogate recovery above upper control limits.
E The value exceeds the calibration range.
F+ The result has a high bias due to matrix spike recovery above upper control limits.
F- The result has a low bias due to matrix spike recovery below lower control limits.
G The result is estimated due to duplicate precision outside control limits.
J The reported result is below the laboratory reporting limit and is estimated.
J+ The reported result is estimated.
K- The result has a low bias due to blank spike or laboratory control sample recovery below lower control limits.
K+ The result has a high bias due to blank spike or laboratory control sample recovery above upper control limits.
R The result is rejected due to gross exceedence of minimum response factor criteria.

General Notes:

1. Analytes detected in at least one sample are reported here. For a complete list of analytes refer to the laboratory data reports.
2. ft bgs = feet below ground surface.
3. µg/l = micrograms per liter.
4. "< " = The analyte was not detected at a concentration above the specified reporting.
5. SHA = Sanborn Head & Associates.
6. FD = Field Duplicate Sample.
7. NT = Not Tested.
8. * = micrograms CaCO3 per liter

Qualifying Notes:

B The analyte found in associated method blank.
C+ The result has a high bias due to surrogate recovery above upper control limits.
E The value exceeds the calibration range.
F+ The result has a high bias due to matrix spike recovery above upper control limits.
F- The result has a low bias due to matrix spike recovery below lower control limits.
G The result is estimated due to duplicate precision outside control limits.
J The reported result is below the laboratory reporting limit and is estimated.
J+ The reported result is estimated.
K- The result has a low bias due to blank spike or laboratory control sample recovery below lower control limits.
K+ The result has a high bias due to blank spike or laboratory control sample recovery above upper control limits.
R The result is rejected due to gross exceedence of minimum response factor criteria.

General Notes:

1. Analytes detected in at least one sample are reported here. For a complete list of analytes refer to the laboratory data reports.
2. ft bgs = feet below ground surface.
3. µg/l = micrograms per liter.
4. "< " = The analyte was not detected at a concentration above the specified reporting.
5. SHA = Sanborn Head & Associates.
6. FD = Field Duplicate Sample.
7. NT = Not Tested.
8. * = micrograms CaCO3 per liter

Qualifying Notes:

B The analyte found in associated method blank.
C+ The result has a high bias due to surrogate recovery above upper control limits.
E The value exceeds the calibration range.
F+ The result has a high bias due to matrix spike recovery above upper control limits.
F- The result has a low bias due to matrix spike recovery below lower control limits.
G The result is estimated due to duplicate precision outside control limits.
J The reported result is below the laboratory reporting limit and is estimated.
J+ The reported result is estimated.
K- The result has a low bias due to blank spike or laboratory control sample recovery below lower control limits.
K+ The result has a high bias due to blank spike or laboratory control sample recovery above upper control limits.
R The result is rejected due to gross exceedence of minimum response factor criteria.

6. FD = Field Duplicate Sample.
7. NT = Not Tested.
8. * = micrograms CaCO3 per liter

Qualifying Notes:

B The analyte found in associated method blank.
C+ The result has a high bias due to surrogate recovery above upper control limits.
E The value exceeds the calibration range.
F+ The result has a high bias due to matrix spike recovery above upper control limits.
F- The result has a low bias due to matrix spike recovery below lower control limits.
G The result is estimated due to duplicate precision outside control limits.
J The reported result is below the laboratory reporting limit and is estimated.
J+ The reported result is estimated.
K- The result has a low bias due to blank spike or laboratory control sample recovery below lower control limits.
K+ The result has a high bias due to blank spike or laboratory control sample recovery above upper control limits.
R The result is rejected due to gross exceedence of minimum response factor criteria.

General Notes:

1. Analytes detected in at least one sample are reported here. For a complete list of analytes refer to the laboratory data reports.
2. ft bgs = feet below ground surface.
3. µg/l = micrograms per liter.
4. "< " = The analyte was not detected at a concentration above the specified reporting.
5. SHA = Sanborn Head & Associates.
6. FD = Field Duplicate Sample.
7. NT = Not Tested.
8. * = micrograms CaCO3 per liter

Qualifying Notes:

B The analyte found in associated method blank.
C+ The result has a high bias due to surrogate recovery above upper control limits.
E The value exceeds the calibration range.
F+ The result has a high bias due to matrix spike recovery above upper control limits.
F- The result has a low bias due to matrix spike recovery below lower control limits.
G The result is estimated due to duplicate precision outside control limits.
J The reported result is below the laboratory reporting limit and is estimated.
J+ The reported result is estimated.
K- The result has a low bias due to blank spike or laboratory control sample recovery below lower control limits.
K+ The result has a high bias due to blank spike or laboratory control sample recovery above upper control limits.
R The result is rejected due to gross exceedence of minimum response factor criteria.

General Notes:

1. Analytes detected in at least one sample are reported here. For a complete list of analytes refer to the laboratory data reports.
2. ft bgs = feet below ground surface.
3. µg/l = micrograms per liter.
4. "< " = The analyte was not detected at a concentration above the specified reporting.
5. SHA = Sanborn Head & Associates.
6. FD = Field Duplicate Sample.
7. NT = Not Tested.
8. * = micrograms CaCO3 per liter

Qualifying Notes:

B The analyte found in associated method blank.
C+ The result has a high bias due to surrogate recovery above upper control limits.
E The value exceeds the calibration range.
F+ The result has a high bias due to matrix spike recovery above upper control limits.
F- The result has a low bias due to matrix spike recovery below lower control limits.
G The result is estimated due to duplicate precision outside control limits.
J The reported result is below the laboratory reporting limit and is estimated.
J+ The reported result is estimated.
K- The result has a low bias due to blank spike or laboratory control sample recovery below lower control limits.
K+ The result has a high bias due to blank spike or laboratory control sample recovery above upper control limits.
R The result is rejected due to gross exceedence of minimum response factor criteria.

Re: Groundwater Sampling
Certain "Public Ways"
Somerville, Massachusetts

Dear Ms. Wells:

Thank you for permitting GEI to conduct groundwater sampling on certain public ways in Somerville, Massachusetts. We are providing you with a "Notice of Environmental Sampling Form (BWSC-123)," as required by the Massachusetts Department of Environmental Protection (MassDEP), following groundwater sampling in January 2026.

Thank you for your continued assistance. Please contact me at 781-721-4012 or igladstone@geiconsultants.com if you have any questions.

Sincerely,

GEI Consultants, Inc

NOTICE OF ENVIRONMENTAL SAMPLING

As required by 310 CMR 40.1403(10) of the Massachusetts Contingency Plan

A. The address of the disposal site related to this Notice and Release Tracking Number (provided above):

1. Street Address: 50 Tufts Street

City/Town: Somerville Zip Code: 02145-4129

B. This notice is being provided to the following party:

1. Name: Ms. Kimberly Wells, City of Somerville Clerk

2. Street Address: 93 Highland Avenue, 1st Floor

City/Town: Somerville, MA Zip Code: 02143

C. This notice is being given to inform its recipient (the party listed in Section B):

☑ 1. That environmental sampling ~~will be~~/has been conducted at property owned by the recipient of this notice.

☐ 2. Of the results of environmental sampling conducted at property owned by the recipient of this notice.

☐ 3. Check to indicate if the analytical results are attached. (If item 2. above is checked, the analytical results from the environmental sampling must be attached to this notice.)

D. Location of the property where the environmental sampling ~~will be~~/has been conducted:

1. Street Address: Somerville City Streets

City/Town: Somerville, MA Zip Code: 02145

2. MCP phase of work during which the sampling ~~will be~~/has been conducted:

☐ Immediate Response Action
☐ Release Abatement Measure
☐ Utility-related Abatement Measure
☐ Phase I Initial Site Investigation
☐ Phase II Comprehensive Site Assessment
☐ Phase III Feasibility Evaluation
☐ Phase IV Remedy Implementation Plan
☑ Phase V/Remedy Operation Status
☐ Post-Temporary Solution Operation, Maintenance and Monitoring
☐ Other _____ (specify)

3. Description of property where sampling ~~will be~~/has been conducted:

☐ residential ☐ commercial ☐ industrial ☐ school/playground ☑ Other City Streets (specify)

4. Description of the sampling locations and types (e.g., soil, groundwater, indoor air, soil gas) to the extent known at the time of this notice.

Semi-Annual Groundwater Sampling

NOTICE OF ENVIRONMENTAL SAMPLING

As required by 310 CMR 40.1403(10) of the Massachusetts Contingency Plan

MASSACHUSETTS REGULATIONS THAT REQUIRE THIS NOTICE

This notice is being provided pursuant to the Massachusetts Contingency Plan and the notification requirement at 310 CMR 40.1403(10). The Massachusetts Contingency Plan is a state regulation that specifies requirements for parties who are taking actions to address releases of chemicals (oil or hazardous material) to the environment.

THE PERSON(S) PROVIDING THIS NOTICE

This notice has been sent to you by the party who is addressing a release of oil or hazardous material to the environment at the location listed in **Section A** on the reverse side of this form. (The regulations refer to the area where the oil or hazardous material is present as the "disposal site".)

PURPOSE OF THIS NOTICE

When environmental samples are taken as part of an investigation of a release for which a notification to MassDEP has been made under the Massachusetts Contingency Plan (310 CMR 40.0300) on behalf of someone other than the owner of the property, the regulations require that the property owner (listed in **Section B** on the reverse side of this form) be given notice of the environmental sampling. The regulations also require that the property owner subsequently receive the analytical results following the analysis of the environmental samples.

Section C on the reverse side of this form indicates the circumstance under which you are receiving this notice at this time. If you are receiving this notice to inform you of the analytical results following the analysis of the environmental samples, you should also have received, as an attachment, a copy of analytical results. These results should indicate the number and type(s) of samples (e.g., soil, groundwater) analyzed, any chemicals identified, and the measured concentrations of those chemicals.

Section D on the reverse side of this form identifies the property where the environmental sampling will be/has been conducted, provides a description of the sampling locations within the property, and indicates the phase of work under the Massachusetts Contingency Plan regulatory process during which the samples will be/were collected.

FOR MORE INFORMATION

Information about the general process for addressing releases of oil or hazardous material under the Massachusetts Contingency Plan and related public involvement opportunities may be found at http://www.mass.gov/eea/agencies/massdep/cleanup. For more information regarding this notice, you may contact the party listed in **Section E** on the reverse side of this form. Information about the disposal site identified in Section A is also available in files at the Massachusetts Department of Environmental Protection. See http://public.dep.state.ma.us/SearchableSites2/Search.aspx to view site-specific files on-line or http://mass.gov/eea/agencies/massdep/about/contacts/conduct-a-file-review.html if you would like to make an appointment to see these files in person. Please reference the **Release Tracking Number** listed in the upper right hand corner on the reverse side of this form when making file review appointments.

Re: Groundwater Sampling Results
Certain "Public Ways", Somerville, Massachusetts
MassDEP RTN 3-23246

Dear Ms. Wells:

On behalf of UniFirst Corporation, GEI Consultants, Inc. is providing results for groundwater samples collected on January 7, 2026, from groundwater monitoring wells located on municipal property. The sampling was conducted as part of our investigation related to the site at 50 Tufts Street in Somerville, Massachusetts. We collected groundwater samples from two shallow monitoring wells (MW122 and MW407).

Groundwater samples were submitted for chemical testing for volatile organic compounds (VOCs). We have attached a summary table of the chemicals detected in the groundwater samples along with the previous sampling results, the laboratory data sheets for the recent sampling, and a figure showing the sampling locations. Thank you for permitting GEI to conduct groundwater on certain public ways in Somerville, Massachusetts.

Individuals and public officials may request additional public involvement activities under the Massachusetts Contingency Plan (MCP; 310 CMR 40.1403[10] and 40.1404). The property owner may also request additional documentation, such as that listed at 310 CMR 40.0017(3), associated with the above-referenced samples. We will provide additional documentation within 30 days of our receipt of such a request.

We appreciate your continued cooperation throughout the sampling process. If you have any immediate questions regarding the water testing results, please do not hesitate to contact me at 781.721.4012 or igladstone@geiconsultants.com.

Sincerely,

GEI CONSULTANTS, INC.

General Notes:
1. Analytes detected in at least one sample are reported here. For a complete list of analytes refer to the laboratory data reports.
2. ft bgs = feet below ground surface.
3. µg/l = micrograms per liter.
4. "< " = The analyte was not detected at a concentration above the specified reporting.
5. SHA = Sanborn Head & Associates.
6. FD = Field Duplicate Sample.
7. NT = Not Tested.
8. * = micrograms CaCO3 per liter

Qualifying Notes:
B The analyte found in associated method blank.
C+ The result has a high bias due to surrogate recovery above upper control limits.
E The value exceeds the calibration range.
F+ The result has a high bias due to matrix spike recovery above upper control limits.
F- The result has a low bias due to matrix spike recovery below lower control limits.
G The result is estimated due to duplicate precision outside control limits.
J The reported result is below the laboratory reporting limit and is estimated.
J+ The reported result is estimated.
K- The result has a low bias due to blank spike or laboratory control sample recovery below lower control limits.
K+ The result has a high bias due to blank spike or laboratory control sample recovery above upper control limits.
R The result is rejected due to gross exceedence of minimum response factor criteria.

Dear Mr. and Mrs. Miller:

Re: Indoor Air Sampling
11 Morton Street
Somerville, Massachusetts

Thank you for permitting GEI to conduct indoor air sampling at your property located at 11 Morton Street in Somerville, Massachusetts. Prior to sampling, we are providing you with a "Notice of Environmental Sampling Form (BWSC-123)," as required by the Massachusetts Department of Environmental Protection (MassDEP). We will also provide you with the results of the indoor air sampling after they are available from the analytical laboratory.

Thank you for your continued assistance. Please contact me at 781-721-4012 or igladstone@geiconsultants.com, if you have any questions.

Sincerely,

GEI CONSULTANTS, INC.

NOTICE OF ENVIRONMENTAL SAMPLING

As required by 310 CMR 40.1403(10) of the Massachusetts Contingency Plan

A. The address of the disposal site related to this Notice and Release Tracking Number (provided above):

1. Street Address: 50 Tufts Street

City/Town: Somerville Zip Code: 02145-4129

B. This notice is being provided to the following party:

1. Name: Lauren and Steven Miller

2. Street Address: 11 Morton Street

City/Town: Somerville, MA Zip Code: 02145

C. This notice is being given to inform its recipient (the party listed in Section B):

☑ 1. That environmental sampling ~~will be~~/has been conducted at property owned by the recipient of this notice.

☐ 2. Of the results of environmental sampling conducted at property owned by the recipient of this notice.

☐ 3. Check to indicate if the analytical results are attached. (If item 2. above is checked, the analytical results from the environmental sampling must be attached to this notice.)

D. Location of the property where the environmental sampling ~~will be~~/has been conducted:

1. Street Address: 11 Morton Street

City/Town: Somerville, MA Zip Code: 02145-4205

2. MCP phase of work during which the sampling ~~will be~~/has been conducted:

☐ Immediate Response Action
☐ Release Abatement Measure
☐ Utility-related Abatement Measure
☐ Phase I Initial Site Investigation
☐ Phase II Comprehensive Site Assessment
☐ Phase III Feasibility Evaluation
☐ Phase IV Remedy Implementation Plan
☑ Phase V/Remedy Operation Status
☐ Post-Temporary Solution Operation, Maintenance and Monitoring
☐ Other _____ (specify)

3. Description of property where sampling ~~will be~~/has been conducted:

☑ residential ☐ commercial ☐ industrial ☐ school/playground ☐ Other _____ (specify)

4. Description of the sampling locations and types (e.g., soil, groundwater, indoor air, soil gas) to the extent known at the time of this notice.

Indoor air sampling, soil vapor point installation, and sub-slab soil vapor sampling

E. Contact information related to the party providing this notice:

Contact Name: Ileen Gladstone, P.E., LSP, LEED AP

Street Address: GEI Consultants, Inc., 400 Unicorn Park Drive

NOTICE OF ENVIRONMENTAL SAMPLING

As required by 310 CMR 40.1403(10) of the Massachusetts Contingency Plan

MASSACHUSETTS REGULATIONS THAT REQUIRE THIS NOTICE

This notice is being provided pursuant to the Massachusetts Contingency Plan and the notification requirement at 310 CMR 40.1403(10). The Massachusetts Contingency Plan is a state regulation that specifies requirements for parties who are taking actions to address releases of chemicals (oil or hazardous material) to the environment.

THE PERSON(S) PROVIDING THIS NOTICE

This notice has been sent to you by the party who is addressing a release of oil or hazardous material to the environment at the location listed in **Section A** on the reverse side of this form. (The regulations refer to the area where the oil or hazardous material is present as the "disposal site".)

PURPOSE OF THIS NOTICE

When environmental samples are taken as part of an investigation of a release for which a notification to MassDEP has been made under the Massachusetts Contingency Plan (310 CMR 40.0300) on behalf of someone other than the owner of the property, the regulations require that the property owner (listed in **Section B** on the reverse side of this form) be given notice of the environmental sampling. The regulations also require that the property owner subsequently receive the analytical results following the analysis of the environmental samples.

Section C on the reverse side of this form indicates the circumstance under which you are receiving this notice at this time. If you are receiving this notice to inform you of the analytical results following the analysis of the environmental samples, you should also have received, as an attachment, a copy of analytical results. These results should indicate the number and type(s) of samples (e.g., soil, groundwater) analyzed, any chemicals identified, and the measured concentrations of those chemicals.

Section D on the reverse side of this form identifies the property where the environmental sampling will be/has been conducted, provides a description of the sampling locations within the property, and indicates the phase of work under the Massachusetts Contingency Plan regulatory process during which the samples will be/were collected.

FOR MORE INFORMATION

Information about the general process for addressing releases of oil or hazardous material under the Massachusetts Contingency Plan and related public involvement opportunities may be found at http://www.mass.gov/eea/agencies/massdep/cleanup. For more information regarding this notice, you may contact the party listed in **Section E** on the reverse side of this form. Information about the disposal site identified in Section A is also available in files at the Massachusetts Department of Environmental Protection. See http://public.dep.state.ma.us/SearchableSites2/Search.aspx to view site-specific files on-line or http://mass.gov/eea/agencies/massdep/about/contacts/conduct-a-file-review.html if you would like to make an appointment to see these files in person. Please reference the **Release Tracking Number** listed in the upper right hand corner on the reverse side of this form when making file review appointments.

Somerville, MA 02145

Re: Indoor Air and Soil Vapor Sampling Results
11 Morton Street, Unit 1
Somerville, Massachusetts

Dear Mr. and Mrs. Miller:

On behalf of the UniFirst Corporation, GEI Consultants, Inc. collected indoor air and/or soil vapor samples on July 16, August 21, and August 29, 2025, at your property located at 11 Morton Street in connection with the ongoing monitoring associated with the historical impacts at the 50 Tufts Street site and to evaluate the potential for vapor intrusion.

Indoor Air and Sub-Slab Soil Gas Sampling – July 2025

On July 16, 2025, one indoor air sample was collected on the first floor, and one indoor air sample was collected in the basement. The samples were collected over a 24-hour period. Attached is a summary table of the chemicals detected in the indoor air samples (Table 1), and the laboratory data sheets for the recent sampling. On July 16, 2025, after completion of the indoor air sampling, GEI installed two vapor sub-slab monitoring points (SV1 and SV2) using Mini Vapor Pin® sampling devices in the concrete slab in the unfinished portion of the basement. Two sub-slab soil gas samples were then collected from the newly installed monitoring points. The samples were collected over a 1-hour period. Attached is a summary table of the chemicals detected in the sub-slab soil gas samples (Table 2), and the laboratory data sheets for the recent sampling.

In indoor air, concentrations of tetrachloroethylene (PCE), trans-1,2-Dichloroethene, and trichloroethylene (TCE) were detected in both the first floor and basement samples. Concentrations of PCE were detected at 0.149 µg/m^3 in both the first floor and basement samples. Concentrations of trans-1,2-Dichloroethene were detected at 0.135 µg/m^3 in both the first floor and basement samples. TCE was detected on the first floor at a concentration of 8.65 µg/m^3, while in the basement it was detected at a concentration of 6.88 µg/m^3. No other CVOCs were detected in the samples.

In accordance with Massachusetts Department of Environmental Protection (MassDEP) protocols, GEI performed a risk assessment screening using the July 16, 2025, indoor air results. The risk assessment screening demonstrated that the TCE indoor air concentrations posed an imminent hazard (IH) to a residential occupant; GEI notified MassDEP of the IH on July 28, 2025. The release was assigned RTN 3-52237. GEI is currently evaluating the IH condition to determine if it is related to the disposal site

or due to confounding substances inside the home. GEI believes that the presence of art supplies in the home is contributing to elevated TCE concentrations in indoor air.

In sub-slab soil gas, concentrations of 1,1,1-Trichloroethane (TCA), PCE, vinyl chloride, and TCE were detected in both samples. Concentrations of TCA were detected at 0.267 µg/m^3 and 0.136 µg/m^3 in SV1 and SV2, respectively. Concentrations of PCE were detected at 1.57 µg/m^3 and 21.0 µg/m^3 in SV1 and SV2, respectively. Concentrations of vinyl chloride were detected at 0.151 µg/m^3 and 0.138 µg/m^3 in SV1 and SV2, respectively. Concentrations of TCE were detected at 0.500 µg/m^3 and 1.55 µg/m^3, respectively.

The detected soil vapor concentrations are below the applicable MassDEP residential sub-slab soil gas screening values. Soil vapor concentrations that are below the soil gas screening values generally indicate that the vapor intrusion pathway is unlikely to be of concern under current conditions.

However, out of an abundance of caution to mitigate the potential IH, GEI installed two air purification units (APUs) in the home. On July 29, 2025, GEI installed one APU on the first floor. On August 6, 2025, GEI installed a second unit in the finished portion of the basement.

Indoor Air and Sub-Slab Soil Gas Sampling with APUs On – August 2025

On August 21, 2025, while the APUs were running, one indoor air sample was collected on the first floor, one indoor air sample was collected in the finished portion of the basement, and one indoor air sample was collected in the unfinished portion of the basement. After completion of indoor air sampling, two sub-slab soil gas samples were collected from the monitoring points installed in July 2025.

In indoor air, concentrations of TCE were detected in both the first floor and basement samples. Concentrations of TCE were detected at 0.989 µg/m^3 on the first floor, 0.215 µg/m^3 in the finished portion of the basement, and 0.124 µg/m^3 in the unfinished portion of the basement. No other CVOCs were detected in the samples.

In sub-slab soil gas, TCA, PCE, and TCE were detected in both samples. Concentrations of TCA were detected at 0.366 µg/m^3 and 0.256 µg/m^3 in SV1 and SV2, respectively. Concentrations of PCE were detected at 1.27 µg/m^3 and 20.0 µg/m^3 in SV1 and SV2, respectively. Concentrations of TCE were detected at 0.124 µg/m^3 and 0.736 µg/m^3 in SV1 and SV2, respectively.

The detected soil vapor concentrations are below the applicable MassDEP residential sub-slab soil gas screening values.

After completion of indoor air and sub-slab soil gas sampling, the APUs were shut off in preparation for further testing.

Indoor Air and Sub-Slab Soil Gas Sampling with APUs Off – August 2025

On August 29, 2025, after the APUs had been shut off for at least one week, one indoor air sample was collected on the first floor, one indoor air sample was collected in the finished portion of the basement, and one indoor air sample was collected in the unfinished portion of the basement. After completion of indoor air sampling, two sub-slab soil gas samples were collected from the monitoring points installed in July 2025.

In indoor air, concentrations of TCE were detected in both the first floor and basement samples. Concentrations of TCE were detected at 6.56 µg/m^3 on the first floor, 4.11 µg/m^3 in the finished portion of the basement, and 1.21 µg/m^3 in unfinished portion of the basement. No other CVOCs were detected in the samples.

In sub-slab soil gas, TCA, PCE, and TCE were detected in both samples. Concentrations of TCA were detected at 0.267 µg/m^3 in both SV1 and SV2. Concentrations of PCE were detected at 1.49 µg/m^3 and 20.8 µg/m^3 in SV1 and SV2, respectively. Concentrations of TCE were detected at 0.204 µg/m^3 and 1.29 µg/m^3 in SV1 and SV2, respectively.

The detected soil vapor concentrations are below the applicable MassDEP residential sub-slab soil gas screening values.

After completion of indoor air and sub-slab soil gas sampling, the APUs were turned back on.

Closing Remarks

MassDEP regulations provide that individuals and public officials may request additional public involvement activities under the Massachusetts Contingency Plan (MCP; 310 CMR 40.1403(9) and 40.1404). The property owner may also request additional documentation, such as that listed at 310 CMR 40.0017(3), associated with the above-referenced samples. We will provide such additional documentation within 30 days of our receipt of such a request.

We appreciate your continued cooperation throughout the sampling process. If you have any questions regarding the sampling results, please do not hesitate to contact me at 781.721.4012 or igladstone@geiconsultants.com.

Sincerely,

GEI CONSULTANTS, INC.

NOTICE OF ENVIRONMENTAL SAMPLING

As required by 310 CMR 40.1403(10) of the Massachusetts Contingency Plan

A. The address of the disposal site related to this Notice and Release Tracking Number (provided above):

1. Street Address: 50 Tufts Street

City/Town: Somerville, MA Zip Code: 02145-4129

B. This notice is being provided to the following party:

1. Name: Lauren and Steven Miller

2. Street Address: 11 Morton Street

City/Town: Somerville, MA Zip Code: 02145

C. This notice is being given to inform its recipient (the party listed in Section B):

☑ 1. That environmental sampling ~~will be~~/has been conducted at property owned by the recipient of this notice.

☑ 2. Of the results of environmental sampling conducted at property owned by the recipient of this notice.

☑ 3. Check to indicate if the analytical results are attached. (If item 2. above is checked, the analytical results from the environmental sampling must be attached to this notice.)

D. Location of the property where the environmental sampling ~~will be~~/has been conducted:

1. Street Address: 11 Morton Street

City/Town: Somerville, MA Zip Code: 02145-4205

2. MCP phase of work during which the sampling ~~will be~~/has been conducted:

☐ Immediate Response Action
☐ Release Abatement Measure
☐ Utility-related Abatement Measure
☐ Phase I Initial Site Investigation
☐ Phase II Comprehensive Site Assessment
☐ Phase III Feasibility Evaluation
☐ Phase IV Remedy Implementation Plan
☑ Phase V/Remedy Operation Status
☐ Post-Temporary Solution Operation, Maintenance and Monitoring
☐ Other _____ (specify)

3. Description of property where sampling ~~will be~~/has been conducted:

☑ residential ☐ commercial ☐ industrial ☐ school/playground ☐ Other _____ (specify)

4. Description of the sampling locations and types (e.g., soil, groundwater, indoor air, soil gas) to the extent known at the time of this notice.

Indoor air sampling, soil vapor point installation, and sub-slab soil vapor sampling

E. Contact information related to the party providing this notice:

Contact Name: Ileen Gladstone, P.E., LSP, LEED AP

Street Address: GEI Consultants, Inc., 400 Unicorn Park Drive

City/Town: Woburn, MA Zip Code: 01801-3341

Telephone: (781) 721-4012 Email: igladstone@geiconsultants.com

NOTICE OF ENVIRONMENTAL SAMPLING

As required by 310 CMR 40.1403(10) of the Massachusetts Contingency Plan

MASSACHUSETTS REGULATIONS THAT REQUIRE THIS NOTICE

This notice is being provided pursuant to the Massachusetts Contingency Plan and the notification requirement at 310 CMR 40.1403(10). The Massachusetts Contingency Plan is a state regulation that specifies requirements for parties who are taking actions to address releases of chemicals (oil or hazardous material) to the environment.

THE PERSON(S) PROVIDING THIS NOTICE

This notice has been sent to you by the party who is addressing a release of oil or hazardous material to the environment at the location listed in **Section A** on the reverse side of this form. (The regulations refer to the area where the oil or hazardous material is present as the "disposal site".)

PURPOSE OF THIS NOTICE

When environmental samples are taken as part of an investigation of a release for which a notification to MassDEP has been made under the Massachusetts Contingency Plan (310 CMR 40.0300) on behalf of someone other than the owner of the property, the regulations require that the property owner (listed in **Section B** on the reverse side of this form) be given notice of the environmental sampling. The regulations also require that the property owner subsequently receive the analytical results following the analysis of the environmental samples.

Section C on the reverse side of this form indicates the circumstance under which you are receiving this notice at this time. If you are receiving this notice to inform you of the analytical results following the analysis of the environmental samples, you should also have received, as an attachment, a copy of analytical results. These results should indicate the number and type(s) of samples (e.g., soil, groundwater) analyzed, any chemicals identified, and the measured concentrations of those chemicals.

Section D on the reverse side of this form identifies the property where the environmental sampling will be/has been conducted, provides a description of the sampling locations within the property, and indicates the phase of work under the Massachusetts Contingency Plan regulatory process during which the samples will be/were collected.

FOR MORE INFORMATION

Information about the general process for addressing releases of oil or hazardous material under the Massachusetts Contingency Plan and related public involvement opportunities may be found at http://www.mass.gov/eea/agencies/massdep/cleanup. For more information regarding this notice, you may contact the party listed in **Section E** on the reverse side of this form. Information about the disposal site identified in Section A is also available in files at the Massachusetts Department of Environmental Protection. See http://public.dep.state.ma.us/SearchableSites2/Search.aspx to view site-specific files on-line or http://mass.gov/eea/agencies/massdep/about/contacts/conduct-a-file-review.html if you would like to make an appointment to see these files in person. Please reference the **Release Tracking Number** listed in the upper right hand corner on the reverse side of this form when making file review appointments.

General Notes:

1. Analytes detected in at least one sample are reported here. For a complete list of analytes see the attached laboratory data sheets.
2. µg/m^3 = micrograms per cubic meter.
3. ppbv = parts per billion by volume.
4. < = The analyte was not detected at a concentration above the specified laboratory reporting limit.
5. EPMM = Exposure Pathway Mitigation Measure.
6. NT= Not tested
7. NS= No standard established
8. MassDEP = Massachusetts Department of Environmental Protection
9. Highlighted sample indicates most recent sampling rounds.
10. The samples from January 21, 2009 (11MORT-B1 and B2, and 11MORT-1A and 1B) were field duplicates of each other.
11. The laboratory notes for 11MORT-B from April 2025 indicate that the cansiter ran ambient.
12. Art supplies used by the homeowner were removed on July 31, 2025
13. APU installed on the first floor on July 29, 2025, and in the finished portion of the basement on August 6, 2025.
14. APUs shutdown on 8/21/2025 following completion of sampling.

Qualifying Note:

J The reported result is below the laboratory reporting limit and is estimated.

Dear Mr. Bussison:

Re: Indoor Air Sampling
60 Tufts Street
Somerville, Massachusetts

Thank you for permitting GEI to conduct indoor air sampling at your property located at 60 Tufts Street in Somerville, Massachusetts. Following sampling, we are providing you with a "Notice of Environmental Sampling Form (BWSC-123)," as required by the Massachusetts Department of Environmental Protection (MassDEP). We will also provide you with the results of the indoor air sampling after they are available from the analytical laboratory.

Thank you for your continued assistance. Please contact me at 781-721-4012 or igladstone@geiconsultants.com, if you have any questions.

Sincerely,

GEI CONSULTANTS, INC.

NOTICE OF ENVIRONMENTAL SAMPLING

As required by 310 CMR 40.1403(10) of the Massachusetts Contingency Plan

A. The address of the disposal site related to this Notice and Release Tracking Number (provided above):

1. Street Address: 50 Tufts Street

City/Town: Somerville Zip Code: 02145-4129

B. This notice is being provided to the following party:

1. Name: Daniel Bussison, Charlesgate

2. Street Address: 867 Boylston Street

City/Town: Boston, MA Zip Code: 02116

C. This notice is being given to inform its recipient (the party listed in Section B):

☑ 1. That environmental sampling ~~will be~~/has been conducted at property owned by the recipient of this notice.

☐ 2. Of the results of environmental sampling conducted at property owned by the recipient of this notice.

☐ 3. Check to indicate if the analytical results are attached. (If item 2. above is checked, the analytical results from the environmental sampling must be attached to this notice.)

D. Location of the property where the environmental sampling ~~will be~~/has been conducted:

1. Street Address: 60 Tufts Street

City/Town: Somerville, MA Zip Code: 02145

2. MCP phase of work during which the sampling ~~will be~~/has been conducted:

☐ Immediate Response Action
☐ Release Abatement Measure
☐ Utility-related Abatement Measure
☐ Phase I Initial Site Investigation
☐ Phase II Comprehensive Site Assessment
☐ Phase III Feasibility Evaluation
☐ Phase IV Remedy Implementation Plan
☑ Phase V/Remedy Operation Status
☐ Post-Temporary Solution Operation, Maintenance and Monitoring
☐ Other _____ (specify)

3. Description of property where sampling ~~will be~~/has been conducted:

☑ residential ☐ commercial ☐ industrial ☐ school/playground ☐ Other _____ (specify)

4. Description of the sampling locations and types (e.g., soil, groundwater, indoor air, soil gas) to the extent known at the time of this notice.

Indoor air and sub-slab soil vapor sampling

NOTICE OF ENVIRONMENTAL SAMPLING

As required by 310 CMR 40.1403(10) of the Massachusetts Contingency Plan

MASSACHUSETTS REGULATIONS THAT REQUIRE THIS NOTICE

This notice is being provided pursuant to the Massachusetts Contingency Plan and the notification requirement at 310 CMR 40.1403(10). The Massachusetts Contingency Plan is a state regulation that specifies requirements for parties who are taking actions to address releases of chemicals (oil or hazardous material) to the environment.

THE PERSON(S) PROVIDING THIS NOTICE

This notice has been sent to you by the party who is addressing a release of oil or hazardous material to the environment at the location listed in **Section A** on the reverse side of this form. (The regulations refer to the area where the oil or hazardous material is present as the "disposal site".)

PURPOSE OF THIS NOTICE

When environmental samples are taken as part of an investigation of a release for which a notification to MassDEP has been made under the Massachusetts Contingency Plan (310 CMR 40.0300) on behalf of someone other than the owner of the property, the regulations require that the property owner (listed in **Section B** on the reverse side of this form) be given notice of the environmental sampling. The regulations also require that the property owner subsequently receive the analytical results following the analysis of the environmental samples.

Section C on the reverse side of this form indicates the circumstance under which you are receiving this notice at this time. If you are receiving this notice to inform you of the analytical results following the analysis of the environmental samples, you should also have received, as an attachment, a copy of analytical results. These results should indicate the number and type(s) of samples (e.g., soil, groundwater) analyzed, any chemicals identified, and the measured concentrations of those chemicals.

Section D on the reverse side of this form identifies the property where the environmental sampling will be/has been conducted, provides a description of the sampling locations within the property, and indicates the phase of work under the Massachusetts Contingency Plan regulatory process during which the samples will be/were collected.

FOR MORE INFORMATION

Information about the general process for addressing releases of oil or hazardous material under the Massachusetts Contingency Plan and related public involvement opportunities may be found at http://www.mass.gov/eea/agencies/massdep/cleanup. For more information regarding this notice, you may contact the party listed in **Section E** on the reverse side of this form. Information about the disposal site identified in Section A is also available in files at the Massachusetts Department of Environmental Protection. See http://public.dep.state.ma.us/SearchableSites2/Search.aspx to view site-specific files on-line or http://mass.gov/eea/agencies/massdep/about/contacts/conduct-a-file-review.html if you would like to make an appointment to see these files in person. Please reference the **Release Tracking Number** listed in the upper right hand corner on the reverse side of this form when making file review appointments.

Mr. Reid Galas
60 Tufts Street – Unit 1
Somerville, MA 02145-4225

Re: Indoor Air and Soil Vapor Sampling Results
60 Tufts Street, Unit 1
Somerville, Massachusetts

Dear Mr. Galas:

On behalf of UniFirst Corporation, GEI Consultants, Inc. is providing the results of the indoor air and soil vapor sampling conducted at 60 Tufts Street on September 30 and October 1, 2025.

On August 28, 2025, to simulate conditions without operation of the active exposure pathway mitigation measure (AEPMM), the sub-slab depressurization system (SSDS) shutdown valve was closed for at least one week prior to collecting soil vapor samples.

On September 30, 2025, one indoor air sample was collected at your property. The sample was collected over a 24-hour period. Attached is a summary table of the chemicals detected in the indoor air sample along with the previous sampling results (Table 1), and the laboratory data sheet for the recent sampling.

Tetrachloroethylene (PCE) was detected at 0.787 micrograms per meter cubed (ug/m^3), 1,1,1-trichloroethane (TCA) was detected at 0.032 µg/m^3, and trichloroethylene (TCE) was detected at 0.020 µg/m^3. No other chlorinated volatile organic compounds (VOCs) were detected in the sample at concentrations above the laboratory reporting limits.

On October 1, 2025, one soil vapor sample was collected from beneath the building slab of your unit. Attached is a summary table of the chemicals detected in the soil vapor sample along with the previous sampling results (Table 2) and the laboratory data sheets for the recent sampling.

PCE was detected at 280 µg/m^3, TCA was detected at 337 µg/m^3, TCE was detected at 13.2 µg/m^3, 1,1-Dichlorethane was detected at 0.389 µg/m^3, 1,1-dichloroethylene was detected at 0.103 µg/m^3, and trans-1,2-Dichloroethylene was detected at 0.091 µg/m^3. No other chlorinated VOCs were detected in the sample at concentrations above the laboratory reporting limits.

After the soil vapor sampling was completed, we opened the shutdown valve. However, due to ongoing maintenance of the fan, it remains off.

The detected indoor air and soil vapor concentrations are below the applicable MassDEP residential indoor air threshold values and sub-slab soil gas screening values. Soil vapor concentrations that are below the soil vapor screening values generally indicate that the vapor intrusion pathway is unlikely to be of concern under current conditions.

MassDEP regulations provide that individuals and public officials may request additional public involvement activities under the Massachusetts Contingency Plan (MCP; 310 CMR 40.1403(9) and 40.1404). The property owner may also request additional documentation, such as that listed at 310 CMR 40.0017(3), associated with the above-referenced samples. We will provide such additional documentation within 30 days of our receipt of such a request.

We appreciate your continued cooperation throughout the sampling process. If you have any questions regarding the sampling results, please do not hesitate to contact me at 781-721-4012 or igladstone@geiconsultants.com.

Sincerely,

GEI CONSULTANTS, INC.

NOTICE OF ENVIRONMENTAL SAMPLING

As required by 310 CMR 40.1403(10) of the Massachusetts Contingency Plan

A. The address of the disposal site related to this Notice and Release Tracking Number (provided above):

1. Street Address: 50 Tufts Street

City/Town: Somerville Zip Code: 02145-4129

B. This notice is being provided to the following party:

1. Name: Reid Galas

2. Street Address: 60 Tufts Street, Unit 1

City/Town: Somerville, MA Zip Code: 02145-4225

C. This notice is being given to inform its recipient (the party listed in Section B):

☑ 1. That environmental sampling ~~will be~~/has been conducted at property owned by the recipient of this notice.

☑ 2. Of the results of environmental sampling conducted at property owned by the recipient of this notice.

☑ 3. Check to indicate if the analytical results are attached. (If item 2. above is checked, the analytical results from the environmental sampling must be attached to this notice.)

D. Location of the property where the environmental sampling ~~will be~~/has been conducted:

1. Street Address: 60 Tufts Street, Unit 1

City/Town: Somerville, MA Zip Code: 02145

2. MCP phase of work during which the sampling ~~will be~~/has been conducted:

☐ Immediate Response Action
☐ Release Abatement Measure
☐ Utility-related Abatement Measure
☐ Phase I Initial Site Investigation
☐ Phase II Comprehensive Site Assessment
☐ Phase III Feasibility Evaluation
☐ Phase IV Remedy Implementation Plan
☑ Phase V/Remedy Operation Status
☐ Post-Temporary Solution Operation, Maintenance and Monitoring
☐ Other _____ (specify)

3. Description of property where sampling ~~will be~~/has been conducted:

☑ residential ☐ commercial ☐ industrial ☐ school/playground ☐ Other _____ (specify)

4. Description of the sampling locations and types (e.g., soil, groundwater, indoor air, soil gas) to the extent known at the time of this notice.

Indoor air and sub-slab soil vapor sampling

NOTICE OF ENVIRONMENTAL SAMPLING

As required by 310 CMR 40.1403(10) of the Massachusetts Contingency Plan

MASSACHUSETTS REGULATIONS THAT REQUIRE THIS NOTICE

This notice is being provided pursuant to the Massachusetts Contingency Plan and the notification requirement at 310 CMR 40.1403(10). The Massachusetts Contingency Plan is a state regulation that specifies requirements for parties who are taking actions to address releases of chemicals (oil or hazardous material) to the environment.

THE PERSON(S) PROVIDING THIS NOTICE

This notice has been sent to you by the party who is addressing a release of oil or hazardous material to the environment at the location listed in **Section A** on the reverse side of this form. (The regulations refer to the area where the oil or hazardous material is present as the "disposal site".)

PURPOSE OF THIS NOTICE

When environmental samples are taken as part of an investigation of a release for which a notification to MassDEP has been made under the Massachusetts Contingency Plan (310 CMR 40.0300) on behalf of someone other than the owner of the property, the regulations require that the property owner (listed in **Section B** on the reverse side of this form) be given notice of the environmental sampling. The regulations also require that the property owner subsequently receive the analytical results following the analysis of the environmental samples.

Section C on the reverse side of this form indicates the circumstance under which you are receiving this notice at this time. If you are receiving this notice to inform you of the analytical results following the analysis of the environmental samples, you should also have received, as an attachment, a copy of analytical results. These results should indicate the number and type(s) of samples (e.g., soil, groundwater) analyzed, any chemicals identified, and the measured concentrations of those chemicals.

Section D on the reverse side of this form identifies the property where the environmental sampling will be/has been conducted, provides a description of the sampling locations within the property, and indicates the phase of work under the Massachusetts Contingency Plan regulatory process during which the samples will be/were collected.

FOR MORE INFORMATION

Information about the general process for addressing releases of oil or hazardous material under the Massachusetts Contingency Plan and related public involvement opportunities may be found at http://www.mass.gov/eea/agencies/massdep/cleanup. For more information regarding this notice, you may contact the party listed in **Section E** on the reverse side of this form. Information about the disposal site identified in Section A is also available in files at the Massachusetts Department of Environmental Protection. See http://public.dep.state.ma.us/SearchableSites2/Search.aspx to view site-specific files on-line or http://mass.gov/eea/agencies/massdep/about/contacts/conduct-a-file-review.html if you would like to make an appointment to see these files in person. Please reference the **Release Tracking Number** listed in the upper right hand corner on the reverse side of this form when making file review appointments.

Re: Soil Vapor and Indoor Air Sampling Results
60 Tufts Street, Unit 4
Somerville, Massachusetts

To whom it may concern:

On behalf of UniFirst Corporation, GEI Consultants, Inc. is providing the results of the indoor air and soil vapor sampling conducted at 60 Tufts Street on September 30 and October 1, 2025.

On August 28, 2025, to simulate conditions without operation of the AEPMM, the sub-slab depressurization system (SSDS) shutdown valve was closed for at least one week prior to collecting the indoor air and soil vapor samples.

On September 30, 2025, one indoor air sample was collected in the basement and one sample was collected on the first floor. The samples were collected over a 24-hour period. Attached is a summary table of the chemicals detected in the indoor air samples along with the previous sampling results (Table 1), and the laboratory data sheets for the recent sampling.

Tetrachloroethylene (PCE) was detected in both samples at concentrations of 0.312 micrograms per meter cubed (µg/m^3) in the basement sample and 0.264 µg/m^3 on the first floor sample. Concentrations of 1,1,1-Trichloroethane (TCA) were detected in the first floor sample at 0.153 µg/m^3. No other chlorinated volatile organic compounds (VOCs) were detected in the samples at concentrations above the laboratory reporting limits.

On October 1, 2025, one soil vapor sample was collected from beneath the building slab of your unit. Attached is a summary table of the chemicals detected in the soil vapor sample along with the previous sampling results (Table 2) and the laboratory data sheets for the recent sampling.

PCE was detected at 4.98 µg /m^3 and 1,1,1-trichloroethane (TCA) was detected at 4.92 µg /m^3. Trichloroethylene (TCE) was detected at 0.167 µg /m^3. No other chlorinated VOCs were detected in the sample at concentrations above the laboratory reporting limits.

After the soil vapor sampling was completed, we opened the shutdown valve. However, due to ongoing maintenance of the fan, it remains off.

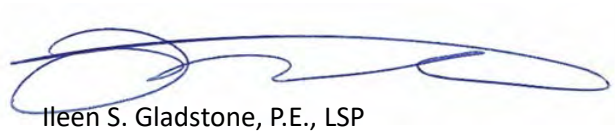
The detected indoor air and soil vapor concentrations are below the applicable MassDEP residential indoor air threshold values and sub-slab soil gas screening values. Soil vapor concentrations that are below the soil vapor screening values generally indicate that the vapor intrusion pathway is unlikely to be of concern under current conditions.

MassDEP regulations provide that individuals and public officials may request additional public involvement activities under the Massachusetts Contingency Plan (MCP; 310 CMR 40.1403(9) and 40.1404). The property owner may also request additional documentation, such as that listed at 310 CMR 40.0017(3), associated with the above-referenced samples. We will provide such additional documentation within 30 days of our receipt of such a request.

We appreciate your continued cooperation throughout the sampling process. If you have any questions regarding the sampling results, please do not hesitate to contact me at 781-721-4012 or igladstone@geiconsultants.com.

Sincerely,

GEI CONSULTANTS, INC.



Ileen S. Gladstone, P.E., LSP

NOTICE OF ENVIRONMENTAL SAMPLING

As required by 310 CMR 40.1403(10) of the Massachusetts Contingency Plan

A. The address of the disposal site related to this Notice and Release Tracking Number (provided above):

1. Street Address: 50 Tufts Street

City/Town: Somerville Zip Code: 02145-4129

B. This notice is being provided to the following party:

1. Name: RRN Holdings, LLC

2. Street Address: 2335 Ivylgail Drive East

City/Town: Jacksonville, FL Zip Code: 32225

C. This notice is being given to inform its recipient (the party listed in Section B):

☑ 1. That environmental sampling ~~will be~~/has been conducted at property owned by the recipient of this notice.

☑ 2. Of the results of environmental sampling conducted at property owned by the recipient of this notice.

☑ 3. Check to indicate if the analytical results are attached. (If item 2. above is checked, the analytical results from the environmental sampling must be attached to this notice.)

D. Location of the property where the environmental sampling ~~will be~~/has been conducted:

1. Street Address: 60 Tufts Street, Unit 4

City/Town: Somerville, MA Zip Code: 02145

2. MCP phase of work during which the sampling ~~will be~~/has been conducted:

☐ Immediate Response Action	☐ Phase III Feasibility Evaluation
☐ Release Abatement Measure	☐ Phase IV Remedy Implementation Plan
☐ Utility-related Abatement Measure	☑ Phase V/Remedy Operation Status
☐ Phase I Initial Site Investigation	☐ Post-Temporary Solution Operation, Maintenance and Monitoring
☐ Phase II Comprehensive Site Assessment	☐ Other _____ (specify)

3. Description of property where sampling ~~will be~~/has been conducted:

☑ residential ☐ commercial ☐ industrial ☐ school/playground ☐ Other _____ (specify)

4. Description of the sampling locations and types (e.g., soil, groundwater, indoor air, soil gas) to the extent known at the time of this notice.

Indoor air and sub-slab soil vapor sampling

E. Contact information related to the party providing this notice:

Contact Name: Ileen Gladstone, P.E., LSP, LEED AP

Street Address: GEI Consultants, Inc., 400 Unicorn Park Drive

City/Town: Woburn, MA Zip Code: 01801-3341

Telephone: (781) 721-4012 Email: igladstone@geiconsultants.com

NOTICE OF ENVIRONMENTAL SAMPLING

As required by 310 CMR 40.1403(10) of the Massachusetts Contingency Plan

MASSACHUSETTS REGULATIONS THAT REQUIRE THIS NOTICE

This notice is being provided pursuant to the Massachusetts Contingency Plan and the notification requirement at 310 CMR 40.1403(10). The Massachusetts Contingency Plan is a state regulation that specifies requirements for parties who are taking actions to address releases of chemicals (oil or hazardous material) to the environment.

THE PERSON(S) PROVIDING THIS NOTICE

This notice has been sent to you by the party who is addressing a release of oil or hazardous material to the environment at the location listed in **Section A** on the reverse side of this form. (The regulations refer to the area where the oil or hazardous material is present as the "disposal site".)

PURPOSE OF THIS NOTICE

When environmental samples are taken as part of an investigation of a release for which a notification to MassDEP has been made under the Massachusetts Contingency Plan (310 CMR 40.0300) on behalf of someone other than the owner of the property, the regulations require that the property owner (listed in **Section B** on the reverse side of this form) be given notice of the environmental sampling. The regulations also require that the property owner subsequently receive the analytical results following the analysis of the environmental samples.

Section C on the reverse side of this form indicates the circumstance under which you are receiving this notice at this time. If you are receiving this notice to inform you of the analytical results following the analysis of the environmental samples, you should also have received, as an attachment, a copy of analytical results. These results should indicate the number and type(s) of samples (e.g., soil, groundwater) analyzed, any chemicals identified, and the measured concentrations of those chemicals.

Section D on the reverse side of this form identifies the property where the environmental sampling will be/has been conducted, provides a description of the sampling locations within the property, and indicates the phase of work under the Massachusetts Contingency Plan regulatory process during which the samples will be/were collected.

FOR MORE INFORMATION

Information about the general process for addressing releases of oil or hazardous material under the Massachusetts Contingency Plan and related public involvement opportunities may be found at http://www.mass.gov/eea/agencies/massdep/cleanup. For more information regarding this notice, you may contact the party listed in **Section E** on the reverse side of this form. Information about the disposal site identified in Section A is also available in files at the Massachusetts Department of Environmental Protection. See http://public.dep.state.ma.us/SearchableSites2/Search.aspx to view site-specific files on-line or http://mass.gov/eea/agencies/massdep/about/contacts/conduct-a-file-review.html if you would like to make an appointment to see these files in person. Please reference the **Release Tracking Number** listed in the upper right hand corner on the reverse side of this form when making file review appointments.

General Notes:

1. Analytes detected in at least one sample are reported here. For a complete list of analytes see the attached laboratory data sheets.
2. µg/m3 = micrograms per cubic meter.
3. ppbv = parts per billion by volume.
4. EPMM = Exposure Pathway Mitigation Measure.
5. MassDEP = Massachusetts Department of Environmental Protection
6. NT = Not tested.
7. < = The analyte was not detected at a concentration above the specified laboratory reporting limit.
8. On March 20, 2018, GEI observed the installation of a shutdown valve on the riser pipe of the SSDS.
9. The shutdown valve was closed for 1 week prior to collection of indoor air samples in July 2018, April 2019, and October 2025.
10. Residential Threshold Values for indoor air taken from the Massachusetts Department of Environmental Protection (MassDEP) "Vapor Intrusion Guidance: Site Assessment, Mitigation, and Closure" dated October 2016.
11. Highlighted sample indicates most recent round.

Qualifying Note:

J The reported result is below the laboratory reporting limit and is estimated.

Re: Indoor Air and Soil Vapor Sampling Results
60 Tufts Street
Somerville, Massachusetts

Dear Mr. Bussison:

On behalf of UniFirst Corporation, GEI Consultants, Inc. is providing the results of the indoor air and soil vapor sampling conducted at 60 Tufts Street on September 30 and October 1, 2025.

On August 28, 2025, to simulate conditions without operation of the active exposure pathway mitigation measure (AEPMM), the sub-slab depressurization system (SSDS) shutdown valve was closed for at least one week prior to collecting soil vapor samples.

On September 30, 2025, four indoor air samples were collected throughout the first-floor common spaces. The samples were collected over a 24-hour period. Attached is a summary table of the chemicals detected in the indoor air samples along with the previous sampling results (Table 1), and the laboratory data sheets for the recent sampling.

Out of the four samples, 60TUFTS-GARG and 60TUFTS-HALL had detects for multiple chemicals. Tetrachloroethylene (PCE) was detected at concentrations ranging from 0.732 to 0.848 micrograms per meter cubed (µg /m^3). 1,1,1-Trichloroethane (TCA) was detected at concentrations ranging from 0.125 to 0.191 µg /m^3. Trichloroethylene (TCE) was detected at concentrations ranging from 0.113 to 0.150 µg/m^3. No other chlorinated volatile organic compounds (VOCs) were detected in the samples at concentrations above the laboratory reporting limits.

On October 1, 2025, four soil vapor samples were collected from beneath the building slab. Attached is a summary table of the chemicals detected in the sub-slab soil vapor samples along with the previous sampling results (Table 2), and the laboratory data sheets for the recent sampling.

Concentrations of TCA were detected above the laboratory reporting limit in all four samples ranging from 28 to 373 µg /m^3. Concentrations of PCE and TCE were detected in all four samples at concentrations ranging from 1.82 to 332 µg /m^3 and 0.967 to 70.4 µg /m^3, respectively. 1,1-dichloroethylene (DCE) was detected in three samples (SS1, SS2, SS10) at concentrations ranging from 0.448 to 63.4 µg/m^3. 1,1-dichloroethane was detected in all four samples at concentrations ranging from 0.113 to 0.619 µg/m^3.

1,2-cis-dichloroethylene was detected in one sample (SS10) at a concentration of 0.349 µg/m^3. No other chlorinated VOCs were detected in the samples at concentrations above the laboratory reporting limits.

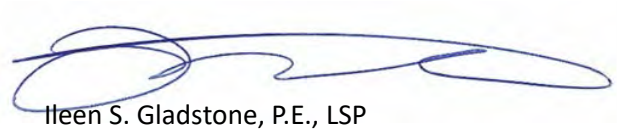
After the soil vapor sampling was completed, we opened the shutdown valve.

MassDEP regulations provide that individuals and public officials may request additional public involvement activities under the Massachusetts Contingency Plan (MCP; 310 CMR 40.1403(9) and 40.1404). The property owner may also request additional documentation, such as that listed at 310 CMR 40.0017(3), associated with the above-referenced samples. We will provide such additional documentation within 30 days of our receipt of such a request.

We appreciate your continued cooperation throughout the sampling process. If you have any questions regarding the sampling results, please do not hesitate to contact me at 781-721-4012 or igladstone@geiconsultants.com.

Sincerely,

GEI CONSULTANTS, INC.



Ileen S. Gladstone, P.E., LSP

NOTICE OF ENVIRONMENTAL SAMPLING

As required by 310 CMR 40.1403(10) of the Massachusetts Contingency Plan

A. The address of the disposal site related to this Notice and Release Tracking Number (provided above):

1. Street Address: 50 Tufts Street

City/Town: Somerville Zip Code: 02145-4129

B. This notice is being provided to the following party:

1. Name: Daniel Bussison, Charlesgate

2. Street Address: 867 Boylston Street

City/Town: Boston, MA Zip Code: 02116

C. This notice is being given to inform its recipient (the party listed in Section B):

☑ 1. That environmental sampling ~~will be~~/has been conducted at property owned by the recipient of this notice.

☑ 2. Of the results of environmental sampling conducted at property owned by the recipient of this notice.

☑ 3. Check to indicate if the analytical results are attached. (If item 2. above is checked, the analytical results from the environmental sampling must be attached to this notice.)

D. Location of the property where the environmental sampling ~~will be~~/has been conducted:

1. Street Address: 60 Tufts Street

City/Town: Somerville, MA Zip Code: 02145

2. MCP phase of work during which the sampling ~~will be~~/has been conducted:

☐ Immediate Response Action
☐ Release Abatement Measure
☐ Utility-related Abatement Measure
☐ Phase I Initial Site Investigation
☐ Phase II Comprehensive Site Assessment
☐ Phase III Feasibility Evaluation
☐ Phase IV Remedy Implementation Plan
☑ Phase V/Remedy Operation Status
☐ Post-Temporary Solution Operation, Maintenance and Monitoring
☐ Other _____ (specify)

3. Description of property where sampling ~~will be~~/has been conducted:

☑ residential ☐ commercial ☐ industrial ☐ school/playground ☐ Other _____ (specify)

4. Description of the sampling locations and types (e.g., soil, groundwater, indoor air, soil gas) to the extent known at the time of this notice.

Indoor air and sub-slab soil vapor sampling

E. Contact information related to the party providing this notice:

Contact Name: Ileen Gladstone, P.E., LSP, LEED AP

Street Address: GEI Consultants, Inc., 400 Unicorn Park Drive

City/Town: Woburn, MA Zip Code: 01801-3341

Telephone: (781) 721-4012 Email: igladstone@geiconsultants.com

NOTICE OF ENVIRONMENTAL SAMPLING

As required by 310 CMR 40.1403(10) of the Massachusetts Contingency Plan

MASSACHUSETTS REGULATIONS THAT REQUIRE THIS NOTICE

This notice is being provided pursuant to the Massachusetts Contingency Plan and the notification requirement at 310 CMR 40.1403(10). The Massachusetts Contingency Plan is a state regulation that specifies requirements for parties who are taking actions to address releases of chemicals (oil or hazardous material) to the environment.

THE PERSON(S) PROVIDING THIS NOTICE

This notice has been sent to you by the party who is addressing a release of oil or hazardous material to the environment at the location listed in **Section A** on the reverse side of this form. (The regulations refer to the area where the oil or hazardous material is present as the "disposal site".)

PURPOSE OF THIS NOTICE

When environmental samples are taken as part of an investigation of a release for which a notification to MassDEP has been made under the Massachusetts Contingency Plan (310 CMR 40.0300) on behalf of someone other than the owner of the property, the regulations require that the property owner (listed in **Section B** on the reverse side of this form) be given notice of the environmental sampling. The regulations also require that the property owner subsequently receive the analytical results following the analysis of the environmental samples.

Section C on the reverse side of this form indicates the circumstance under which you are receiving this notice at this time. If you are receiving this notice to inform you of the analytical results following the analysis of the environmental samples, you should also have received, as an attachment, a copy of analytical results. These results should indicate the number and type(s) of samples (e.g., soil, groundwater) analyzed, any chemicals identified, and the measured concentrations of those chemicals.

Section D on the reverse side of this form identifies the property where the environmental sampling will be/has been conducted, provides a description of the sampling locations within the property, and indicates the phase of work under the Massachusetts Contingency Plan regulatory process during which the samples will be/were collected.

FOR MORE INFORMATION

Information about the general process for addressing releases of oil or hazardous material under the Massachusetts Contingency Plan and related public involvement opportunities may be found at http://www.mass.gov/eea/agencies/massdep/cleanup. For more information regarding this notice, you may contact the party listed in **Section E** on the reverse side of this form. Information about the disposal site identified in Section A is also available in files at the Massachusetts Department of Environmental Protection. See http://public.dep.state.ma.us/SearchableSites2/Search.aspx to view site-specific files on-line or http://mass.gov/eea/agencies/massdep/about/contacts/conduct-a-file-review.html if you would like to make an appointment to see these files in person. Please reference the **Release Tracking Number** listed in the upper right hand corner on the reverse side of this form when making file review appointments.

General Notes:

1. Analytes detected in at least one sample are reported here. For a complete list of analytes see the attached laboratory data sheets.
2. µg/m3 = micrograms per cubic meter.
3. ppbv = parts per billion by volume.
4. EPMM = Exposure Pathway Mitigation Measure.
5. MassDEP = Massachusetts Department of Environmental Protection
6. < = The analyte was not detected at a concentration above the specified laboratory reporting limit.
7. On March 20, 2018, GEI observed the installation of a shutdown valve on the riser pipe of the SSDS.
8. The shutdown valve was closed for 1 week prior to collection of indoor air samples in July 2018, April 2019, and October 2025.
9. Residential Threshold Values for indoor air taken from the Massachusetts Department of Environmental Protection (MassDEP) "Vapor Intrusion Guidance: Site Assessment, Mitigation, and Closure" dated October 2016.
10. "HALL" samples collected in April 2019 and October 2025 were collected from the same location as "HALL-A" sample collected in 2010.
11. Highlighted samples indicate most recent round.

General Notes:

1. Analytes detected in at least one sample are reported here. For a complete list of analytes see the attached laboratory data sheets.
2. µg/m3 = micrograms per cubic meter.
3. ppbv = parts per billion by volume.
4. EPMM = Exposure Pathway Mitigation Measure.
5. MassDEP = Massachusetts Department of Environmental Protection
6. < = The analyte was not detected at a concentration above the specified laboratory reporting limit.
7. On March 20, 2018, GEI observed the installation of a shutdown valve on the riser pipe of the SSDS.
8. The shutdown valve was closed for 1 week prior to collection of indoor air samples in July 2018, April 2019, and October 2025.
9. Highlighted sample indicates most recent round.
10. NT = Not tested.
11. "SVT-MW202S" samples were collected from monitoring well soil vapor ports as part of sub-slab soil vapor sampling.
12. Residential Sub-Slab Soil Gas Screening Values taken from MassDEP "Vapor Intrusion Guidance: Site Assessment, Mitigation and Closure" dated October 2016.

Qualifying Notes:

G The result is estimated due to duplicate precision outside control limits.
J The reported result is below the laboratory reporting limit and is estimated.

Re: Indoor Air Sampling
91-93 Franklin Street
Somerville, Massachusetts

Dear Mr. Carey:

Thank you for permitting GEI Consultants, Inc. to conduct indoor air sampling at your property located at 91-93 Franklin Street in Somerville, Massachusetts. Following sampling, we are providing you with a "Notice of Environmental Sampling Form (BWSC-123)," as required by the Massachusetts Department of Environmental Protection (MassDEP). We will also provide you with the results of the indoor air sampling after they are available from the analytical laboratory.

Thank you for your continued assistance. Please contact me at 781.721.4012 or igladstone@geiconsultants.com, if you have any questions.

Sincerely,

GEI CONSULTANTS, INC.

Ileen S. Gladstone, P.E., LSP, LEED AP

NOTICE OF ENVIRONMENTAL SAMPLING

As required by 310 CMR 40.1403(10) of the Massachusetts Contingency Plan

A. The address of the disposal site related to this Notice and Release Tracking Number (provided above):

1. Street Address: 50 Tufts Street

City/Town: Somerville, MA Zip Code: 02145-4129

B. This notice is being provided to the following party:

1. Name: Philip Carey

2. Street Address: 120 Rogers Avenue

City/Town: Somerville, MA Zip Code: 02144-2209

C. This notice is being given to inform its recipient (the party listed in Section B):

☑ 1. That environmental sampling ~~will be~~/has been conducted at property owned by the recipient of this notice.

☐ 2. Of the results of environmental sampling conducted at property owned by the recipient of this notice.

☐ 3. Check to indicate if the analytical results are attached. (If item 2. above is checked, the analytical results from the environmental sampling must be attached to this notice.)

D. Location of the property where the environmental sampling ~~will be~~/has been conducted:

1. Street Address: 91-93 Franklin Street

City/Town: Somerville, MA Zip Code: 02145-4230

2. MCP phase of work during which the sampling ~~will be~~/has been conducted:

☐ Immediate Response Action
☐ Release Abatement Measure
☐ Utility-related Abatement Measure
☐ Phase I Initial Site Investigation
☐ Phase II Comprehensive Site Assessment
☐ Phase III Feasibility Evaluation
☐ Phase IV Remedy Implementation Plan
☑ Phase V/Remedy Operation Status
☐ Post-Temporary Solution Operation, Maintenance and Monitoring
☐ Other _____ (specify)

3. Description of property where sampling ~~will be~~/has been conducted:

☑ residential ☐ commercial ☐ industrial ☐ school/playground ☐ Other _____ (specify)

4. Description of the sampling locations and types (e.g., soil, groundwater, indoor air, soil gas) to the extent known at the time of this notice.

NOTICE OF ENVIRONMENTAL SAMPLING

As required by 310 CMR 40.1403(10) of the Massachusetts Contingency Plan

MASSACHUSETTS REGULATIONS THAT REQUIRE THIS NOTICE

This notice is being provided pursuant to the Massachusetts Contingency Plan and the notification requirement at 310 CMR 40.1403(10). The Massachusetts Contingency Plan is a state regulation that specifies requirements for parties who are taking actions to address releases of chemicals (oil or hazardous material) to the environment.

THE PERSON(S) PROVIDING THIS NOTICE

This notice has been sent to you by the party who is addressing a release of oil or hazardous material to the environment at the location listed in **Section A** on the reverse side of this form. (The regulations refer to the area where the oil or hazardous material is present as the "disposal site".)

PURPOSE OF THIS NOTICE

When environmental samples are taken as part of an investigation of a release for which a notification to MassDEP has been made under the Massachusetts Contingency Plan (310 CMR 40.0300) on behalf of someone other than the owner of the property, the regulations require that the property owner (listed in **Section B** on the reverse side of this form) be given notice of the environmental sampling. The regulations also require that the property owner subsequently receive the analytical results following the analysis of the environmental samples.

Section C on the reverse side of this form indicates the circumstance under which you are receiving this notice at this time. If you are receiving this notice to inform you of the analytical results following the analysis of the environmental samples, you should also have received, as an attachment, a copy of analytical results. These results should indicate the number and type(s) of samples (e.g., soil, groundwater) analyzed, any chemicals identified, and the measured concentrations of those chemicals.

Section D on the reverse side of this form identifies the property where the environmental sampling will be/has been conducted, provides a description of the sampling locations within the property, and indicates the phase of work under the Massachusetts Contingency Plan regulatory process during which the samples will be/were collected.

FOR MORE INFORMATION

Information about the general process for addressing releases of oil or hazardous material under the Massachusetts Contingency Plan and related public involvement opportunities may be found at http://www.mass.gov/eea/agencies/massdep/cleanup. For more information regarding this notice, you may contact the party listed in **Section E** on the reverse side of this form. Information about the disposal site identified in Section A is also available in files at the Massachusetts Department of Environmental Protection. See http://public.dep.state.ma.us/SearchableSites2/Search.aspx to view site-specific files on-line or http://mass.gov/eea/agencies/massdep/about/contacts/conduct-a-file-review.html if you would like to make an appointment to see these files in person. Please reference the **Release Tracking Number** listed in the upper right hand corner on the reverse side of this form when making file review appointments.

Somerville, MA 02143

Re: Indoor Air Sampling Results
91-93 Franklin Street
Somerville, Massachusetts

Dear Mr. Carey:

On behalf of the UniFirst Corporation, GEI Consultants, Inc. collected indoor air samples on December 19, 2025, at your property at 91-93 Franklin Street to evaluate the potential for vapor intrusion.

On December 19, 2025, one indoor air sample was collected in the basement and two samples were collected on the first floor, one in each of the units. The samples were collected over a 24-hour period. Attached is a summary table of the chemicals detected in the indoor air samples (Table 1), and the laboratory data sheets for the recent sampling. A Massachusetts Department of Environmental Protection (MassDEP) Notice of Environmental Sampling Form (BWSC123) is also attached.

Tetrachloroethylene (PCE) was detected in all three samples. Concentrations of PCE were detected at 0.231 micrograms per meter cubed (µg/m^3) on the first floor of 93 Franklin, 0.665 µg/m^3 on the first floor of 91 Franklin and 0.278 µg/m^3 in the basement.

The detected indoor air concentrations are comparable to historical results and are indicative of a condition of No Significant Risk (NSR) existing. Furthermore, they are below applicable MassDEP residential and commercial indoor air threshold values.

Individuals and public officials may request additional public involvement activities under the Massachusetts Contingency Plan (MCP; 310 CMR 40.1403(9) and 40.1404). The property owner may also request additional documentation, such as that listed at 310 CMR 40.0017(3), associated with the above-referenced samples. We will provide such additional documentation within 30 days of our receipt of such a request.

We appreciate your continued cooperation throughout the sampling process. If you have any questions regarding the sampling results, please do not hesitate to contact me at 781.721.4012 or igladstone@geiconsultants.com.

Sincerely,

GEI Consultants, Inc

Re: Indoor Air Sampling
32 Knowlton Street
Somerville, Massachusetts

Dear Ms. Peddle:

Thank you for permitting GEI Consultants, Inc. to conduct indoor air sampling at your property located at 32 Knowlton Street in Somerville, Massachusetts. Following sampling, we are providing you with a "Notice of Environmental Sampling Form (BWSC-123)," as required by the Massachusetts Department of Environmental Protection (MassDEP). We will also provide you with the results of the indoor air sampling after they are available from the analytical laboratory.

Thank you for your continued assistance. Please contact me at 781.721.4012 or igladstone@geiconsultants.com, if you have any questions.

Sincerely,

GEI CONSULTANTS, INC.

Ileen S. Gladstone, P.E., LSP, LEED AP
Senior Vice President

NOTICE OF ENVIRONMENTAL SAMPLING

As required by 310 CMR 40.1403(10) of the Massachusetts Contingency Plan

A. The address of the disposal site related to this Notice and Release Tracking Number (provided above):

1. Street Address: 50 Tufts Street

City/Town: Somerville, MA Zip Code: 02145-4129

B. This notice is being provided to the following party:

1. Name: Sara Peddle

2. Street Address: 32 Knowlton Street

City/Town: Somerville, MA Zip Code: 02145-4225

C. This notice is being given to inform its recipient (the party listed in Section B):

☑ 1. That environmental sampling ~~will be~~/has been conducted at property owned by the recipient of this notice.

☐ 2. Of the results of environmental sampling conducted at property owned by the recipient of this notice.

☐ 3. Check to indicate if the analytical results are attached. (If item 2. above is checked, the analytical results from the environmental sampling must be attached to this notice.)

D. Location of the property where the environmental sampling ~~will be~~/has been conducted:

1. Street Address: 32 Knowlton Street

City/Town: Somerville, MA Zip Code: 02145-4225

2. MCP phase of work during which the sampling ~~will be~~/has been conducted:

☐ Immediate Response Action
☐ Release Abatement Measure
☐ Utility-related Abatement Measure
☐ Phase I Initial Site Investigation
☐ Phase II Comprehensive Site Assessment
☐ Phase III Feasibility Evaluation
☐ Phase IV Remedy Implementation Plan
☑ Phase V/Remedy Operation Status
☐ Post-Temporary Solution Operation, Maintenance and Monitoring
☐ Other _____ (specify)

3. Description of property where sampling ~~will be~~/has been conducted:

☑ residential ☐ commercial ☐ industrial ☐ school/playground ☐ Other _____ (specify)

4. Description of the sampling locations and types (e.g., soil, groundwater, indoor air, soil gas) to the extent known at the time of this notice.

Indoor air sampling

NOTICE OF ENVIRONMENTAL SAMPLING

As required by 310 CMR 40.1403(10) of the Massachusetts Contingency Plan

MASSACHUSETTS REGULATIONS THAT REQUIRE THIS NOTICE

This notice is being provided pursuant to the Massachusetts Contingency Plan and the notification requirement at 310 CMR 40.1403(10). The Massachusetts Contingency Plan is a state regulation that specifies requirements for parties who are taking actions to address releases of chemicals (oil or hazardous material) to the environment.

THE PERSON(S) PROVIDING THIS NOTICE

This notice has been sent to you by the party who is addressing a release of oil or hazardous material to the environment at the location listed in **Section A** on the reverse side of this form. (The regulations refer to the area where the oil or hazardous material is present as the "disposal site".)

PURPOSE OF THIS NOTICE

When environmental samples are taken as part of an investigation of a release for which a notification to MassDEP has been made under the Massachusetts Contingency Plan (310 CMR 40.0300) on behalf of someone other than the owner of the property, the regulations require that the property owner (listed in **Section B** on the reverse side of this form) be given notice of the environmental sampling. The regulations also require that the property owner subsequently receive the analytical results following the analysis of the environmental samples.

Section C on the reverse side of this form indicates the circumstance under which you are receiving this notice at this time. If you are receiving this notice to inform you of the analytical results following the analysis of the environmental samples, you should also have received, as an attachment, a copy of analytical results. These results should indicate the number and type(s) of samples (e.g., soil, groundwater) analyzed, any chemicals identified, and the measured concentrations of those chemicals.

Section D on the reverse side of this form identifies the property where the environmental sampling will be/has been conducted, provides a description of the sampling locations within the property, and indicates the phase of work under the Massachusetts Contingency Plan regulatory process during which the samples will be/were collected.

FOR MORE INFORMATION

Information about the general process for addressing releases of oil or hazardous material under the Massachusetts Contingency Plan and related public involvement opportunities may be found at http://www.mass.gov/eea/agencies/massdep/cleanup. For more information regarding this notice, you may contact the party listed in **Section E** on the reverse side of this form. Information about the disposal site identified in Section A is also available in files at the Massachusetts Department of Environmental Protection. See http://public.dep.state.ma.us/SearchableSites2/Search.aspx to view site-specific files on-line or http://mass.gov/eea/agencies/massdep/about/contacts/conduct-a-file-review.html if you would like to make an appointment to see these files in person. Please reference the **Release Tracking Number** listed in the upper right hand corner on the reverse side of this form when making file review appointments.

Re: Indoor Air Sampling Results
32 Knowlton Street, Somerville, Massachusetts

Dear Ms. Peddle:

On behalf of the UniFirst Corporation, GEI Consultants, Inc. collected indoor air samples on December 19, 2025, at your property at 32 Knowlton Street to evaluate the potential for vapor intrusion.

On December 19, 2025, one indoor air sample was collected each in the basement and on the first floor. The samples were collected over a 24-hour period. Attached is a summary table of the chemicals detected in the indoor air samples (Table 1), and the laboratory data sheets for the recent sampling. A Massachusetts Department of Environmental Protection (MassDEP) Notice of Environmental Sampling Form (BWSC123) is also attached.

Tetrachloroethylene (PCE) was detected at a concentrations of 0.136 micrograms per meter cubed ($\mu g/m^3$) in the basement.

The detected indoor air concentrations are comparable to historical results and are indicative of a condition of No Significant Risk (NSR)existing. Furthermore, they are below applicable MassDEP residential and commercial indoor air threshold values.

Individuals and public officials may request additional public involvement activities under the Massachusetts Contingency Plan (MCP; 310 CMR 40.1403(9) and 40.1404). The property owner may also request additional documentation, such as that listed at 310 CMR 40.0017(3), associated with the above-referenced samples. We will provide additional documentation within 30 days of our receipt of such a request.

We appreciate your continued cooperation throughout the sampling process. If you have any questions regarding the sampling results, please do not hesitate to contact me at 781.721.4012 or igladstone@geiconsultants.com.

Re: Indoor Air Sampling
34 Knowlton Street
Somerville, Massachusetts

Dear Ms. Jiang and Mr. Viscue:

Thank you for permitting GEI Consultants, Inc. to conduct indoor air sampling at your property located at 34 Knowlton Street in Somerville, Massachusetts. Following sampling, we are providing you with a "Notice of Environmental Sampling Form (BWSC-123)," as required by the Massachusetts Department of Environmental Protection (MassDEP). We will also provide you with the results of the indoor air sampling after they are available from the analytical laboratory.

Thank you for your continued assistance. Please contact me at 781.721.4012 or igladstone@geiconsultants.com, if you have any questions.

Sincerely,

GEI CONSULTANTS, INC.

Ileen S. Gladstone, P.E., LSP, LEED AP

NOTICE OF ENVIRONMENTAL SAMPLING

As required by 310 CMR 40.1403(10) of the Massachusetts Contingency Plan

A. The address of the disposal site related to this Notice and Release Tracking Number (provided above):

1. Street Address: 50 Tufts Street

City/Town: Somerville, MA Zip Code: 02145-4129

B. This notice is being provided to the following party:

1. Name: Max Jiang and Matthew Paul Viscue

2. Street Address: 34 Knowlton Street

City/Town: Somerville, MA Zip Code: 02145

C. This notice is being given to inform its recipient (the party listed in Section B):

☑ 1. That environmental sampling ~~will be~~/has been conducted at property owned by the recipient of this notice.

☐ 2. Of the results of environmental sampling conducted at property owned by the recipient of this notice.

☐ 3. Check to indicate if the analytical results are attached. (If item 2. above is checked, the analytical results from the environmental sampling must be attached to this notice.)

D. Location of the property where the environmental sampling will be/~~has been~~ conducted:

1. Street Address: 34 Knowlton Street

City/Town: Somerville, MA Zip Code: 02145

2. MCP phase of work during which the sampling ~~will be~~/has been conducted:

☐ Immediate Response Action
☐ Release Abatement Measure
☐ Utility-related Abatement Measure
☐ Phase I Initial Site Investigation
☐ Phase II Comprehensive Site Assessment
☐ Phase III Feasibility Evaluation
☐ Phase IV Remedy Implementation Plan
☑ Phase V/Remedy Operation Status
☐ Post-Temporary Solution Operation, Maintenance and Monitoring
☐ Other _____ (specify)

3. Description of property where sampling will be/~~has been~~ conducted:

☑ residential ☐ commercial ☐ industrial ☐ school/playground ☐ Other _____ (specify)

4. Description of the sampling locations and types (e.g., soil, groundwater, indoor air, soil gas) to the extent known at the time of this notice.

Indoor Air and Soil Vapor Sampling

NOTICE OF ENVIRONMENTAL SAMPLING

As required by 310 CMR 40.1403(10) of the Massachusetts Contingency Plan

MASSACHUSETTS REGULATIONS THAT REQUIRE THIS NOTICE

This notice is being provided pursuant to the Massachusetts Contingency Plan and the notification requirement at 310 CMR 40.1403(10). The Massachusetts Contingency Plan is a state regulation that specifies requirements for parties who are taking actions to address releases of chemicals (oil or hazardous material) to the environment.

THE PERSON(S) PROVIDING THIS NOTICE

This notice has been sent to you by the party who is addressing a release of oil or hazardous material to the environment at the location listed in **Section A** on the reverse side of this form. (The regulations refer to the area where the oil or hazardous material is present as the "disposal site".)

PURPOSE OF THIS NOTICE

When environmental samples are taken as part of an investigation of a release for which a notification to MassDEP has been made under the Massachusetts Contingency Plan (310 CMR 40.0300) on behalf of someone other than the owner of the property, the regulations require that the property owner (listed in **Section B** on the reverse side of this form) be given notice of the environmental sampling. The regulations also require that the property owner subsequently receive the analytical results following the analysis of the environmental samples.

Section C on the reverse side of this form indicates the circumstance under which you are receiving this notice at this time. If you are receiving this notice to inform you of the analytical results following the analysis of the environmental samples, you should also have received, as an attachment, a copy of analytical results. These results should indicate the number and type(s) of samples (e.g., soil, groundwater) analyzed, any chemicals identified, and the measured concentrations of those chemicals.

Section D on the reverse side of this form identifies the property where the environmental sampling will be/has been conducted, provides a description of the sampling locations within the property, and indicates the phase of work under the Massachusetts Contingency Plan regulatory process during which the samples will be/were collected.

FOR MORE INFORMATION

Information about the general process for addressing releases of oil or hazardous material under the Massachusetts Contingency Plan and related public involvement opportunities may be found at http://www.mass.gov/eea/agencies/massdep/cleanup. For more information regarding this notice, you may contact the party listed in **Section E** on the reverse side of this form. Information about the disposal site identified in Section A is also available in files at the Massachusetts Department of Environmental Protection. See http://public.dep.state.ma.us/SearchableSites2/Search.aspx to view site-specific files on-line or http://mass.gov/eea/agencies/massdep/about/contacts/conduct-a-file-review.html if you would like to make an appointment to see these files in person. Please reference the **Release Tracking Number** listed in the upper right hand corner on the reverse side of this form when making file review appointments.

Re: Indoor Air and Soil Vapor Sampling Results
34 Knowlton Street
Somerville, Massachusetts

Dear Ms. Jiang and Mr. Viscue:

On behalf of the UniFirst Corporation, GEI Consultants, Inc. collected indoor air and soil vapor samples on December 19, 2025, at your property at 34 Knowlton Street to evaluate the potential for vapor intrusion.

On December 19, 2025, one indoor air sample was collected each in the basement and on the first floor. The samples were collected over a 24-hour period. Attached is a summary table of the chemicals detected in the indoor air samples (Table 1), and the laboratory data sheets for the recent sampling. A Massachusetts Department of Environmental Protection (MassDEP) Notice of Environmental Sampling Form (BWSC123) is also attached.

Trans-1,2-dichloroethylene (trans-1,2-DCE) was detected on the first floor and basement samples at a concentration of 0.151 micrograms per meter cubed (µg/m^3) and 0.190 µg/m^3, respectively. The detected indoor air concentrations are comparable to historical results and are indicative of a condition of No Significant Risk (NSR) existing. Furthermore, they are below applicable MassDEP residential and commercial indoor air threshold values.

On December 19, 2025, after completion of the indoor air sampling, one sub-slab soil gas sample was collected from the monitoring port installed on the passive venting system riser pipe in the basement to approximate the concentrations of chlorinated VOCs in soil vapor beneath the house. Attached is a summary table of the chemicals detected in the soil vapor sample (Table 2) and the laboratory data sheets for the recent sampling.

Tetrachloroethylene (PCE) was detected in soil vapor at a concentration of 1.00 µg/m^3 and trans-1,2-DCE was detected at a concentration of 0.135 µg/m^3. The detected soil vapor concentrations are below the applicable MassDEP residential sub-slab soil gas screening values.

Individuals and public officials may request additional public involvement activities under the Massachusetts Contingency Plan (MCP; 310 CMR 40.1403(9) and 40.1404). The property owner may also request additional documentation, such as that listed at 310 CMR 40.0017(3), associated with the above-referenced samples. We will provide additional documentation within 30 days of our receipt of such a request.

We appreciate your continued cooperation throughout the sampling process. If you have any questions regarding the sampling results, please do not hesitate to contact me at 781.721.4012 or igladstone@geiconsultants.com.

Sincerely,

GEI Consultants, Inc

NOTICE OF ENVIRONMENTAL SAMPLING

As required by 310 CMR 40.1403(10) of the Massachusetts Contingency Plan

MASSACHUSETTS REGULATIONS THAT REQUIRE THIS NOTICE

This notice is being provided pursuant to the Massachusetts Contingency Plan and the notification requirement at 310 CMR 40.1403(10). The Massachusetts Contingency Plan is a state regulation that specifies requirements for parties who are taking actions to address releases of chemicals (oil or hazardous material) to the environment.

THE PERSON(S) PROVIDING THIS NOTICE

This notice has been sent to you by the party who is addressing a release of oil or hazardous material to the environment at the location listed in **Section A** on the reverse side of this form. (The regulations refer to the area where the oil or hazardous material is present as the "disposal site".)

PURPOSE OF THIS NOTICE

When environmental samples are taken as part of an investigation of a release for which a notification to MassDEP has been made under the Massachusetts Contingency Plan (310 CMR 40.0300) on behalf of someone other than the owner of the property, the regulations require that the property owner (listed in **Section B** on the reverse side of this form) be given notice of the environmental sampling. The regulations also require that the property owner subsequently receive the analytical results following the analysis of the environmental samples.

Section C on the reverse side of this form indicates the circumstance under which you are receiving this notice at this time. If you are receiving this notice to inform you of the analytical results following the analysis of the environmental samples, you should also have received, as an attachment, a copy of analytical results. These results should indicate the number and type(s) of samples (e.g., soil, groundwater) analyzed, any chemicals identified, and the measured concentrations of those chemicals.

Section D on the reverse side of this form identifies the property where the environmental sampling will be/has been conducted, provides a description of the sampling locations within the property, and indicates the phase of work under the Massachusetts Contingency Plan regulatory process during which the samples will be/were collected.

FOR MORE INFORMATION

Information about the general process for addressing releases of oil or hazardous material under the Massachusetts Contingency Plan and related public involvement opportunities may be found at http://www.mass.gov/eea/agencies/massdep/cleanup. For more information regarding this notice, you may contact the party listed in **Section E** on the reverse side of this form. Information about the disposal site identified in Section A is also available in files at the Massachusetts Department of Environmental Protection. See http://public.dep.state.ma.us/SearchableSites2/Search.aspx to view site-specific files on-line or http://mass.gov/eea/agencies/massdep/about/contacts/conduct-a-file-review.html if you would like to make an appointment to see these files in person. Please reference the **Release Tracking Number** listed in the upper right hand corner on the reverse side of this form when making file review appointments.

Re: Indoor Air and Soil Vapor Sampling
11 Morton Street
Somerville, Massachusetts

Dear Mr. and Mrs. Miller:

Thank you for permitting GEI Consultants, Inc. to conduct indoor air and soil vapor sampling at your property located at 11 Morton Street in Somerville, Massachusetts. Following sampling, we are providing you with a "Notice of Environmental Sampling Form (BWSC-123)," as required by the Massachusetts Department of Environmental Protection (MassDEP). We will also provide you with the results of the indoor air and soil vapor sampling after they are available from the analytical laboratory.

Thank you for your continued assistance. Please contact me at 781.721.4012 or igladstone@geiconsultants.com, if you have any questions.

Sincerely,

GEI CONSULTANTS, INC.

Ileen S. Gladstone, P.E., LSP, LEED AP

NOTICE OF ENVIRONMENTAL SAMPLING

As required by 310 CMR 40.1403(10) of the Massachusetts Contingency Plan

A. The address of the disposal site related to this Notice and Release Tracking Number (provided above):

1. Street Address: 50 Tufts Street

City/Town: Somerville Zip Code: 02145-4129

B. This notice is being provided to the following party:

1. Name: Lauren and Steven Miller

2. Street Address: 11 Morton Street

City/Town: Somerville, MA Zip Code: 02145

C. This notice is being given to inform its recipient (the party listed in Section B):

☑ 1. That environmental sampling ~~will be~~/has been conducted at property owned by the recipient of this notice.

☐ 2. Of the results of environmental sampling conducted at property owned by the recipient of this notice.

☐ 3. Check to indicate if the analytical results are attached. (If item 2. above is checked, the analytical results from the environmental sampling must be attached to this notice.)

D. Location of the property where the environmental sampling ~~will be~~/has been conducted:

1. Street Address: 11 Morton Street

City/Town: Somerville, MA Zip Code: 02145-4205

2. MCP phase of work during which the sampling ~~will be~~/has been conducted:

☐ Immediate Response Action	☐ Phase III Feasibility Evaluation
☐ Release Abatement Measure	☐ Phase IV Remedy Implementation Plan
☐ Utility-related Abatement Measure	☑ Phase V/Remedy Operation Status
☐ Phase I Initial Site Investigation	☐ Post-Temporary Solution Operation, Maintenance and Monitoring
☐ Phase II Comprehensive Site Assessment	☐ Other _____ (specify)

3. Description of property where sampling ~~will be~~/has been conducted:

☑ residential ☐ commercial ☐ industrial ☐ school/playground ☐ Other _____ (specify)

4. Description of the sampling locations and types (e.g., soil, groundwater, indoor air, soil gas) to the extent known at the time of this notice.

Indoor air and sub-slab soil vapor sampling

NOTICE OF ENVIRONMENTAL SAMPLING

As required by 310 CMR 40.1403(10) of the Massachusetts Contingency Plan

MASSACHUSETTS REGULATIONS THAT REQUIRE THIS NOTICE

This notice is being provided pursuant to the Massachusetts Contingency Plan and the notification requirement at 310 CMR 40.1403(10). The Massachusetts Contingency Plan is a state regulation that specifies requirements for parties who are taking actions to address releases of chemicals (oil or hazardous material) to the environment.

THE PERSON(S) PROVIDING THIS NOTICE

This notice has been sent to you by the party who is addressing a release of oil or hazardous material to the environment at the location listed in **Section A** on the reverse side of this form. (The regulations refer to the area where the oil or hazardous material is present as the "disposal site".)

PURPOSE OF THIS NOTICE

When environmental samples are taken as part of an investigation of a release for which a notification to MassDEP has been made under the Massachusetts Contingency Plan (310 CMR 40.0300) on behalf of someone other than the owner of the property, the regulations require that the property owner (listed in **Section B** on the reverse side of this form) be given notice of the environmental sampling. The regulations also require that the property owner subsequently receive the analytical results following the analysis of the environmental samples.

Section C on the reverse side of this form indicates the circumstance under which you are receiving this notice at this time. If you are receiving this notice to inform you of the analytical results following the analysis of the environmental samples, you should also have received, as an attachment, a copy of analytical results. These results should indicate the number and type(s) of samples (e.g., soil, groundwater) analyzed, any chemicals identified, and the measured concentrations of those chemicals.

Section D on the reverse side of this form identifies the property where the environmental sampling will be/has been conducted, provides a description of the sampling locations within the property, and indicates the phase of work under the Massachusetts Contingency Plan regulatory process during which the samples will be/were collected.

FOR MORE INFORMATION

Information about the general process for addressing releases of oil or hazardous material under the Massachusetts Contingency Plan and related public involvement opportunities may be found at http://www.mass.gov/eea/agencies/massdep/cleanup. For more information regarding this notice, you may contact the party listed in **Section E** on the reverse side of this form. Information about the disposal site identified in Section A is also available in files at the Massachusetts Department of Environmental Protection. See http://public.dep.state.ma.us/SearchableSites2/Search.aspx to view site-specific files on-line or http://mass.gov/eea/agencies/massdep/about/contacts/conduct-a-file-review.html if you would like to make an appointment to see these files in person. Please reference the **Release Tracking Number** listed in the upper right hand corner on the reverse side of this form when making file review appointments.

Re: Indoor Air and Soil Vapor Sampling Results
11 Morton Street, Unit 1
Somerville, Massachusetts

Dear Mr. and Mrs. Miller:

On behalf of the UniFirst Corporation, GEI Consultants, Inc. collected indoor air and soil vapor samples on December 19, 2025, at your property located at 11 Morton Street in connection with the ongoing monitoring associated with the historical impacts at the 50 Tufts Street site and to evaluate the potential for vapor intrusion.

On December 19, 2025, one indoor air sample was collected each on the first floor, in the finished portion of the basement, and in the unfinished portion of the basement. The samples were collected over a 24-hour period. Attached is a summary table of the chemicals detected in the indoor air samples (Table 1), and the laboratory data sheets for the recent sampling. A Massachusetts Department of Environmental Protection (MassDEP) Notice of Environmental Sampling Form (BWSC123) is also attached.

Trichloroethylene (TCE) was detected in the first floor and finished basement samples. Concentrations of TCE were detected at 2.18 micrograms per meter cubed (µg/m^3) on the first floor and 0.742 µg/m^3 in the finished portion of the basement. As explained in the Notification Retraction letter for 11 Morton Street dated September 24, 2025, the TCE detections are due to unrelated sources and are not associated with the 50 Tufts Street disposal site.

Tetrachloroethylene (PCE) was detected in the finished basement sample at a concentration of 0.536 µg/m^3. This concentration is comparable to historical results and is indicative of a condition of No Significant Risk (NSR). Furthermore, it is below applicable MassDEP residential and commercial indoor air threshold values. No other chlorinated volatile organic compounds (CVOCs), except TCE, were detected in the samples.

On December 19, 2025, after completion of indoor air sampling, two soil vapor samples were collected from the sub-slab monitoring points installed in July 2025 (SV1 and SV2). Attached is a summary table of the chemicals detected in the soil vapor samples (Table 2) and the laboratory data sheets for the recent sampling.

PCE was detected in both soil vapor samples, and TCE was detected in SV1. Concentrations of PCE were detected at 0.495 µg/m^3 and 6.34 µg/m^3 in SV1 and SV2, respectively. TCE was detected at a concentration of 0.253 µg/m^3 in SV1.

The detected soil vapor concentrations are below the applicable MassDEP residential sub-slab soil gas screening values.

MassDEP regulations provide that individuals and public officials may request additional public involvement activities under the Massachusetts Contingency Plan (MCP; 310 CMR 40.1403(9) and 40.1404). The property owner may also request additional documentation, such as that listed at 310 CMR 40.0017(3), associated with the above-referenced samples. We will provide additional documentation within 30 days of our receipt of such a request.

We appreciate your continued cooperation throughout the sampling process. If you have any questions regarding the sampling results, please do not hesitate to contact me at 781.721.4012 or igladstone@geiconsultants.com.

Sincerely,

GEI CONSULTANTS, INC.

NOTICE OF ENVIRONMENTAL SAMPLING

As required by 310 CMR 40.1403(10) of the Massachusetts Contingency Plan

A. The address of the disposal site related to this Notice and Release Tracking Number (provided above):

1. Street Address: 50 Tufts Street

City/Town: Somerville, MA Zip Code: 02145-4129

B. This notice is being provided to the following party:

1. Name: Lauren and Steven Miller

2. Street Address: 11 Morton Street

City/Town: Somerville, MA Zip Code: 02145

C. This notice is being given to inform its recipient (the party listed in Section B):

☑ 1. That environmental sampling ~~will be~~/has been conducted at property owned by the recipient of this notice.

☑ 2. Of the results of environmental sampling conducted at property owned by the recipient of this notice.

☑ 3. Check to indicate if the analytical results are attached. (If item 2. above is checked, the analytical results from the environmental sampling must be attached to this notice.)

D. Location of the property where the environmental sampling ~~will be~~/has been conducted:

1. Street Address: 11 Morton Street

City/Town: Somerville, MA Zip Code: 02145-4205

2. MCP phase of work during which the sampling ~~will be~~/has been conducted:

☐ Immediate Response Action
☐ Release Abatement Measure
☐ Utility-related Abatement Measure
☐ Phase I Initial Site Investigation
☐ Phase II Comprehensive Site Assessment
☐ Phase III Feasibility Evaluation
☐ Phase IV Remedy Implementation Plan
☑ Phase V/Remedy Operation Status
☐ Post-Temporary Solution Operation, Maintenance and Monitoring
☐ Other _____ (specify)

3. Description of property where sampling ~~will be~~/has been conducted:

☑ residential ☐ commercial ☐ industrial ☐ school/playground ☐ Other _____ (specify)

4. Description of the sampling locations and types (e.g., soil, groundwater, indoor air, soil gas) to the extent known at the time of this notice.

Indoor air sampling and sub-slab soil vapor sampling

NOTICE OF ENVIRONMENTAL SAMPLING

As required by 310 CMR 40.1403(10) of the Massachusetts Contingency Plan

MASSACHUSETTS REGULATIONS THAT REQUIRE THIS NOTICE

This notice is being provided pursuant to the Massachusetts Contingency Plan and the notification requirement at 310 CMR 40.1403(10). The Massachusetts Contingency Plan is a state regulation that specifies requirements for parties who are taking actions to address releases of chemicals (oil or hazardous material) to the environment.

THE PERSON(S) PROVIDING THIS NOTICE

This notice has been sent to you by the party who is addressing a release of oil or hazardous material to the environment at the location listed in **Section A** on the reverse side of this form. (The regulations refer to the area where the oil or hazardous material is present as the "disposal site".)

PURPOSE OF THIS NOTICE

When environmental samples are taken as part of an investigation of a release for which a notification to MassDEP has been made under the Massachusetts Contingency Plan (310 CMR 40.0300) on behalf of someone other than the owner of the property, the regulations require that the property owner (listed in **Section B** on the reverse side of this form) be given notice of the environmental sampling. The regulations also require that the property owner subsequently receive the analytical results following the analysis of the environmental samples.

Section C on the reverse side of this form indicates the circumstance under which you are receiving this notice at this time. If you are receiving this notice to inform you of the analytical results following the analysis of the environmental samples, you should also have received, as an attachment, a copy of analytical results. These results should indicate the number and type(s) of samples (e.g., soil, groundwater) analyzed, any chemicals identified, and the measured concentrations of those chemicals.

Section D on the reverse side of this form identifies the property where the environmental sampling will be/has been conducted, provides a description of the sampling locations within the property, and indicates the phase of work under the Massachusetts Contingency Plan regulatory process during which the samples will be/were collected.

FOR MORE INFORMATION

Information about the general process for addressing releases of oil or hazardous material under the Massachusetts Contingency Plan and related public involvement opportunities may be found at http://www.mass.gov/eea/agencies/massdep/cleanup. For more information regarding this notice, you may contact the party listed in **Section E** on the reverse side of this form. Information about the disposal site identified in Section A is also available in files at the Massachusetts Department of Environmental Protection. See http://public.dep.state.ma.us/SearchableSites2/Search.aspx to view site-specific files on-line or http://mass.gov/eea/agencies/massdep/about/contacts/conduct-a-file-review.html if you would like to make an appointment to see these files in person. Please reference the **Release Tracking Number** listed in the upper right hand corner on the reverse side of this form when making file review appointments.

11. The laboratory notes for 11MORT-B from April 2025 indicate that the cansiter ran ambient
12. Art supplies used by the homeowner were removed on July 31, 2025
13. APU installed on the first floor on July 29, 2025, and in the finished portion of the basement on August 6, 2025.
14. APUs shutdown on 8/21/2025 following completion of sampling.

Qualifying Note:

J The reported result is below the laboratory reporting limit and is estimated.

Re: Indoor Air Sampling
19-19A Morton Street
Somerville, Massachusetts

Dear Gang Lian and Xiao-Ning Wang:

Thank you for permitting GEI Consultants, Inc. to conduct indoor air sampling at your property located at 19-19A Morton Street in Somerville, Massachusetts. Following sampling, we are providing you with a "Notice of Environmental Sampling Form (BWSC-123)," as required by the Massachusetts Department of Environmental Protection (MassDEP). We will also provide you with the results of the indoor air sampling after they are available from the analytical laboratory.

Thank you for your continued assistance. Please contact me at 781.721.4012 or igladstone@geiconsultants.com, if you have any questions.

Sincerely,

GEI CONSULTANTS, INC.

Ileen S. Gladstone, P.E., LSP, LEED AP
Senior Vice President

Christopher Coner, CHMM
Project Manager

NOTICE OF ENVIRONMENTAL SAMPLING

As required by 310 CMR 40.1403(10) of the Massachusetts Contingency Plan

A. The address of the disposal site related to this Notice and Release Tracking Number (provided above):

1. Street Address: 50 Tufts Street

City/Town: Somerville, MA Zip Code: 02145-4129

B. This notice is being provided to the following party:

1. Name: Gang Lian and Xiao-Ning Wang

2. Street Address: 5 Butterwick Lane

City/Town: Old Lyme, CT Zip Code: 06371

C. This notice is being given to inform its recipient (the party listed in Section B):

☑ 1. That environmental sampling ~~will be~~/has been conducted at property owned by the recipient of this notice.

☐ 2. Of the results of environmental sampling conducted at property owned by the recipient of this notice.

☐ 3. Check to indicate if the analytical results are attached. (If item 2. above is checked, the analytical results from the environmental sampling must be attached to this notice.)

D. Location of the property where the environmental sampling ~~will be~~/has been conducted:

1. Street Address: 19-19A Morton Street

City/Town: Somerville, MA Zip Code: 02145-4205

2. MCP phase of work during which the sampling ~~will be~~/has been conducted:

☐ Immediate Response Action
☐ Release Abatement Measure
☐ Utility-related Abatement Measure
☐ Phase I Initial Site Investigation
☐ Phase II Comprehensive Site Assessment
☐ Phase III Feasibility Evaluation
☐ Phase IV Remedy Implementation Plan
☑ Phase V/Remedy Operation Status
☐ Post-Temporary Solution Operation, Maintenance and Monitoring
☐ Other _____ (specify)

3. Description of property where sampling ~~will be~~/has been conducted:

☑ residential ☐ commercial ☐ industrial ☐ school/playground ☐ Other _____ (specify)

4. Description of the sampling locations and types (e.g., soil, groundwater, indoor air, soil gas) to the extent known at the time of this notice.

NOTICE OF ENVIRONMENTAL SAMPLING

As required by 310 CMR 40.1403(10) of the Massachusetts Contingency Plan

MASSACHUSETTS REGULATIONS THAT REQUIRE THIS NOTICE

This notice is being provided pursuant to the Massachusetts Contingency Plan and the notification requirement at 310 CMR 40.1403(10). The Massachusetts Contingency Plan is a state regulation that specifies requirements for parties who are taking actions to address releases of chemicals (oil or hazardous material) to the environment.

THE PERSON(S) PROVIDING THIS NOTICE

This notice has been sent to you by the party who is addressing a release of oil or hazardous material to the environment at the location listed in **Section A** on the reverse side of this form. (The regulations refer to the area where the oil or hazardous material is present as the "disposal site".)

PURPOSE OF THIS NOTICE

When environmental samples are taken as part of an investigation of a release for which a notification to MassDEP has been made under the Massachusetts Contingency Plan (310 CMR 40.0300) on behalf of someone other than the owner of the property, the regulations require that the property owner (listed in **Section B** on the reverse side of this form) be given notice of the environmental sampling. The regulations also require that the property owner subsequently receive the analytical results following the analysis of the environmental samples.

Section C on the reverse side of this form indicates the circumstance under which you are receiving this notice at this time. If you are receiving this notice to inform you of the analytical results following the analysis of the environmental samples, you should also have received, as an attachment, a copy of analytical results. These results should indicate the number and type(s) of samples (e.g., soil, groundwater) analyzed, any chemicals identified, and the measured concentrations of those chemicals.

Section D on the reverse side of this form identifies the property where the environmental sampling will be/has been conducted, provides a description of the sampling locations within the property, and indicates the phase of work under the Massachusetts Contingency Plan regulatory process during which the samples will be/were collected.

FOR MORE INFORMATION

Information about the general process for addressing releases of oil or hazardous material under the Massachusetts Contingency Plan and related public involvement opportunities may be found at http://www.mass.gov/eea/agencies/massdep/cleanup. For more information regarding this notice, you may contact the party listed in **Section E** on the reverse side of this form. Information about the disposal site identified in Section A is also available in files at the Massachusetts Department of Environmental Protection. See http://public.dep.state.ma.us/SearchableSites2/Search.aspx to view site-specific files on-line or http://mass.gov/eea/agencies/massdep/about/contacts/conduct-a-file-review.html if you would like to make an appointment to see these files in person. Please reference the **Release Tracking Number** listed in the upper right hand corner on the reverse side of this form when making file review appointments.

Re: Indoor Air Sampling Results
19-19A Morton Street
Somerville, Massachusetts

Dear Gang Lian and Ziao-Ning Wang:

On behalf of the UniFirst Corporation, GEI Consultants, Inc. collected indoor air samples on December 19, 2025, at your property at 19-19A Morton Street to evaluate the potential for vapor intrusion.

On December 19, 2025, one indoor air sample was collected each on the first floor and in the basement. The samples were collected over a 24-hour period. Attached is a summary table of the chemicals detected in the indoor air samples (Table 1), and the laboratory data sheets for the recent sampling. A Massachusetts Department of Environmental Protection (MassDEP) Notice of Environmental Sampling Form (BWSC123) is also attached.

There were no detected chlorinated volatile organic compounds (CVOCs) in the samples, indicative of a condition of No Significant Risk (NSR) existing.

Individuals and public officials may request additional public involvement activities under the Massachusetts Contingency Plan (MCP; 310 CMR 40.1403(9) and 40.1404). The property owner may also request additional documentation, such as that listed at 310 CMR 40.0017(3), associated with the above-referenced samples. We will provide such additional documentation within 30 days of our receipt of such a request.

We appreciate your continued cooperation throughout the sampling process. If you have any questions regarding the sampling results, please do not hesitate to contact me at 781.721.4012 or igladstone@geiconsultants.com.

Sincerely,

GEI Consultants, Inc

Re: Soil Vapor Sampling
121 Washington Street
Somerville, Massachusetts

Dear Mr. Glover:

Thank you for permitting GEI Consultants, Inc. to conduct soil vapor sampling at your property located at 121 Washington Street in Somerville, Massachusetts. Following sampling, we are providing you with a "Notice of Environmental Sampling Form (BWSC-123)," as required by the Massachusetts Department of Environmental Protection (MassDEP). We will also provide you with the results of the soil vapor sampling after they are available from the analytical laboratory.

Thank you for your continued assistance. Please contact me at 781.721.4012 or igladstone@geiconsultants.com, if you have any questions.

Sincerely,

GEI CONSULTANTS, INC.

NOTICE OF ENVIRONMENTAL SAMPLING

As required by 310 CMR 40.1403(10) of the Massachusetts Contingency Plan

A. The address of the disposal site related to this Notice and Release Tracking Number (provided above):

1. Street Address: 50 Tufts Street

City/Town: Somerville Zip Code: 02145-4129

B. This notice is being provided to the following party:

1. Name: Keith Glover

2. Street Address: 17 Village Street, Unit 1

City/Town: Somerville, MA Zip Code: 02145

C. This notice is being given to inform its recipient (the party listed in Section B):

☑ 1. That environmental sampling ~~will be~~/has been conducted at property owned by the recipient of this notice.

☐ 2. Of the results of environmental sampling conducted at property owned by the recipient of this notice.

☐ 3. Check to indicate if the analytical results are attached. (If item 2. above is checked, the analytical results from the environmental sampling must be attached to this notice.)

D. Location of the property where the environmental sampling ~~will be~~/has been conducted:

1. Street Address: 121 Washington Street

City/Town: Somerville, MA Zip Code: 02145-4205

2. MCP phase of work during which the sampling ~~will be~~/has been conducted:

☐ Immediate Response Action
☐ Release Abatement Measure
☐ Utility-related Abatement Measure
☐ Phase I Initial Site Investigation
☐ Phase II Comprehensive Site Assessment
☐ Phase III Feasibility Evaluation
☐ Phase IV Remedy Implementation Plan
☑ Phase V/Remedy Operation Status
☐ Post-Temporary Solution Operation, Maintenance and Monitoring
☐ Other _____ (specify)

3. Description of property where sampling ~~will be~~/has been conducted:

☑ residential ☑ commercial ☐ industrial ☐ school/playground ☐ Other _____ (specify)

4. Description of the sampling locations and types (e.g., soil, groundwater, indoor air, soil gas) to the extent known at the time of this notice.

Sub-slab soil vapor monitoring point installation and sampling

NOTICE OF ENVIRONMENTAL SAMPLING

As required by 310 CMR 40.1403(10) of the Massachusetts Contingency Plan

MASSACHUSETTS REGULATIONS THAT REQUIRE THIS NOTICE

This notice is being provided pursuant to the Massachusetts Contingency Plan and the notification requirement at 310 CMR 40.1403(10). The Massachusetts Contingency Plan is a state regulation that specifies requirements for parties who are taking actions to address releases of chemicals (oil or hazardous material) to the environment.

THE PERSON(S) PROVIDING THIS NOTICE

This notice has been sent to you by the party who is addressing a release of oil or hazardous material to the environment at the location listed in **Section A** on the reverse side of this form. (The regulations refer to the area where the oil or hazardous material is present as the "disposal site".)

PURPOSE OF THIS NOTICE

When environmental samples are taken as part of an investigation of a release for which a notification to MassDEP has been made under the Massachusetts Contingency Plan (310 CMR 40.0300) on behalf of someone other than the owner of the property, the regulations require that the property owner (listed in **Section B** on the reverse side of this form) be given notice of the environmental sampling. The regulations also require that the property owner subsequently receive the analytical results following the analysis of the environmental samples.

Section C on the reverse side of this form indicates the circumstance under which you are receiving this notice at this time. If you are receiving this notice to inform you of the analytical results following the analysis of the environmental samples, you should also have received, as an attachment, a copy of analytical results. These results should indicate the number and type(s) of samples (e.g., soil, groundwater) analyzed, any chemicals identified, and the measured concentrations of those chemicals.

Section D on the reverse side of this form identifies the property where the environmental sampling will be/has been conducted, provides a description of the sampling locations within the property, and indicates the phase of work under the Massachusetts Contingency Plan regulatory process during which the samples will be/were collected.

FOR MORE INFORMATION

Information about the general process for addressing releases of oil or hazardous material under the Massachusetts Contingency Plan and related public involvement opportunities may be found at http://www.mass.gov/eea/agencies/massdep/cleanup. For more information regarding this notice, you may contact the party listed in **Section E** on the reverse side of this form. Information about the disposal site identified in Section A is also available in files at the Massachusetts Department of Environmental Protection. See http://public.dep.state.ma.us/SearchableSites2/Search.aspx to view site-specific files on-line or http://mass.gov/eea/agencies/massdep/about/contacts/conduct-a-file-review.html if you would like to make an appointment to see these files in person. Please reference the **Release Tracking Number** listed in the upper right hand corner on the reverse side of this form when making file review appointments.

Somerville, MA 02145

Re: Sub-Slab Soil Vapor Sampling Results
121 Washington Street
Somerville, Massachusetts

Dear Mr. Glover:

On behalf of the UniFirst Corporation, GEI Consultants, Inc. collected sub-slab soil vapor samples on December 12, 2025, at your property at 121 Washington Street to evaluate the potential for vapor intrusion.

On December 12, 2025, GEI installed two sub-slab soil vapor monitoring points (SV1 and SV2) within the building footprint. GEI collected two soil vapor samples from the newly installed sub-slab monitoring points to evaluate the concentrations of chlorinated volatile organic compounds (CVOCs) in soil vapor beneath the building. Attached is a summary table of the chemicals detected in the soil vapor samples (Table 1) and the laboratory data sheets for the recent sampling. A Massachusetts Department of Environmental Protection (MassDEP) Notice of Environmental Sampling Form (BWSC123) is also attached.

Tetrachloroethylene (PCE) was detected in both samples at 0.400 µg/m^3 and 0.597 µg/m^3 in SV1 and SV2, respectively. Trichloroethylene (TCE) was detected in SV1 at 0.403 µg/m^3. 1,1,1-Trichloroethane was detected in SV2 at 0.131 µg/m^3. No other CVOCs were detected above laboratory reporting limits in the samples.

The detected soil vapor concentrations are below the applicable MassDEP residential and commercial soil vapor screening values. Soil vapor concentrations that are below the soil vapor screening values generally indicate that the vapor intrusion pathway is unlikely to be of concern under current conditions.

Individuals and public officials may request additional public involvement activities under the Massachusetts Contingency Plan (MCP; 310 CMR 40.1403(9) and 40.1404). The property owner may also request additional documentation, such as that listed at 310 CMR 40.0017(3), associated with the above-referenced samples. We will provide such additional documentation within 30 days of our receipt of such a request.

We appreciate your continued cooperation throughout the sampling process. If you have any questions regarding the sampling results, please do not hesitate to contact me at 781.721.4012 or igladstone@geiconsultants.com.

Sincerely,

GEI Consultants, Inc

NOTICE OF ENVIRONMENTAL SAMPLING

As required by 310 CMR 40.1403(10) of the Massachusetts Contingency Plan

A. The address of the disposal site related to this Notice and Release Tracking Number (provided above):

1. Street Address: 50 Tufts Street

City/Town: Somerville Zip Code: 02145-4129

B. This notice is being provided to the following party:

1. Name: Keith Glover - Wooden Teeth, LLC

2. Street Address: 17 Village Street, Unit 1

City/Town: Somerville, MA Zip Code: 02145

C. This notice is being given to inform its recipient (the party listed in Section B):

☑ 1. That environmental sampling ~~will be~~/has been conducted at property owned by the recipient of this notice.

☑ 2. Of the results of environmental sampling conducted at property owned by the recipient of this notice.

☑ 3. Check to indicate if the analytical results are attached. (If item 2. above is checked, the analytical results from the environmental sampling must be attached to this notice.)

D. Location of the property where the environmental sampling ~~will be~~/has been conducted:

1. Street Address: 121 Washington Street

City/Town: Somerville, MA Zip Code: 02145-4205

2. MCP phase of work during which the sampling ~~will be~~/has been conducted:

☐ Immediate Response Action
☐ Release Abatement Measure
☐ Utility-related Abatement Measure
☐ Phase I Initial Site Investigation
☐ Phase II Comprehensive Site Assessment
☐ Phase III Feasibility Evaluation
☐ Phase IV Remedy Implementation Plan
☑ Phase V/Remedy Operation Status
☐ Post-Temporary Solution Operation, Maintenance and Monitoring
☐ Other _____ (specify)

3. Description of property where sampling ~~will be~~/has been conducted:

☑ residential ☑ commercial ☐ industrial ☐ school/playground ☐ Other _____ (specify)

4. Description of the sampling locations and types (e.g., soil, groundwater, indoor air, soil gas) to the extent known at the time of this notice.

Sub-slab soil vapor monitoring point installation and sampling

NOTICE OF ENVIRONMENTAL SAMPLING

As required by 310 CMR 40.1403(10) of the Massachusetts Contingency Plan

MASSACHUSETTS REGULATIONS THAT REQUIRE THIS NOTICE

This notice is being provided pursuant to the Massachusetts Contingency Plan and the notification requirement at 310 CMR 40.1403(10). The Massachusetts Contingency Plan is a state regulation that specifies requirements for parties who are taking actions to address releases of chemicals (oil or hazardous material) to the environment.

THE PERSON(S) PROVIDING THIS NOTICE

This notice has been sent to you by the party who is addressing a release of oil or hazardous material to the environment at the location listed in **Section A** on the reverse side of this form. (The regulations refer to the area where the oil or hazardous material is present as the "disposal site".)

PURPOSE OF THIS NOTICE

When environmental samples are taken as part of an investigation of a release for which a notification to MassDEP has been made under the Massachusetts Contingency Plan (310 CMR 40.0300) on behalf of someone other than the owner of the property, the regulations require that the property owner (listed in **Section B** on the reverse side of this form) be given notice of the environmental sampling. The regulations also require that the property owner subsequently receive the analytical results following the analysis of the environmental samples.

Section C on the reverse side of this form indicates the circumstance under which you are receiving this notice at this time. If you are receiving this notice to inform you of the analytical results following the analysis of the environmental samples, you should also have received, as an attachment, a copy of analytical results. These results should indicate the number and type(s) of samples (e.g., soil, groundwater) analyzed, any chemicals identified, and the measured concentrations of those chemicals.

Section D on the reverse side of this form identifies the property where the environmental sampling will be/has been conducted, provides a description of the sampling locations within the property, and indicates the phase of work under the Massachusetts Contingency Plan regulatory process during which the samples will be/were collected.

FOR MORE INFORMATION

Information about the general process for addressing releases of oil or hazardous material under the Massachusetts Contingency Plan and related public involvement opportunities may be found at http://www.mass.gov/eea/agencies/massdep/cleanup. For more information regarding this notice, you may contact the party listed in **Section E** on the reverse side of this form. Information about the disposal site identified in Section A is also available in files at the Massachusetts Department of Environmental Protection. See http://public.dep.state.ma.us/SearchableSites2/Search.aspx to view site-specific files on-line or http://mass.gov/eea/agencies/massdep/about/contacts/conduct-a-file-review.html if you would like to make an appointment to see these files in person. Please reference the **Release Tracking Number** listed in the upper right hand corner on the reverse side of this form when making file review appointments.

Re: Property Access for Annual EPMM Inspection and Indoor Air Sampling
4 Morton Street
Somerville, Massachusetts

Dear Mr. Qiao:

On behalf of UniFirst Corporation, I am writing to request access to your property at 4 Morton Street to perform the annual inspection of the exposure pathway mitigation measure (EPMM) installed in the basement. We previously sent a letter on August 16, 2022, March 13, 2023, August 16, 2023, October 9, 2023, January 24, 2024, and January 14, 2025.The EPMM consists of a sub-slab vapor barrier, ventilation piping with extraction points beneath the basement slab, and sealing the basement floor and the below grade portion of the walls. The EPMM was installed to inhibit vapors from intruding through the building foundation. We typically inspect the EPMM annually to confirm that the components are intact and functioning as intended. GEI would also like to conduct additional indoor air testing at your property at no expense to you, at the same time as the annual inspection. The testing will involve placement of an air collection canister or canisters within your home for approximately 24 hours. If you agree to provide this access, GEI would visit your property twice—once to drop off the canister(s) and once to pick them up and perform the annual inspection.

You may recall that we conducted indoor air sampling at your property located at 4 Morton Street to assess environmental conditions there. Indoor air testing was previously conducted at your property in February 2005, March 2006, July 2006, October 2006, and December 2006. Chlorinated VOCs were detected above the laboratory detection limit in one or more of the indoor air samples collected from your property. The results of the historical sampling are provided in the attached Table 1.

In connection with our ongoing work with MassDEP, we are reaching out to homeowners in the area where recent indoor air sampling data is not available to request access to conduct additional indoor air monitoring to assess current conditions. This request is not associated with a new release or any specific change in conditions, but instead it is intended to confirm that long-term risks associated with the 50 Tufts Street Site continue to be appropriately managed.

Our records indicate that your preferred method for scheduling EPMM inspections was by email at qiaox2001@yahoo.com or xjq220@gmail.com and your home and work numbers were 617-905-5158 and 781-395-4358, respectively. It appears that the home and work phone numbers we have for you are no longer working numbers and we received no response to our email. Please inform me if you have an alternative phone number or email for scheduling future EPMM inspections.

Please contact Christopher Coner at 781-721-4135 or cconer@geiconsultants.com, to schedule the annual EPMM inspection of the basement, if you have any questions, or would like additional information.

Sincerely,

GEI CONSULTANTS, INC.

Mr. Avani Campos
9 Tufts Street
Somerville, MA 02145

Re: Property Access for Indoor Air Sampling
9 Tufts Street
Somerville, Massachusetts

Dear Mr. Campos:

As you may recall, GEI Consultants (GEI) has been working for years in the neighborhood to manage environmental risks associated with the historical release of chlorinated volatile organic compounds (VOCs) to soil and groundwater on the nearby 50 Tufts Street Property that was first reported in 2002. GEI's work is being conducted under the Massachusetts Contingency Plan (MCP) overseen by the Massachusetts Department of Environmental Protection (MassDEP).

You may also recall that we conducted indoor air sampling at your property located at 9 Tufts Street to assess environmental conditions there. Indoor air testing was previously conducted at your property in February 2005, March 2006, July 2006, October 2006, and December 2006. Chlorinated VOCs were detected above the laboratory detection limit in one or more of the indoor air samples collected from your property. The results of the historical sampling are provided in the attached Table 1.

In connection with our ongoing work with MassDEP, we are reaching out to homeowners in the area where recent indoor air sampling data is not available to request access to conduct additional indoor air monitoring to assess current conditions. This request is not associated with a new release or any specific change in conditions, but instead it is intended to confirm that long-term risks associated with the 50 Tufts Street Site continue to be appropriately managed.

If you are interested in more information regarding GEI's work, reports documenting response actions conducted at the 50 Tufts Street Site are available for review at the MassDEP Northeast Regional Office in Woburn, Massachusetts. A map depicting the extent of the "Site" is attached and marked as "Figure 1." Records also are accessible online at the MassDEP Searchable Sites database (https://eeaonline.eea.state.ma.us/portal/dep/wastesite/). Additionally, local public document repositories have been established at the Somerville Central Public Library and at the City of Somerville Clerk's Office. The MassDEP release tracking number (RTN) for the Site is RTN 3-23246.

GEI would like to conduct additional indoor air testing at your property at no expense to you. The testing will involve placement of an air collection canister or canisters within your home for approximately 24 hours. If you agree to provide this access, GEI would visit your property twice—once to drop off the canister(s) and once to pick them up. Please contact me at igladstone@geiconsultants.com or 781.721.4012 to answer any of your questions and to coordinate this access.. All results of our testing will be promptly shared with you.

Sincerely,

GEI CONSULTANTS, INC

General Notes:

1. Analytes detected in at least one sample are reported here.
2. µg/m3 = micrograms per cubic meter.
3. ppbv = parts per billion by volume.
4. "<" = The analyte was not detected at a concentration above the specified laboratory reporting limit.
5. NT= Not tested
6. NS= No standard established
7. Shaw Environmental collected samples on behalf of the DEP, samples collected 2/23/05.

Qualifying Notes:

J The reported result is below the laboratory reporting limit and is estimated.
L The reported result is estimated because the calculated relative percent difference (RPD) between a sample and the matrix duplicate was above the quality control limit specified in the Quality Assurance Project Plan (QAPP).
J+ The reported result is estimated.

Re: Summary of Indoor Air Sampling and Environmental Conditions
11-13 Tufts Street
Somerville, Massachusetts

Dear Mr. Danzilio, Ms. Danzilio, and Mr. Danzilio:

We understand that you are the owners of the property located at 11-13 Tufts Street, Unit 1, in Somerville, Massachusetts. GEI Consultants, Inc. (GEI) has been working for years in the neighborhood to manage environmental risks associated with the historical release of chlorinated volatile organic compounds (VOCs) to soil and groundwater on the nearby 50 Tufts Street Property that was first reported in 2002. GEI's work is being conducted under the Massachusetts Contingency Plan (MCP) overseen by the Massachusetts Department of Environmental Protection (MassDEP). The purpose of this letter is to summarize the environmental conditions in the area, share information regarding prior environmental evaluation of your property, and to request your permission to collect additional data from your property. This request is not associated with a new release or any specific change in conditions, but instead it is intended to confirm that long-term risks associated with the 50 Tufts Street Site continue to be appropriately managed.

A release of chlorinated VOCs on the 50 Tufts Street Property was first reported to the MassDEP in 2002. GEI is an environmental consulting firm that has been working on response actions at 50 Tufts Street and in the neighborhood since 2004. Numerous studies have been conducted relating to the 50 Tufts Street Site, and response actions are currently being conducted under the MCP process overseen by MassDEP.

If you are interested in more information regarding GEI's work, reports documenting response actions conducted at the 50 Tufts Street Site are available for review at the MassDEP Northeast Regional Office in Woburn, Massachusetts. A map depicting the extent of the "Site" is attached and marked as "Figure 1." Records are accessible online at the MassDEP Searchable Sites database (https://eeaonline.eea.state.ma.us/portal/dep/wastesite/). Additionally, local public document repositories have been established at the Somerville Central Public Library and at the City of Somerville Clerk's Office. The MassDEP release tracking number (RTN) for the Site is RTN 323246.

Indoor air testing was previously conducted at your property in February 2005, March 2006, June 2006, September 2006, and December 2006. Chlorinated VOCs were detected above the laboratory detection limit in one or more of the indoor air samples collected from your property. The results of the sampling are in the attached Table 1.

GEI would like to conduct additional indoor air testing at your property at no expense to you. The testing will involve the placement of an air collection canister or canisters within your home for approximately 24 hours. If you agree to provide this access, GEI would visit your property twice—once to drop off the canister(s) and once to pick them up. Please contact me at igladstone@geiconsultants.com or 781.721.4012 to answer any of your questions and to coordinate this access. All results of our testing will be promptly shared with you.

Sincerely,

GEI CONSULTANTS, INC.

Mr. Benjamin Vachon
11-13 Tufts Street, Unit 3
Somerville, MA 02145

Re: Summary of Indoor Air Sampling and Environmental Conditions
11-13 Tufts Street
Somerville, Massachusetts

Dear Mr. Vachon:

We understand that you are the owners of the property located at 11-13 Tufts Street, Unit 3, in Somerville, Massachusetts. GEI Consultants, Inc. (GEI) has been working for years in the neighborhood to manage environmental risks associated with the historical release of chlorinated volatile organic compounds (VOCs) to soil and groundwater on the nearby 50 Tufts Street Property that was first reported in 2002. GEI's work is being conducted under the Massachusetts Contingency Plan (MCP) overseen by the Massachusetts Department of Environmental Protection (MassDEP). The purpose of this letter is to summarize the environmental conditions in the area, share information regarding prior environmental evaluation of your property, and to request your permission to collect additional data from your property. This request is not associated with a new release or any specific change in conditions, but instead it is intended to confirm that long-term risks associated with the 50 Tufts Street Site continue to be appropriately managed.

A release of chlorinated VOCs on the 50 Tufts Street Property was first reported to the MassDEP in 2002. GEI is an environmental consulting firm that has been working on response actions at 50 Tufts Street and in the neighborhood since 2004. Numerous studies have been conducted relating to the 50 Tufts Street Site, and response actions are currently being conducted under the MCP process overseen by MassDEP.

If you are interested in more information regarding GEI's work, reports documenting response actions conducted at the 50 Tufts Street Site are available for review at the MassDEP Northeast Regional Office in Woburn, Massachusetts. A map depicting the extent of the "Site" is attached and marked as "Figure 1." Records are accessible online at the MassDEP Searchable Sites database (https://eeaonline.eea.state.ma.us/portal/dep/wastesite/). Additionally, local public document repositories have been established at the Somerville Central Public Library and at the City of Somerville Clerk's Office. The MassDEP release tracking number (RTN) for the Site is RTN 323246.

Indoor air testing was previously conducted at your property in February 2005, March 2006, June 2006, September 2006, and December 2006. Chlorinated VOCs were detected above the laboratory detection

limit in one or more of the indoor air samples collected from your property. The results of the sampling are in the attached Table 1.

GEI would like to conduct additional indoor air testing at your property at no expense to you. The testing will involve the placement of an air collection canister or canisters within your home for approximately 24 hours. If you agree to provide this access, GEI would visit your property twice—once to drop off the canister(s) and once to pick them up. Please contact me at igladstone@geiconsultants.com or 781.721.4012 to answer any of your questions and to coordinate this access. All results of our testing will be promptly shared with you.

Re: Property Access for Indoor Air Sampling
17 Tufts Street
Somerville, Massachusetts

Dear Mr. and Mrs. Provost:

As you may recall, GEI Consultants (GEI) has been working for years in the neighborhood to manage environmental risks associated with the historical release of chlorinated volatile organic compounds (VOCs) to soil and groundwater on the nearby 50 Tufts Street Property that was first reported in 2002. GEI's work is being conducted under the Massachusetts Contingency Plan (MCP) overseen by the Massachusetts Department of Environmental Protection (MassDEP).

You may also recall that we conducted indoor air sampling at your property located at 17 Tufts Street to assess environmental conditions there. Indoor air testing was previously conducted at your property in March 2005, March 2006, October 2006, and December 2006. Chlorinated VOCs were detected above the laboratory detection limit in one or more of the indoor air samples collected from your property. The results of the historical sampling are provided in the attached Table 1.

In connection with our ongoing work with MassDEP, we are reaching out to homeowners in the area where recent indoor air sampling data is not available to request access to conduct additional indoor air monitoring to assess current conditions. This request is not associated with a new release or any specific change in conditions, but instead it is intended to confirm that long-term risks associated with the 50 Tufts Street Site continue to be appropriately managed.

If you are interested in more information regarding GEI's work, reports documenting response actions conducted at the 50 Tufts Street Site are available for review at the MassDEP Northeast Regional Office in Woburn, Massachusetts. A map depicting the extent of the "Site" is attached and marked as "Figure 1." Records also are accessible online at the MassDEP Searchable Sites database (https://eeaonline.eea.state.ma.us/portal/dep/wastesite/). Additionally, local public document repositories have been established at the Somerville Central Public Library and at the City of Somerville Clerk's Office. The MassDEP release tracking number (RTN) for the Site is RTN 3-23246.

GEI would like to conduct additional indoor air testing at your property at no expense to you. The testing will involve placement of an air collection canister or canisters within your home for approximately 24 hours. If you agree to provide this access, GEI would visit your property twice—once to drop off the canister(s) and once to pick them up. Please contact me at igladstone@geiconsultants.com or 781.721.4012 to answer any of your questions and to coordinate this access. All results of our testing will be promptly shared with you.

Sincerely,

GEI CONSULTANTS, INC

Re: Summary of Indoor Air Sampling and Environmental Conditions
19 Tufts Street
Somerville, Massachusetts

Dear Mr. Himmelfarb, Mr. Evans, and Ms. Goodell:

We understand that you are the owners of the property located at 19 Tufts Street in Somerville, Massachusetts. GEI Consultants, Inc. (GEI) has been working for years in the neighborhood to manage environmental risks associated with the historical release of chlorinated volatile organic compounds (VOCs) to soil and groundwater on the nearby 50 Tufts Street Property that was first reported in 2002. GEI's work is being conducted under the Massachusetts Contingency Plan (MCP) overseen by the Massachusetts Department of Environmental Protection (MassDEP). The purpose of this letter is to summarize the environmental conditions in the area, share information regarding prior environmental evaluation of your property, and to request your permission to collect additional data from your property. This request is not associated with a new release or any specific change in conditions, but instead it is intended to confirm that long-term risks associated with the 50 Tufts Street Site continue to be appropriately managed.

A release of chlorinated VOCs on the 50 Tufts Street Property was first reported to the MassDEP in 2002. GEI is an environmental consulting firm that has been working on response actions at 50 Tufts Street and in the neighborhood since 2004. Numerous studies have been conducted relating to the 50 Tufts Street Site, and response actions are currently being conducted under the MCP process overseen by MassDEP.

If you are interested in more information regarding GEI's work, reports documenting response actions conducted at the 50 Tufts Street Site are available for review at the MassDEP Northeast Regional Office in Woburn, Massachusetts. A map depicting the extent of the "Site" is attached and marked as "Figure 1." Records are accessible online at the MassDEP Searchable Sites database (https://eeaonline.eea.state.ma.us/portal/dep/wastesite/). Additionally, local public document repositories have been established at the Somerville Central Public Library and at the City of Somerville Clerk's Office. The MassDEP release tracking number (RTN) for the Site is RTN 323246.

Indoor air testing was previously conducted at your property in March 2005, March 2006, June 2006, October 2006, and December 2006. Chlorinated VOCs were detected above the laboratory detection limit in one or more of the indoor air samples collected from your property. The results of the sampling are in the attached Table 1.

GEI would like to conduct additional indoor air testing at your property at no expense to you. The testing will involve the placement of an air collection canister or canisters within your home for approximately 24 hours. If you agree to provide this access, GEI would visit your property twice—once to drop off the canister(s) and once to pick them up. Please contact me at igladstone@geiconsultants.com or 781.721.4012 to answer any of your questions and to coordinate this access. All results of our testing will be promptly shared with you.

2. µg/m3 = micrograms per cubic meter.
3. ppbv = parts per billion by volume.
4. "<" = The analyte was not detected at a concentration above the specified laboratory reporting limit.
5. NT= Not tested
6. NS= No standard established
7. Shaw Environmental collected samples on behalf of the DEP, samples collected 2/23/05.

Qualifying Notes:

J The reported result is below the laboratory reporting limit and is estimated.
L The reported result is estimated because the calculated relative percent difference (RPD) between a sample and the matrix duplicate was above the quality control limit specified in the Quality Assurance Project Plan (QAPP).
J+ The reported result is estimated.

Hull, MA 02045

Re: Summary of Indoor Air Sampling and Environmental Conditions
99 Franklin Street
Somerville, Massachusetts

Dear Mr. Faber:

We understand that you are the owners of the property located at 99 Franklin Street in Somerville, Massachusetts. GEI Consultants, Inc. (GEI) has been working for years in the neighborhood to manage environmental risks associated with the historical release of chlorinated volatile organic compounds (VOCs) to soil and groundwater on the nearby 50 Tufts Street Property that was first reported in 2002. GEI's work is being conducted under the Massachusetts Contingency Plan (MCP) overseen by the Massachusetts Department of Environmental Protection (MassDEP). The purpose of this letter is to summarize the environmental conditions in the area, share information regarding prior environmental evaluation of your property, and to request your permission to collect additional data from your property. This request is not associated with a new release or any specific change in conditions, but instead it is intended to confirm that long-term risks associated with the 50 Tufts Street Site continue to be appropriately managed.

A release of chlorinated VOCs on the 50 Tufts Street Property was first reported to the MassDEP in 2002. GEI is an environmental consulting firm that has been working on response actions at 50 Tufts Street and in the neighborhood since 2004. Numerous studies have been conducted relating to the 50 Tufts Street Site, and response actions are currently being conducted under the MCP process overseen by MassDEP.

If you are interested in more information regarding GEI's work, reports documenting response actions conducted at the 50 Tufts Street Site are available for review at the MassDEP Northeast Regional Office in Woburn, Massachusetts. A map depicting the extent of the "Site" is attached and marked as "Figure 1." Records are accessible online at the MassDEP Searchable Sites database (https://eeaonline.eea.state.ma.us/portal/dep/wastesite/). Additionally, local public document repositories have been established at the Somerville Central Public Library and at the City of Somerville Clerk's Office. The MassDEP release tracking number (RTN) for the Site is RTN 3-23246.

Indoor air testing was previously conducted at your property in June 2007, February 2008, and September 2009. Chlorinated VOCs were detected above the laboratory detection limit in one or more of the indoor air samples collected from your property. The results of the sampling are in the attached Table 1.

GEI would like to conduct additional indoor air testing at your property at no expense to you. The testing will involve the placement of an air collection canister or canisters within your home for approximately 24 hours. If you agree to provide this access, GEI would visit your property twice—once to drop off the canister(s) and once to pick them up.

Please contact me at igladstone@geiconsultants.com or 781.721.4012 to answer any of your questions and to coordinate this access. All results of our testing will be promptly shared with you.

Sincerely,

GEI CONSULTANTS, INC.

Re: Property Access for Indoor Air Sampling
162-164 Glen Street
Somerville, Massachusetts

Dear Mr. and Mrs. Maciel:

As you may recall, GEI Consultants (GEI) has been working for years in the neighborhood to manage environmental risks associated with the historical release of chlorinated volatile organic compounds (VOCs) to soil and groundwater on the nearby 50 Tufts Street Property that was first reported in 2002. GEI's work is being conducted under the Massachusetts Contingency Plan (MCP) overseen by the Massachusetts Department of Environmental Protection (MassDEP).

You may also recall that we conducted indoor air sampling at your property located at 162-164 Glen Street to assess environmental conditions there. Indoor air testing was previously conducted at your property in August 2007, January 2010, November 2010, and February 2011. Chlorinated VOCs were detected above the laboratory detection limit in one or more of the indoor air samples collected from your property. The results of the historical sampling are provided in the attached Table 1.

In connection with our ongoing work with MassDEP, we are reaching out to homeowners in the area where recent indoor air sampling data is not available to request access to conduct additional indoor air monitoring to assess current conditions. This request is not associated with a new release or any specific change in conditions, but instead it is intended to confirm that long-term risks associated with the 50 Tufts Street Site continue to be appropriately managed.

If you are interested in more information regarding GEI's work, reports documenting response actions conducted at the 50 Tufts Street Site are available for review at the MassDEP Northeast Regional Office in Woburn, Massachusetts. A map depicting the extent of the "Site" is attached and marked as "Figure 1." Records also are accessible online at the MassDEP Searchable Sites database (https://eeaonline.eea.state.ma.us/portal/dep/wastesite/). Additionally, local public document repositories have been established at the Somerville Central Public Library and at the City of Somerville Clerk's Office. The MassDEP release tracking number (RTN) for the Site is RTN 3-23246.

GEI would like to conduct additional indoor air testing at your property at no expense to you. The testing will involve placement of an air collection canister or canisters within your home for approximately 24 hours. If you agree to provide this access, GEI would visit your property twice—once to drop off the canister(s) and once to pick them up. Please contact me at igladstone@geiconsultants.com or 781.721.4012 to answer any of your questions and to coordinate this access. All results of our testing will be promptly shared with you.

Type of Backfill below Filter Material	Silica Sand
Bottom of Borehole	30.7'

Notes: Driller switched grout method from cement to bentonite chips at ~7' because cement was lost to hole at the soil/weathered rock interface. Driller completed bentonite chips to 1'.

MADEP MCP Response Action Analytical Report Certification

This form provides certifications for all samples performed by MCP methods. Please refer to the Sample Results and Container Information sections of this report for specification of MCP methods used for each analysis. The following questions pertain only to MCP Analytical Methods.

An affirmative response to questions A through F is required for "Presumptive Certainty" status		
A	Were all samples received in a condition consistent with those described on the Chain-of-Custody, properly preserved (including temperature) in the field or laboratory, and prepared/analyzed within method holding times?	YES
B	Were the analytical method(s) and all associated QC requirements specified in the selected CAM protocol(s) followed?	YES
C	Were all required corrective actions and analytical response actions specified in the selected CAM protocol(s) implemented for all identified performance standard non-conformances?	YES
D	Does the laboratory report comply with all the reporting requirements specified in CAM VII A, "Quality Assurance and Quality Control Guidelines for the Acquisition and Reporting of Analytical Data?"	YES
E 1.	VPH, EPH, and APH Methods only: Was each method conducted without significant modification(s)? (Refer to the individual method(s) for a list of significant modifications).	N/A
E 2.	PFAS Only: Were aqueous samples extracted without filtering?	N/A
F	Were all applicable CAM protocol QC and performance standard non-conformances identified and evaluated in a laboratory narrative (including all "No" responses to Questions A through E)?	YES

A response to questions G, H and I is required for "Presumptive Certainty" status		
G	Were the reporting limits/lower limits of quantitation at or below all CAM reporting limits/lower limits of quantitation specified in the selected CAM protocol(s)?	NO
H	Were all QC performance standards specified in the CAM protocol(s) achieved?	NO
I	Were results reported for the complete analyte list specified in the selected CAM protocol(s)?	YES

For any questions answered "No", please refer to the case narrative section on the following page(s).

Please note that sample matrix information is located in the Sample Results section of this report.

Project Name:	50 TUFTS STREET	**Lab Number:**	L2564441
Project Number:	045163	**Report Date:**	10/23/25

Case Narrative

The samples were received in accordance with the Chain of Custody and no significant deviations were encountered during the preparation or analysis unless otherwise noted. Sample Receipt, Container Information, and the Chain of Custody are located at the back of the report.

Results contained within this report relate only to the samples submitted under this Pace Lab Number and meet NELAP requirements for all NELAP accredited parameters unless otherwise noted in the following narrative. The data presented in this report is organized by parameter (i.e. VOC, SVOC, etc.). Sample specific Quality Control data (i.e. Surrogate Spike Recovery) is reported at the end of the target analyte list for each individual sample, followed by the Laboratory Batch Quality Control at the end of each parameter. Tentatively Identified Compounds (TICs), if requested, are reported for compounds identified to be present and are not part of the method/program Target Compound List, even if only a subset of the TCL are being reported. If a sample was re-analyzed or re-extracted due to a required quality control corrective action and if both sets of data are reported, the Laboratory ID of the re-analysis or re-extraction is designated with an "R" or "RE", respectively.

When multiple Batch Quality Control elements are reported (e.g. more than one LCS), the associated samples for each element are noted in the grey shaded header line of each data table. Any Laboratory Batch, Sample Specific % recovery or RPD value that is outside the listed Acceptance Criteria is bolded in the report. In reference to questions H (CAM) or 4 (RCP) when "NO" is checked, the performance criteria for CAM and RCP methods allow for some quality control failures to occur and still be within method compliance. In these instances, the specific failure is not narrated but noted in the associated QC Outlier Summary Report, located directly after the Case Narrative. QC information is also incorporated in the Data Usability Assessment table (Format 11) of our Data Merger tool, where it can be reviewed in conjunction with the sample result, associated regulatory criteria and any associated data usability implications.

Soil/sediments and solids are reported on a dry weight basis unless otherwise noted. Tissues are reported "as received" or on a wet weight basis, unless otherwise noted. Definitions of all data qualifiers and acronyms used in this report are provided in the Glossary located at the back of the report.

HOLD POLICY - For samples submitted on hold, Pace's policy is to hold samples (with the exception of Air canisters) free of charge for 21 calendar days from the date the project is completed. After 21 calendar days, we will dispose of all samples submitted including those put on hold unless you have contacted your Pace Project Manager and made arrangements for Pace to continue to hold the samples. Air canisters will be disposed after 3 business days from the date the project is completed.

Please contact Project Management at 800-624-9220 with any questions.

Project Name: 50 TUFTS STREET **Lab Number:** L2564441
Project Number: 045163 **Report Date:** 10/23/25

Case Narrative (continued)

MCP Related Narratives

Volatile Organics

L2564441-01: The analysis of Volatile Organics by EPA Method 5035/8260 Low Level could not be performed due to excessive sample weight. A High Level analysis was performed and reported.

In reference to question G:

L2564441-01 through -04: One or more of the target analytes did not achieve the requested CAM reporting limits.

In reference to question H:

L2564441-01 and -02: Initial Calibration did not meet:

Lowest Calibration Standard Minimum Response Factor: bromodichloromethane (0.2646), 1,4-dioxane (0.0013), 1,1,2-trichloroethane (0.1873)

Average Response Factor: 1,4-dioxane

Verification: acetone (65%)

L2564441-03 and -04: Initial Calibration did not meet:

Lowest Calibration Standard Minimum Response Factor: 1,4-dioxane (0.0018), 1,1,2-trichloroethane (0.1851)

Average Response Factor: 1,4-dioxane

L2564441-01, -02, -03, and -04: The associated continuing calibration standard is outside the acceptance criteria for several compounds; however, it is within overall method allowances. Associated results are considered to be biased high if the %D is negative and biased low if the %D is positive. A copy of the continuing calibration standard is included as an addendum to this report.

I, the undersigned, attest under the pains and penalties of perjury that, to the best of my knowledge and belief and based upon my personal inquiry of those responsible for providing the information contained in this analytical report, such information is accurate and complete. This certificate of analysis is not complete unless this page accompanies any and all pages of this report.

Authorized Signature: Cristin Walker

GLOSSARY

Acronyms

DL	- Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the limit of quantitation (LOQ). The DL includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)
EDL	- Estimated Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The EDL includes any adjustments from dilutions, concentrations or moisture content, where applicable. The use of EDLs is specific to the analysis of PAHs using Solid-Phase Microextraction (SPME).
EMPC	- Estimated Maximum Possible Concentration: The concentration that results from the signal present at the retention time of an analyte when the ions meet all of the identification criteria except the ion abundance ratio criteria. An EMPC is a worst-case estimate of the concentration.
EPA	- Environmental Protection Agency.
LCS	- Laboratory Control Sample: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
LCSD	- Laboratory Control Sample Duplicate: Refer to LCS.
LFB	- Laboratory Fortified Blank: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
LOD	- Limit of Detection: This value represents the level to which a target analyte can reliably be detected for a specific analyte in a specific matrix by a specific method. The LOD includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)
LOQ	- Limit of Quantitation: The value at which an instrument can accurately measure an analyte at a specific concentration. The LOQ includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.) Limit of Quantitation: The value at which an instrument can accurately measure an analyte at a specific concentration. The LOQ includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)
MDL	- Method Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The MDL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
MS	- Matrix Spike Sample: A sample prepared by adding a known mass of target analyte to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available. For Method 332.0, the spike recovery is calculated using the native concentration, including estimated values.
MSD	- Matrix Spike Sample Duplicate: Refer to MS.
NA	- Not Applicable.
NC	- Not Calculated: Term is utilized when one or more of the results utilized in the calculation are non-detect at the parameter's reporting unit.
NDPA/DPA	- N-Nitrosodiphenylamine/Diphenylamine.
NI	- Not Ignitable.
NP	- Non-Plastic: Term is utilized for the analysis of Atterberg Limits in soil.
NR	- No Results: Term is utilized when 'No Target Compounds Requested' is reported for the analysis of Volatile or Semivolatile Organic TIC only requests.
RL	- Reporting Limit: The value at which an instrument can accurately measure an analyte at a specific concentration. The RL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
RPD	- Relative Percent Difference: The results from matrix and/or matrix spike duplicates are primarily designed to assess the precision of analytical results in a given matrix and are expressed as relative percent difference (RPD). Values which are less than five times the reporting limit for any individual parameter are evaluated by utilizing the absolute difference between the values; although the RPD value will be provided in the report.
SRM	- Standard Reference Material: A reference sample of a known or certified value that is of the same or similar matrix as the associated field samples.
STLP	- Semi-dynamic Tank Leaching Procedure per EPA Method 1315.
TEF	- Toxic Equivalency Factors: The values assigned to each dioxin and furan to evaluate their toxicity relative to 2,3,7,8-TCDD.
TEQ	- Toxic Equivalent: The measure of a sample's toxicity derived by multiplying each dioxin and furan by its corresponding TEF and then summing the resulting values.
TIC	- Tentatively Identified Compound: A compound that has been identified to be present and is not part of the target compound list (TCL) for the method and/or program. All TICs are qualitatively identified and reported as estimated concentrations.

Report Format: Data Usability Report

Project Name:	50 TUFTS STREET	**Lab Number:**	L2564441
Project Number:	045163	**Report Date:**	10/23/25

Footnotes

1 - The reference for this analyte should be considered modified since this analyte is absent from the target analyte list of the original method.

Terms

Analytical Method: Both the document from which the method originates and the analytical reference method. (Example: EPA 8260B is shown as 1,8260B.) The codes for the reference method documents are provided in the References section of the Addendum.

Chlordane: The target compound Chlordane (CAS No. 57-74-9) is reported for GC ECD analyses. Per EPA,this compound "refers to a mixture of chlordane isomers, other chlorinated hydrocarbons and numerous other components." (Reference: USEPA Toxicological Review of Chlordane, In Support of Summary Information on the Integrated Risk Information System (IRIS), December 1997.)

Difference: With respect to Total Oxidizable Precursor (TOP) Assay analysis, the difference is defined as the Post-Treatment value minus the Pre-Treatment value.

Final pH: As it pertains to Sample Receipt & Container Information section of the report, Final pH reflects pH of container determined after adjustment at the laboratory, if applicable. If no adjustment required, value reflects Initial pH.

Frozen Date/Time: With respect to Volatile Organics in soil, Frozen Date/Time reflects the date/time at which associated Reagent Water-preserved vials were initially frozen. Note: If frozen date/time is beyond 48 hours from sample collection, value will be reflected in 'bold'.

Gasoline Range Organics (GRO): Gasoline Range Organics (GRO) results include all chromatographic peaks eluting from Methyl tert butyl ether through Naphthalene, with the exception of GRO analysis in support of State of Ohio programs, which includes all chromatographic peaks eluting from Hexane through Dodecane.

Initial pH: As it pertains to Sample Receipt & Container Information section of the report, Initial pH reflects pH of container determined upon receipt, if applicable.

PAH Total: With respect to Alkylated PAH analyses, the 'PAHs, Total' result is defined as the summation of results for all or a subset of the following compounds: Naphthalene, C1-C4 Naphthalenes, 2-Methylnaphthalene, 1-Methylnaphthalene, Biphenyl, Acenaphthylene, Acenaphthene, Fluorene, C1-C3 Fluorenes, Phenanthrene, C1-C4 Phenanthrenes/Anthracenes, Anthracene, Fluoranthene, Pyrene, C1-C4 Fluoranthenes/Pyrenes, Benz(a)anthracene, Chrysene, C1-C4 Chrysenes, Benzo(b)fluoranthene, Benzo(j)+(k)fluoranthene, Benzo(e)pyrene, Benzo(a)pyrene, Perylene, Indeno(1,2,3-cd)pyrene, Dibenz(ah)+(ac)anthracene, Benzo(g,h,i)perylene. If a 'Total' result is requested, the results of its individual components will also be reported.

PFAS Total: With respect to PFAS analyses, the 'PFAS, Total (5)' result is defined as the summation of results for: PFHpA, PFHxS, PFOA, PFNA and PFOS. In addition, the 'PFAS, Total (6)' result is defined as the summation of results for: PFHpA, PFHxS, PFOA, PFNA, PFDA and PFOS. For MassDEP DW compliance analysis only, the 'PFAS, Total (6)' result is defined as the summation of results at or above the RL. Note: If a 'Total' result is requested, the results of its individual components will also be reported.

Total: With respect to Organic analyses, a 'Total' result is defined as the summation of results for individual isomers or Aroclors. If a 'Total' result is requested, the results of its individual components will also be reported. This is applicable to 'Total' results for methods 8260, 8081 and 8082.

Data Qualifiers

A - Spectra identified as "Aldol Condensates" are byproducts of the extraction/concentration procedures when acetone is introduced in the process.

B - The analyte was detected above the reporting limit in the associated method blank. Flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For MCP-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For DOD-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank AND the analyte was detected above one-half the reporting limit (or above the reporting limit for common lab contaminants) in the associated method blank. For NJ-Air-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte above the reporting limit. For NJ-related projects (excluding Air), flag only applies to associated field samples that have detectable concentrations of the analyte, which was detected above the reporting limit in the associated method blank or above five times the reporting limit for common lab contaminants (Phthalates, Acetone, Methylene Chloride, 2-Butanone).

C - Co-elution: The target analyte co-elutes with a known lab standard (i.e. surrogate, internal standards, etc.) for co-extracted analyses.

D - Concentration of analyte was quantified from diluted analysis. Flag only applies to field samples that have detectable concentrations of the analyte.

E - Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument.

F - The ratio of quantifier ion response to qualifier ion response falls outside of the laboratory criteria. Results are considered to be an estimated maximum concentration.

G - The concentration may be biased high due to matrix interferences (i.e, co-elution) with non-target compound(s). The result should be considered estimated.

H - The analysis of pH was performed beyond the regulatory-required holding time of 15 minutes from the time of sample collection.

I - The lower value for the two columns has been reported due to obvious interference.

J - Estimated value. This represents an estimated concentration for Tentatively Identified Compounds (TICs).

M - Reporting Limit (RL) exceeds the MCP CAM Reporting Limit for this analyte.

Report Format: Data Usability Report

Project Name:	50 TUFTS STREET	**Lab Number:**	L2564441
Project Number:	045163	**Report Date:**	10/23/25

Data Qualifiers

ND	- Not detected at the reporting limit (RL) for the sample.
NJ	- Presumptive evidence of compound. This represents an estimated concentration for Tentatively Identified Compounds (TICs), where the identification is based on a mass spectral library search.
P	- The RPD between the results for the two columns exceeds the method-specified criteria.
Q	- The quality control sample exceeds the associated acceptance criteria. For DOD-related projects, LCS and/or Continuing Calibration Standard exceedences are also qualified on all associated sample results. Note: This flag is not applicable for matrix spike recoveries when the sample concentration is greater than 4x the spike added or for batch duplicate RPD when the sample concentrations are less than 5x the RL. (Metals only.)
R	- Analytical results are from sample re-analysis.
RE	- Analytical results are from sample re-extraction.
S	- Analytical results are from modified screening analysis.
V	- The surrogate associated with this target analyte has a recovery outside the QC acceptance limits. (Applicable to MassDEP DW Compliance samples only.)
Z	- The batch matrix spike and/or duplicate associated with this target analyte has a recovery/RPD outside the QC acceptance limits. (Applicable to MassDEP DW Compliance samples only.)

LIMITATION OF LIABILITIES

Pace Analytical Services performs services with reasonable care and diligence normal to the analytical testing laboratory industry. In the event of an error, the sole and exclusive responsibility of Pace Analytical Services shall be to re-perform the work at it's own expense. In no event shall Pace Analytical Services be held liable for any incidental, consequential or special damages, including but not limited to, damages in any way connected with the use of, interpretation of, information or analysis provided by Pace Analytical Services.

We strongly urge our clients to comply with EPA protocol regarding sample volume, preservation, cooling, containers, sampling procedures, holding time and splitting of samples in the field.

Certification Information

The following analytes are not included in our Primary NELAP Scope of Accreditation:

Westborough Facility – 8 Walkup Dr. Westborough, MA 01581
EPA 624.1: m/p-xylene, o-xylene, Naphthalene
EPA 625.1: alpha-Terpineol
EPA 8260D: NPW: 1,2,4,5-Tetramethylbenzene; 4-Ethyltoluene; SCM: Iodomethane (methyl iodide), 1,2,4,5-Tetramethylbenzene; 4-Ethyltoluene.
EPA 8270E: NPW: Dimethylnaphthalene,1,4-Diphenylhydrazine, alpha-Terpineol, Azobenzene; SCM: Dimethylnaphthalene,1,4-Diphenylhydrazine.
SM4500: NPW: Amenable Cyanide; SCM: Total Phosphorus, TKN, NO2, NO3.

Mansfield Facility – 320 Forbes Blvd. Mansfield, MA 02048
SM 2540D: TSS.
EPA TO-15: Halothane, 2,4,4-Trimethyl-2-pentene, 2,4,4-Trimethyl-1-pentene, Thiophene, 2-Methylthiophene, 3-Methylthiophene, 2-Ethylthiophene, 1,2,3-Trimethylbenzene, Indan, Indene, 1,2,4,5-Tetramethylbenzene, Benzothiophene, 1-Methylnaphthalene.
MADEP-APH.
Nonpotable Water: EPA RSK-175 Dissolved Gases
Biological Tissue Matrix: EPA 3050B

Mansfield Facility – 120 Forbes Blvd. Mansfield, MA 02048
EPA TO-15: Halothane, 2,4,4-Trimethyl-2-pentene, 2,4,4-Trimethyl-1-pentene, Thiophene, 2-Methylthiophene, 3-Methylthiophene, 2-Ethylthiophene, 1,2,3-Trimethylbenzene, Indan, Indene, 1,2,4,5-Tetramethylbenzene, Benzothiophene, 1-Methylnaphthalene.
Nonpotable Water: EPA RSK-175 Dissolved Gases

The following test method is not included in our New Jersey Secondary NELAP Scope of Accreditation:

Mansfield Facility – 320 Forbes Blvd. Mansfield, MA 02048
Determination of Selected Perfluorinated Alkyl Substances by Solid Phase Extraction and Liquid Chromatography/Tandem Mass Spectrometry Isotope Dilution (via Alpha SOP 23528)

The following analytes are included in our Massachusetts DEP Scope of Accreditation

Westborough Facility – 8 Walkup Dr. Westborough, MA 01581
